Turning Your Phone ON and OFF

Turning Your Phone ON

- ► To turn your phone on, press **END/O**.

Once your phone is ON, it displays "Looking for service..." which indicates that your phone is searching for a signal. When your phone finds a signal, it automatically enters standby mode. At this point, you are ready to begin making and receiving calls.

If your phone is unable to find a signal after 15 minutes of searching, a Power Save feature is automatically activated. When a signal is found, your phone automatically returns to standby mode.

In Power Save mode, your phone searches for a signal periodically without your intervention. You can also initiate a search for service by pressing any key (when your phone is turned ON).

Tip: The Power Save feature helps to save your battery power when you are in an area where there is no signal.

Turning Your Phone OFF

- ► Press and hold **END/O** until you see the powering down animation on the display screen.

Your screen remains blank while your phone is off (unless the battery is charging).

Using the Battery

Installing the Battery

To install the LiIon battery:

1. Insert the battery into the opening on the back of the phone and gently press down.

2. Place the battery cover into the position as indicated in the diagram, then slide it until you hear it snap into place.
Removing the Battery

To remove your battery:

1. Make sure the power is off. Press the battery release latch, then slide the battery cover and remove it.

2. Use your thumbnail to lift and then remove the battery as indicated in the diagram.
Charging the Battery

Your phone comes with a rechargeable battery. You should charge the battery as soon as possible so you can begin using your phone.

Keeping track of your battery's charge is important. If your battery level becomes too low, your phone automatically turns off and you will lose all the information you were just working on. For a quick check of your phone's battery level, glance at the battery charge indicator located in the upper-right corner of your phone's display screen. If the battery charge is getting too low, the battery icon ☐ appears and the phone sounds a warning tone.

Always use an approved travel charger or vehicle power adapter to charge your battery.

Warning! Using the wrong battery charger could cause damage to your phone and void the warranty.

Note: Long backlight settings, searching for service, vibrate mode, and browser use affect the battery's talk and standby times.

Using the Travel Charger

To use the travel charger provided with your phone:

1. Plug the travel charger into a wall outlet.

2. Plug the other end of the travel charger into the side of your phone (with the battery installed).

Charging when your phone is turned on:

The battery icon ⬚ appears on the display while charging. The battery icon turns to ⬚ when charging is complete.

Charging when your phone is turned off:

The battery icon ⬚ appears, and the message "BATTERY CHARGING-Power Off-" is shown on the display while charging. When the battery is completely discharged, you may wait for several minutes until the message is shown on the display. The battery icon turns to ⬚, and message changes to "CHARGING COMPLETE-Power Off-" when charging is complete.

Tip: Be sure to watch your phone's battery level indicator and charge the battery before it runs out of power.

Displaying Your Phone Number

1. Press 📱 to access the main menu.

2. Highlight **Contacts** and press 📱.

3. Highlight **My Phone#** and press 📱.

Note: To access the phone's main menu, press 📱 from standby mode. Menu items may be selected by highlighting them with the navigation key and pressing 📱, or you can press the number corresponding to the menu item on your keypad.

Making and Answering Calls

Making Calls

To place a call using your keypad:

1. Make sure your phone is on.

End-of-Call Options

To display the following options, press **Options** (right softkey) within 10 seconds after disconnecting a call.

To select an option, highlight it and press 😀.

▶ **Call Again** to dial the phone number.

▶ **Call:Speaker On** to dial the phone number in speakerphone mode.

▶ **Save Phone#** to save the phone number in your Contacts list. **Go to Phone Book** appears when the number is already in your Contacts list. (See "Saving a Phone Number" below.)

Note: The End-of-Call options are not displayed for calls identified as No ID or Restricted.

Saving a Phone Number

Your phone can store up to seven phone numbers in each of 300 Contact entries with up to 500 total numbers. Each entry's name can contain 16 characters. Your phone automatically sorts the Contacts entries alphabetically.

1. Enter a phone number.

2. Press **Options** (right softkey).

3. Highlight **Save Phone#** and press 😀.

4. Select a label by highlighting **Mobile**, **Home**, **Work**, **Pager**, **Fax**, **Other**, or **No Label** and press 😀.

5. Enter a Name and press 😀.
   Once you have stored an entry in Contacts list, you are prompted to select the following entry modes:

▶ **New Name** to enter a name directly.

▶ **From Ph. Book** to select a name from the Contacts entry list.

6. Press **Save** (left softkey).

Finding a Phone Number

You can search Contacts list entries for phone numbers that contain a specific string of numbers.

1. Enter the last four or more digits of the number and press Options (right softkey). The more numbers you enter, the more specific the search becomes.

2. Highlight **Find** and press 🔘. The Contacts entry that ends with the digits you entered appears.

3. Highlight your desired entry.
   Press 🔘 to display the entry details.
   Press **TALK** or **SPEAKER** to dial.

Dialing and Saving Phone Numbers With Pauses

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or credit card billing numbers.

There are two types of pauses available on your phone:

▶ **Hard Pause** sends the next set of numbers when you press **TALK**.

▶ **2-Sec. Pause** automatically sends the next set of numbers after two seconds.

Note: You can have multiple pauses in a phone number and combine 2-second and hard pauses.

1. Enter the phone number and press Options (right softkey).

2. Highlight either **Hard Pause** or **2-Sec. Pause** and press 🔘. Hard Pauses are displayed as a "H" and 2-second pauses as a "T".

3. Enter additional numbers.

4. To dial the number, press **TALK** or **SPEAKER**. (When dialing a number with a hard pause, press **TALK** to send the next set of numbers.)
   – or –
   To save the number in your Contacts list, press Options (right softkey), highlight **Save Phone#**, and press 🔘.

Dialing From the Contacts Directory

1. Press 🔘 to access the main menu.

2. Highlight **Contacts** and press 🔘.

3. Highlight **Find/Add Entry** and press 🔘.

Shortcut: Press the navigation key right to list entries.

4. Use your navigation key to scroll through the Contacts list and highlight one of the appropriate entries and press 🔘.

5. Highlight the number you wish to call.

6. Press **Options** (right softkey) for the menu options.

7. Highlight **Call** or **Call:Speaker On** and press 🔘.

Tip: You can also make a call by pressing 〔TALK〕, 〔SPEAKER〕, or **Call** (left softkey) during step 5 above.

Note: The icon next to each entry represent the Contacts labels (for example, Mobile, Home, Work, etc.). A triangle next to an icon means there is another number for the entry. Press the navigation key right or left to select the desired label/number.

Using One-Touch Speed Dialing

With this feature, you can dial Speed Dial entries using one key press for locations 2-9. (See page 63 for storing a Speed Dial number.)

To use speed dial for voice calls:

▶ From standby mode, press and hold the appropriate key for approximately two seconds.

– or –

From standby mode, press the appropriate key and press **TALK** or **SPEAKER**.

The display confirms that the number has been dialed when it shows "Connecting...".

To use speed dial for 10-4 calls:

▶ From standby mode, press the appropriate key then press **▥**. (See "Setting Speed Dialing for 10-4 Entries" on page 107.)

The display confirms that the number has been dialed when it shows "10-4 calling...".

Selecting a Character Input Mode

Your phone provides convenient ways to enter words, letters, punctuation, and numbers whenever you are prompted to enter text (for example, when adding a Contacts entry or when sending Email messages).

1. When you display a screen where you can enter text, press Mode (right softkey).

2. Select a character input mode, highlight it and press .

▶ **Add Word** to store words that you use frequently.

▶ **Canned Messages** to enter canned messages. (For Text Message only.)

▶ **Recent Messages** to enter messages you have used recently. (For Text Message only.)

▶ **Signature** to enter your signature. (For Text Message only.)

▶ **T9 Word** to enter characters using T9 Text Input (see next page).

▶ **SYMBOL** to enter symbols.

▶ **NUMBER** to enter numbers.

▶ **PRESET SUFFIX** to enter a preset suffix.

▶ **SMILEYS** to enter smiley pictures.

▶ **Emoticons** to enter an emotion icon. (For Text Message only.)

▶ **Select Language** to select the language (English or French).

▶ **Erase All** to erase all text (if applicable).

▶ **Paste** to paste copied or cut text (if applicable).

▶ **Select Text** to select stored text for copying or cutting.

Entering Characters Using T9 Text Input

T9 Text Input lets you enter text in your phone by pressing keys just once per letter. (To select the **T9 Word** mode when entering text, see "Selecting a Character Input Mode" on the previous page.)

T9 Text Input analyses the letters you enter using an intuitive word database and creates a suitable word. (The word may change as you type.) To accept a word and insert a space, press 🔘.

If you make a mistake, press 🔘 to erase a single character. Press and hold 🔘 to delete a word.

Adding a Word to the T9 Database

If a word you want to enter does not display as an option when you are using T9 Text Input, you can add it to the database.

1. Press 🔘 to access the main menu.
2. Highlight **Settings** and press 🔘.
3. Highlight **Others** and press 🔘.
4. Highlight **Text Entry** and press 🔘.
5. Highlight **Add Word** and press 🔘.
6. Enter the word using multi-tap (Alphabet) text entry and press ⌷Save⌷ (left softkey).

Tip: To confirm the words you have added, select **My Words** and press 🔘 during step 5 above.

Entering Characters by Tapping the Keypad

To enter characters by tapping the keypad, select the **Alphabet** mode (see "Selecting a Character Input Mode" on page 22). Press the corresponding key until the desired character appears. By default, the first letter of a word is capitalized and following letters are lowercase.

Characters scroll in the following order:

Key	English Sequence	
	Upper Case	Lower Case
1	. , @ 1 ? ! ✱ # /	
2	A B C 2	a b c 2
3	D E F 3	d e f 3

2. Press `OK` (left softkey) to continue.

3. If you're sure you want to reset your phone, highlight **Yes** and press 🔘.

4. Roaming

Understanding Roaming

Recognizing Icons on the Display Screen

Your phone's display screen always lets you know when you're off the home network and whether your phone is operating in analog or digital mode. The following chart indicates what you'll see depending on where you're using your phone.

Network	Indicator
Digital Home	
Analog Home	🅰
Digital Roaming	🆁
	Digital Roam
Analog Roaming	🄷🅁
	Analog Roam

Roaming on Digital Networks

When you're roaming on digital networks, your call quality and security will be similar to the quality you receive when making calls on the home network. You may not be able to access certain features, such as Web.

Roaming on Analog Networks

When you roam on analog networks, you will experience a similar quality provided by other analog carriers today. Although some features, such as Web, will be unavailable, you can still make and receive calls. You will experience a few differences:

▶ You are more likely to experience cross-talk, fade-out, and dropped calls.

▶ Some features which are standard on the home network are unavailable.

▶ There are security and privacy risks (eavesdropping and cloning) that exist with conventional analog services today.

▶ Your battery needs recharging sooner when you use your phone for analog roaming.

Note: If you're on a call when you leave the home network and enter an area where roaming is available (whether digital or analog), your call is dropped. If your call is dropped in an area where you think service is available, turn your phone off and on again to reconnect to the home network.

Note: When using your phone in analog mode, the handset may feel warm. This behaviour is normal for analog operation.

Setting Your Phone's Roam Mode

Your phone allows you to control your ability to roam. By using the **Roaming** menu option, you can determine which signals your phone accepts.

Set Mode

Choose from four different settings on your dual band/tri mode phone to control your roaming experience:

1. Press 🔘 to access the main menu.

2. Highlight **Settings** and press 🔘.

3. Highlight **Roaming** and press 🔘.

4. To select an option, select it and press 🔘.

▶ **Automatic:** This setting seeks Service. When Service is unavailable, the phone searches for an alternate system.

▶ **Home Only:** This setting allows you to access the home network only and prevents roaming on other networks.

▶ **Digital Only:** This setting forces the phone to seek a digital roaming system.

▶ **Analog Only:** This setting forces the phone to seek an analog roaming system.

6. Managing Call History

Viewing History

You'll find the Call History feature very helpful. It is a list of the last 20 phone numbers (or Contacts entries) for each calls that you placed, accepted, or missed. Call History makes redialing a number fast and easy. It is continually updated as new numbers are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

1. Press 🔘 to access the main menu.

2. Highlight **Call History** and press 🔘.

3. Highlight **Outgoing**, **Incoming**, or **Missed** and press 🔘.

Tip: You can switch the Voice Call history to the 10-4 call history by pressing ⎡10-4⎤ (left softkey). To return to the Voice Call history, press ⎡Voice Call⎤ (left softkey).

Call History Options

For additional information and options on a particular call, highlight a Call History entry and press ⎡Options⎤ (right softkey).

▶ **Call** to dial the phone number.

▶ **Call:Speaker On** to dial the phone number in speakerphone mode.

▶ **Send Text** to send a text message. See page 112 for details.

2. Highlight **Settings** and press 🔘.

3. Highlight **10-4** and press 🔘.

4. Highlight **Enable/Disable** and press 🔘.

5. Select **Enable** and press 🔘. (The default setting is **Disable**.)

▶ **Enable:** Lets you make or receive 10-4 calls any time your phone is not in use.

▶ **Disable:** Disables your phone's 10-4 service; you will not be able to make or receive 10-4 calls or access your 10-4 contacts.

10-4 Call Alerts

There are several ways your Phone alerts you during 10-4 calls.

When you make or receive a 10-4 call:

▶ The phone beeps (depending on the Ringer Type).

▶ The backlight illuminates.

▶ The screen displays a 10-4 call message.

▶ The other party's 10-4 number and name (if available) are displayed.

▶ The screen displays who has the floor.

The status of a 10-4 call:

▶ The LED On indicates you or another contact have the floor.

▶ The LED Off indicates the floor is open. (You can take the floor and speak by pressing and holding 🔲.)

Displaying the 10-4 List

► From standby mode, press $\boxed{\text{10-4}}$ (left softkey) or the 10-4 button on the side of your phone ($\boxed{\text{IIIII}}$) to access the 10-4 List.

Tip: The first time you access the list, the 10-4 Help message will appear. Press $\boxed{\text{Yes}}$ (left softkey) and $\boxed{\text{Next}}$ (left softkey) to read a brief introduction of 10-4.

Selecting Contacts Lists

When your phone displays a 10-4 List, the left softkey is labeled **Go to**. To switch to another contacts list, press the left softkey, highlight your desired list, and press 🔘.

► **Company List/Company Groups** contain company-provided contacts (up to 200 entries). Your company list can only be created and modified by an authorized administrator on the 10-4 server. When the lists are empty, Company List/ Company Groups will not appear on the display. You cannot add, edit, or delete Company List items, but you can copy entries to your Personal List/Personal Groups.

► **Personal List/Personal Groups** contain your personal 10-4 contact names and numbers, separately or in groups. You can create and edit your own Personal List. Your phone can store a total of 200 entries (you may include up to five contacts per group).

► **Outgoing** shows the last 10 different 10-4 calls you placed.

► **Incoming** shows the last 10 different 10-4 calls you accepted.

► **Missed** shows the last 10 10-4 calls you missed.

Tip: You can also select **Enter 10-4#** from **Go to** option to enter a 10-4 number directly. See page 96 for details.

Note: The 🔘 icon next to the group name indicates a group.

Making a 10-4 Call (1-to-1 Call)

You can place a 1-to-1 10-4 call by entering a 10-4 number or by selecting a contact from the 10-4 List.

1. Press 10-4 (left softkey) or press ⬛⬛⬛ to access the 10-4 List.

2. Press Go to (left softkey), highlight the list from which you want to place a call (**Company List**, **Personal List**, **Outgoing**, **Incoming**, or **Missed**), and press ⓜ.

12. Service Features

Using Voicemail

All unanswered calls to your phone are automatically transferred to voicemail, even if your phone is in use or turned off.

Voicemail Notification

There are several ways your phone alerts you to new voicemail messages:

► By displaying a message on the screen.

► By playing the assigned ringer type.

► By blinking the LED.

► By displaying 🔲 at the top of your screen.

Displaying Voicemail Details

1. Press 🔘 to access the main menu.

2. Highlight **Messaging** and press 🔘.

3. Highlight **Voicemail** and press 🔘.

4. Highlight **Details** and press 🔘.

Retrieving Your Voicemail Messages

► Press and hold ◼️. (Your phone will dial your voicemail box.)

– or –

1. Press 🔘 to access the main menu.

2. Highlight **Messaging** and press 🔘.

3. Highlight **Voicemail** and press 🔘.

4. Highlight **Call Voicemail** and press 🔘.

Note: You are charged for airtime minutes when you are accessing your voicemail from your Phone.

Clearing the Message Icon

1. Press 🔘 to access the main menu.
2. Highlight **Messaging** and press 🔘.
3. Highlight **Voicemail** and press 🔘.
4. Highlight **Clear Count** and press 🔘.
5. Highlight **Yes** and press 🔘.

Editing Your Voicemail Number

To edit your voicemail number:

To reset your voicemail number:

1. Follow steps 1-4 above.
2. Press Options (right softkey).
3. Highlight **Reset Voicemail#** and press 🔘.
4. Highlight **Yes** and press 🔘.

Responding to Call Waiting

When you're on a call, Call Waiting alerts you to incoming calls by sounding beeps. Your phone's screen informs you that another call is coming in and displays the caller's phone number (if it is available and you are in digital mode).

To respond to an incoming call while you're on a call:

▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash** and press 🔘). This puts the first caller on hold and answers the second call.

To respond to an incoming call when Answer on Hold is activated:

▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash**, and press 🔘). (The Answer on Hold will be automatically deactivated. See page 13 for Answer on Hold.)

To switch back to the first caller:

▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash** and press 🔘) again.

Note: Call Waiting may not be available while roaming off the home network.

Making a Three-Way Call

With Three-Way Calling, you can talk to two people at the same time. When using this feature, the normal airtime rates will be charged for each of the two calls.

1. Enter a number you wish to call and press **TALK** or **SPEAKER**.

2. Once you have established the connection, press **TALK** (or press **Options** [right softkey], highlight **Three-Way Call** and press **MENU OK**) to put the first caller on hold.

3. Enter the second number you wish to call and press **TALK** (or press **Options** [right softkey], highlight **Call** or **Call:Speaker On** and press **MENU OK**).

4. When you're connected to the second party, press **TALK** again (or press **Options** [right softkey], highlight **Flash** and press **MENU OK**) to begin your three-way call.

If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all three callers are disconnected.

Web

With Web on your phone, you will be able to browse full-color graphic versions – not just text versions – of your favorite website, making it easier than ever to stay informed while on the go. Check sports scores, trade stocks, and shop all on your phone.

(A message appears confirming the data has been assigned.)

Note: Depending on the data, you can select where to assign the data: Image data: **Incoming Calls**, **Screen Saver**, or **Phone Book**. Animation data: **Standby**, **Outgoing Calls**, or **Service Search**.

Note: You may assign a Screen Saver to more than one task.

To assign a downloaded Screen Saver through the Settings menu, see "Changing the Display Screen" on page 32, "Changing the Display for Incoming Calls" on page 32, "Changing the Screen Saver" on page 34 or "Selecting a Ringer/Image Type for an Entry" on page 65.

13. Safety Guidelines

Maintaining Your Phone's Peak Performance

▶ Try not to hold, bend, or twist the phone's antenna.

▶ Don't use the phone if the antenna is damaged.

▶ Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, turn the power off and immediately remove the battery.

Using Your Phone While Driving

Talking on your phone while driving (or operating the phone without a hands-free device) is prohibited in some jurisdictions. Laws vary as to specific restrictions.

▶ Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.

▶ Do not take notes or look up phone numbers while driving.

Following Safety Guidelines

To operate your phone safely and efficiently, always follow any special regulations in a given area. Turn your phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radiofrequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment.

RF signals may affect improperly installed or inadequately shielded electronic operating systems and/or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external RF signals. Also check with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical devices, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

Note: Always turn off the phone in health care facilities and request permission before using the phone near medical equipment.

Turning Off Your Phone Before Flying

Turn off your phone or set your phone to Airplane mode before boarding any aircraft. To prevent possible interference with aircraft systems, Transport Canada regulations require you to have permission from a crew member to use your phone while the plane is on the ground.

Turning Off Your Phone in Dangerous Areas

To avoid interfering with blasting operations, turn your phone off when in a blasting area or in other areas with signs indicating two-way radios should be turned off. Construction crews often use remote-control RF devices to set off explosives.

Turn your phone off when you're in any area that has a potentially explosive atmosphere. Although it's rare, your phone and accessories could generate sparks. Sparks can cause an explosion or fire, resulting in bodily injury or even death. These areas are often, but not always, clearly marked. They include:

▶ Any area where it is very humid and with inflammables.

▶ Fueling areas such as gas stations.

▶ Below deck on boats.

▶ Fuel or chemical transfer or storage facilities.

▶ Areas where the air contains chemicals or particles such as grain, dust, or metal powders.

▶ Any other area where you would normally be advised to turn off your vehicle's engine.

Note: Never transport or store flammable gas, liquid or explosives in the compartment of your vehicle that contains your phone or accessories.

Restricting Children's Access to Your Phone

Your phone is not a toy. Do not allow children to play with it as they could hurt themselves and others, damage the phone or make calls that increase your telephone bill.

Protecting Your Battery

The guidelines listed below help you get the most out of your battery's performance.

▶ Use only approved batteries, AC adapters, and chargers. These chargers are designed to maximize battery life. Using other batteries or chargers voids your warranty and may cause damage.

▶ In order to avoid damage, charge the battery only in temperatures that range from 0º C to 45º C (32º F to 113º F).

▶ Don't store the battery in a high humidity environment.

▶ Don't use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.

▶ Never dispose of the battery by incineration.

▶ Keep the metal contacts on top of the battery clean.

▶ Don't attempt to disassemble or short-circuit the battery.

▶ Don't store the battery in high temperature areas for long periods of time. It's best to follow these storage rules:

> Less than one month:
> -20º C to 60º C (-4º F to 140º F)

> More than one month:
> -20º C to 45º C (-4º F to 113º F)

Disposal of Lithium Ion (Li-Ion) Batteries

For safe disposal options of your Li-Ion batteries, please ensure that disposal of this in accordance with law and regulation.

▶ Do not dispose of the battery in fire; the cell may explode.

▶ Do not open or puncture the battery; the released electrolyte is corrosive and may cause damage to the eyes and skin.

Special Note: Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.

Note: For safety, do not handle a damaged or leaking Li-Ion battery.

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.
