

WATCHING ONE PROGRAM WHILE RECORDING ANOTHER

SINGLE MODE

While in **Single Mode**, you can set up the satellite receiver to record programs while you're also watching one you've already recorded.

Remote Buttons

Menu Options

1. Press the front panel Mode button to make sure the receiver is in **Single Mode**. The front panel of the receiver has an indicator that is marked **Single**.

Note: If someone is using the TV2 outputs, you will see the following popup on the nearby TV warning you that you are about to disrupt the use of the TV2 outputs:

2. Press Guide to open the **Program Guide**. Find a program you want to watch now.

GUIDE

3. Press select to watch that program.

4. Press the Record button. A message will display asking whether you want to record the remainder of the program. Select **OK** to begin recording now.

5. Press Guide on the remote. Use the **Program Guide** to find a program that you want to watch now. Select that program. You are now watching one program while recording another.

- Press Record and select **OK** when the popup displays. You are now recording two programs at the same time.
- Press PVR on the remote control. The **PVR Event** screen will open. You should see the two programs that are recording indicated by the red dot next to the listings.

- Select a program that you recorded earlier (one that is not recording now), then select **Start Over**.
- You should now be watching a pre-recorded program while the receiver is recording the other two events (programs).

DUAL MODE WITH RECORD PLUS

Another feature that adds flexibility to the way you watch TV is **Record Plus**. When **Record Plus** is enabled, you can decide which receiver output (**TV1** or **TV2**) will record your events. This feature is available in **Dual Mode** only.

ENABLING RECORD PLUS

The following instructions describe how to enable **Record Plus**:

Remote Buttons

Menu Options

- Press Menu-8-6 to open the **Record Plus** screen.
- Highlight the **Activation** option.
- Use the Up or Down Arrow button to set the **Activation** option to **Enable**.
- Highlight the **Record Preference**.
- Use the Up or Down Arrow button to set the **Record Preference** option to **TV2** (or **TV1**).

Using The System

Watching One Program While Recording Another

3

DUAL MODE WITHOUT RECORD PLUS

While in **Dual Mode**, you can set up the satellite receiver to record from TV1 and TV2 at the same time.

Remote Buttons

Menu Options

1. Press Guide to open the **Program Guide**.
Find a program you want to watch now.

GUIDE

2. Press select to watch that program.

3. Press the Record button. A message will display asking whether you want to record the remainder of the program. Select **OK** to begin recording now.

RECORD

4. Press PVR on the remote control. The **PVR Event** screen will open. You should see the program that is recording indicated by the red dot next to the listings.

5. Select a program that you recorded earlier (one that is not recording now), then select **Start Over**.
6. You should now be watching a pre-recorded program while the receiver is recording the other events (programs).

SETTING UP AN AUTOMATIC TIMER WITH RECORD PLUS

Remote Buttons

Menu Options

1. Select a future program using the **Browse Banner, Themes** menu or the **Program Guide**.

2. Select a **Timer Frequency** option.
Notice that a mark displays in the box.
3. Select a **Timer Type**.
4. Select the **Create Timer** option to save the event timer.
5. The **Program Guide** displays which satellite receiver output is scheduled to record the event. When **Record Plus** is enabled, the satellite receiver automatically selects the output you chose when you set up **Record Plus**.
