

## HOW TO UPGRADE THE RECEIVER SOFTWARE

From time to time, Bell ExpressVu may make free receiver software upgrades available. The receiver can get such upgrades via the satellite signal.

- You *must* turn the receiver off for it to get a software upgrade.
- You can set up the receiver to tell you when a software upgrade is available and ask you for permission to get the software. Or, you can let the receiver get new software without telling you.

Do following:

### Remote Buttons

### Menu Options

1. Press the <b>Menu</b> button.		
2. Select the <b>System Setup</b> option.		
3. Select the <b>Installation</b> option.		
4. Select the <b>System Upgrades</b> option.		
5. Select the <b>Ask before downloading</b> option or the <b>Without my permission</b> option.		 
6. Select the <b>Save</b> option to save your choice. Remember, you <i>must</i> turn the receiver off for it to get new software.
