End user notice

Microsoft® Voice Command Version 1.5 for Windows Mobile®

IMPORTANT Do not become distracted from driving safely if operating a motor vehicle while using Device Software.

Operating certain parts of this Device requires user attention. Diverting attention away from the road while driving can possibly cause an accident or other serious consequences. Even occasional, short diversions of attention can be dangerous if your attention is diverted away from your driving task at a critical time. Do not change system settings or enter data non-verbally (using your hands) while driving. Stop the vehicle in a safe and legal manner before attempting these operations. This is important since while setting up or changing some functions you might be required to distract your attention away from the road and remove your hands from the wheel.

Microsoft makes no representations, warranties or other determinations that ANY use of the Software Product is legal, safe, or in any manner recommended or intended while driving or otherwise operating a motor vehicle.

General Operation

Voice Command Control: Many of the functions of the Device Software can be accomplished using only voice commands. Using voice commands while driving allows you to initiate the command with a button and then operate the Device mostly without removing your hands from the wheel. **Note:** Voice Command not available in all locations.

Prolonged Views of Screen: If you are driving, do not access any function requiring a prolonged view of the screen. Pull over in a safe and legal manner before attempting to access a function of the system requiring prolonged attention. Even occasional short scans to the screen may be hazardous if your attention has been diverted away from your driving task at a critical time.

Volume Setting: Do not raise the volume excessively. Keep the volume at a level where you can still hear outside traffic and

emergency signals while driving. Driving while unable to hear these sounds could cause an accident.

Let Your Judgment Prevail: The Device Software is only an aid. Make your driving decisions based on your observations of local conditions and existing traffic regulations. The Device Software is not a substitute for your personal judgment.

Use of Speech Recognition Functions: Speech recognition software is inherently a statistical process which is subject to errors. It is your responsibility to monitor the speech recognition functions and address any errors.

Welcome

Congratulations on the purchase of your Palm® Treo™ 700wx smartphone. In one compact and indispensable device, you now have all of the following:

- An advanced wireless smartphone
- A Windows Mobile® organizer with portable memory card expansion capability (MultiMediaCard/SD/SDIO)
- High-speed web browsing with support for CDMA 1xRTT and EVDO wireless technologies.
- A 1.3-megapixel digital camera
- Email
- Text messaging
- A media player
- Microsoft Office Mobile suite

This guide helps you set up your Treo 700wx smartphone and quickly learn to use it.

NOTE Web, email, and text messaging services require a service contract and high-speed data service from your wireless

provider. Data speeds vary based on network availability and capacity.

What's in the box?

You should have received all of the following items in the Treo 700wx smartphone box:

Hardware

- Treo 700wx smartphone
- Rechargeable battery
- AC charger
- USB sync cable
- Headset

Documentation and software

- Read This First setup poster
- Treo 700wx Smartphone Quick Reference Guide
- Getting Started CD that includes the following:
 - Using Your Palm Treo 700wx Smartphone (this guide)
 - Microsoft® Office Outlook® 2002

- ActiveSync® desktop synchronization software
- Additional software for your smartphone
- Palm warranty

What you need to use your smartphone

As you work through the instructions in this guide, you need all the items that came in the Treo 700wx smartphone box (see

What's in the box?) as well as the following:

- An activated account from your wireless provider
- A location with wireless coverage for your smartphone
- An electrical outlet
- A computer you want to synchronize your personal information with

NOTE To use email or web browsing, your wireless provider service plan must include data services.

Setting up your smartphone and computer

Congratulations on the purchase of your new Palm® Treo™ 700wx smartphone. You're about to discover the many things about your smartphone that will help you better manage your life and have fun, too.

As you become more familiar with your smartphone, you'll want to personalize the settings and add applications to make it uniquely yours. But first, take these few easy steps to set up your smartphone and get it running.

Benefits

- Know where your smartphone controls are located
- Start using your smartphone right away

Palm® Treo™ 700wx smartphone overview

Top view

DID YOU KNOW? The ringer switch silences all sounds, including music, when you need quiet. There is no need to navigate menus.

5

Front view

TIP Be careful not to scratch or crush your smartphone screen. Do not store it in a place where other items might damage it. Visit www.palm.com to find a variety of useful accessories, including carrying cases that protect the screen.

Back view

IMPORTANT The Palm® Treo™ 700wx smartphone speaker includes a large magnet, so be sure to keep your smartphone away from credit cards or other items that could be demagnetized.

Installing the battery

- 1 Use one hand to press the **battery door release**, and use the other hand to slide the **battery door** downward to remove it from your smartphone.
- 2 Align the battery contacts with the phone contacts inside the battery compartment.
- 3 Insert the battery into the compartment at a 45-degree angle, and then press it into place.
- 4 Slide the battery door onto the back of the smartphone until it clicks into place. Your smartphone screen turns on and the Treo screen appears. Wait for the progress bar on the Treo screen to fill and the Windows Mobile® screen to appear.
- **5** Follow the onscreen instructions to finish the installation.

TIP If your smartphone does not turn on after you insert the battery, you need to charge it by connecting it to the AC charger. If it still doesn't start, do a soft reset. See Performing a soft reset.

TIP You can buy an extra battery as a spare for long plane trips or periods of heavy data use. Be sure to use batteries from Palm only.

Charging the battery

Before using your Palm® Treo™ 700wx smartphone, you need to charge the battery. See <u>Battery life</u> for tips on maximizing the life of your smartphone's battery.

IMPORTANT Charge the battery for 3.5 hours, or until the indicator light is solid green.

1 Plug the AC charger into a wall outlet. If necessary, connect an adapter.

2 With the arrow on the connector facing up (toward your smartphone screen), connect the charger cable to the bottom of your smartphone.

- **3** Check the indicator light to confirm that your smartphone is charging.
 - Solid red indicates that your smartphone is charging.
 - Solid green indicates that your smartphone is fully charged.

DID YOU KNOW? If your battery ever becomes fully drained, your info is stored safely on your smartphone until you recharge the battery or connect your smartphone to a power source.

TIP You can charge your smartphone using your USB cable. The USB cable must be directly connected to your computer or to an externally powered (not buspowered) USB hub.

Battery icon

When your smartphone display is on (see Waking up the screen and turning it off), the onscreen battery icon displays the charging status:

A solid lightning bolt indicates that the battery is connected to a wall outlet and is charging.

A shaded lightning bolt indicates that the battery is connected to a wall outlet and is fully charged.

A partial battery without a lightning bolt indicates that the battery is not connected to a wall outlet and that it has some power.

An exclamation point (!) indicates that the battery needs to be charged immediately.

DID YOU KNOW? Battery consumption varies based on personal usage. Consumption factors include signal strength, display brightness, speakerphone usage, and the type of calls you make (data or voice).

TIP If the indicator light does not turn on when you connect your smartphone to the AC charger, double-check the cable connection and the electrical outlet to which it is connected.

DID YOU KNOW? Tapping the **Battery** icon opens a window showing a percentage level of charge left in the battery.

Turning your smartphone on/off

The phone and the screen of your Palm Treo 700wx smartphone can be turned off and on separately. This means you can wake up the screen to use just the organizer features of your device without turning on the phone. Also, when the screen is turned off, the phone can be on and ready for you to receive and make calls.

Turning your phone on and off

When you turn on your phone, it connects to a wireless network so that you can make and receive phone calls and use other wireless services.

- 1 If you are not on a call and your screen is off, briefly press **Power/End** to wake up the screen.
- 2 Press Center on the 5-way to turn off Keyguard.
- 3 Press and hold Power/End to turn on your phone. When your smartphone locates a signal, the name of your

wireless provider and the **signal-strength** icon appear at the top of the screen, indicating that you can use the phone and Internet features (if supported by the local network).

4 Press and hold **Power/End** again to turn off your phone. When your phone is off, "Phone Off" and the **phone-off** xicon appear at the top of the screen. Your smartphone is not connected to any wireless network, but you can still use the organizer and other features.

DID YOU KNOW? The indicator light flashes green when your phone is on and you're inside a coverage area. If you're outside a coverage area, the indicator light flashes amber and no bars appear in the signal-strength icon.

TIP If **Sound Mode** is on, you hear a series of tones when you turn your phone on and off. For more info on Sound Mode see <u>Setting the ringer switch</u>.

Waking up the screen and turning it off

Wake up the screen and leave the phone turned off when you want to use only the organizer features of your smartphone, for example, when you're on a plane and want

to look at your calendar. You can also turn off your smartphone's screen without turning off your smartphone's wireless features.

- 1 Press **Power/End** to wake up the screen, and then press **Center** to turn off **Keyguard**.
- 2 Briefly press **Power/End** to turn off the screen.

TIP You can set how long the screen stays on during a period of inactivity. Press **Start**, select **Settings**, select the **System** tab, and then select **Power**. Select the **Advanced** tab, and then adjust the **On battery power** setting.

Making your first call

The battery comes with a sufficient charge to complete the setup process and activate your Palm Treo 700wx smartphone. After activation, we recommend charging your smartphone for 3.5 hours (or until the indicator light is solid green) to give it a full charge.

- 1 Turn on your phone (see <u>Turning your</u> phone on and off).
- 2 If you do not see your Today screen, press **Phone/Send C**.

- 3 If No Service appears in the upper left or if you are unable to complete a call, you may need to activate your phone. Contact your wireless provider for assistance.
- 4 If the name of your wireless provider appears in the upper left, use the number pad on the keyboard to enter the number you want to call.

- **5** Press **Phone/Send (** to dial.
- **6** When your call is complete, press **Power/End 9** to end the call.

TIP The Dial Lookup list might appear while you are dialing a number. Continue entering numbers to place the call. For more info on the Dial Lookup list, see <u>Dialing by contact name</u>.

Adjusting the call volume

While a call is in progress, press the **Volume** button on the side of your smartphone to adjust the call volume.

What's my number?

- **1** Make sure your phone is on (see <u>Turning your phone on and off</u>).
- 2 If you do not see your Today screen, press **Phone/Send** .
- **3** Press **Menu** (right action key).
- 4 Select Preferences > Phone Settings.

- **5** On the **Phone** tab, look for your phone number below the title bar.
- 6 Press OK .

TIP If your phone number doesn't appear on the Phone Settings screen, press **OK**, and then turn your phone off and back on again. Repeat steps 2–6. If your phone number still doesn't appear, your phone has not been activated. Turn your phone off, wait a few hours, and then repeat these steps. If your phone number still does not appear, please contact your wireless provider for assistance.

Synchronization—the Basics

You can enter or change information on your smartphone or in Microsoft Office Outlook on your computer, and then synchronize to automatically update the info in both places; there is no need to enter the info twice. We strongly recommend that you synchronize your smartphone and your computer frequently to keep your information up-to-date (and backed up) in both locations.

Before you can synchronize, you need to install the desktop synchronization software and connect the sync cable to your computer. Even if have you have already installed a previous version of the ActiveSync® software, you must install the software that came with your smartphone on the *Getting Started CD*.

TIP You can also synchronize your smartphone with a Microsoft Exchange Server using Microsoft Office Outlook. See <u>Setting up an Exchange Server email account</u>.

TIP If you want to synchronize with a personal information manager (PIM) other than Microsoft Office Outlook, you must install a third-party solution. Contact the third party or vendor to learn whether software is available for your Treo 700wx smartphone.

System requirements

Your computer should meet the following minimum system requirements:

- Windows 2000 or XP (later versions may also be supported)
- 32MB of available memory (RAM)
- 170MB of free hard disk space
- CD drive
- Available USB port
- USB sync cable (included with your Palm Treo 700wx smartphone)

Installing the desktop synchronization software

BEFORE YOU BEGIN Check the following:

- You must have Windows Media Player
 10 or later installed on your computer.
- If you are installing on a computer at work, make sure your company allows you to install new software. Contact your company's IT department for help.
- 1 Close any applications that are currently running on your computer, including those running in the background. Your computer needs to have all its resources available to install the software.
- 2 Insert the *Getting Started CD* into the CD drive on your computer.
- 3 Follow the onscreen instructions during the installation. The Install program prompts you to synchronize for the first time. See Synchronizing contacts and other info for more info on synchronization.

TIP Need additional help installing the desktop software? See <u>Trouble installing the desktop</u> software?.

Connecting your smartphone to your computer

NOTE If you're switching from a previous Windows Mobile device or from a Palm OS® device, you can learn more about how to move content, such as pictures, music, and files, to your smartphone by going to www.palm.com/support.

- 1 Plug the AC charger into a wall outlet. If necessary, connect an adapter.
- 2 Plug the USB sync cable into an available USB port or into a powered USB hub on your computer.
- **3** With the USB cable on the left, connect the sync cable to the bottom of your smartphone.
- **4** Connect the charger cable to the connector on the sync cable.

TIP For best performance, plug your sync cable directly into a USB port on your computer. If your computer has USB ports on both the front and back, we suggest using the back port. If you use a USB hub, make sure it is a powered hub.

17

Moving around on your smartphone

Have you ever been to a new city and felt a bit lost until you figured out the streets? Learning to move around on your smartphone is similar. Most applications that work on your smartphone use the same set of controls. So once you learn how to use these controls, you'll be driving all over town and you won't even need a map.

Benefits

- Quickly move around and complete tasks in applications using one thumb on the 5-way navigator
- Access extra features with menus
- Find and open applications quickly.

In this chapter

Moving around the screen	21
Using the keyboard	28
Opening and closing applications	32
Using your Today screen	33
Synchronizing contacts and other info	34
Battery life	35
Where to learn more	37

Moving around the screen

To move around the Palm® Treo™ 700wx smartphone screen, you can use the 5-way navigator or you can tap items on the touch

screen with the stylus. As you become familiar with your smartphone, you'll find your own favorite way to scroll, highlight, and select items.

The 5-way includes the Right ▶, Left ◀, Up ▲, Down ▼, and Center ◯ buttons.

- TIP Some third-party applications may not work with the 5-way navigator, therefore you may be required to use your stylus instead.
- **DID YOU KNOW?** Custom navigation features are available when you browse the web using Internet Explorer. See <u>Viewing a web page</u>.
- TIP The arrow icons that indicate directions on the 5-way are different from the onscreen scroll arrows and the arrows that indicate that a list is available (see <u>Selecting options in a list</u>).

Scrolling through screens

As on a computer, on your smartphone you scroll to move from field to field or page to page, or in some cases to highlight an item or option in a list. There are several methods of scrolling:

- Press the 5-way on the front of your smartphone. Press Right ▶, Left ◄,
 Up ▲, or Down ▼ to move to the next field, button, or action in that direction.
- Press and hold Option while pressing Up or Down to scroll one screen at a time. These keys work just like the Page Up and Page Down keys on your computer keyboard.

- When viewing a screen with tabs, such as when adding a contact, press
 Down ▼ to scroll to the tabs, and then press Left ◀ or Right ▶ to move between tabs.

When inside a text field, press Right
 or Left
 deft to move to the next character,
 and press Up
 or Down ▼ to move
 between lines.

- When inside a list, press and hold
 Up ▲ or Down ▼ to rapidly scroll through the list.
- Tap an onscreen scroll arrow.
- Tap and drag the slider of an onscreen scroll bar.

Closing screens

To accept the information you entered on a screen and to return to the previous screen, do one of the following:

- Press **OK** 🐵.
- Use the stylus to tap ok or X in the upper-right corner of the screen.

NOTE When you close a screen, the application still runs in memory. See Viewing memory usage for instructions about viewing the amount of memory in use versus the available memory. See The applications are running slower than usual for instructions about closing applications and freeing up memory.

Highlighting and selecting items

On most screens, one item—a button, a list entry, or a check box—is highlighted by default. The highlight identifies which item is affected by your next action. Use the **5-way** to move the highlight from one item to another before opening or selecting it.

The highlight can take one of two forms, depending on what is highlighted:

 Border glow: This rectangular border highlights items such as an onscreen button (such as OK, Dismiss, or Hide), a check box, an option, or a web link.

Stop

 Reverse type (light text on a dark background): This highlights items such as a phone number, an email address, text, or an item in a list.

After highlighting an item with the **5-way**, you can select or activate it by pressing **Center** or by tapping the item with the stylus.

TIP The best way to learn to use the 5-way is to experiment. Press the 5-way buttons and as you do, follow the movement of the border glow around the screen. The behavior of the 5-way varies slightly in each application.

Highlighting text

You can use the stylus to highlight text on the screen:

 Tap and drag the stylus across the text you want to highlight. To highlight a word, double-tap it. To highlight a paragraph, triple-tap it.

Using the action keys

The left and right action keys give you quick access to tasks that you can do on the current screen, so the action key items vary from application to application and from screen to screen. Look on the screen directly above the action key to see the action that it does in the current context. In some contexts, these keys may do nothing at all. In most cases the right action key opens the menu, and the left action key activates a specific command, such as New or Edit. Remember that action key functions vary from screen to screen, so be sure to check the onscreen label before pressing an action key.

Selecting menu items

In many applications, a menu provides access to additional features. The menu is hidden until you press **Menu** (right action key). To get the most out of your smartphone, it's a good idea to familiarize yourself with the additional features available through the menu in various applications.

1 Press **Menu** (right action key) to display an application's menu.

2 Press Up ▲ or Down ▼ to highlight a menu item.

- 3 If an arrow appears next to a menu item, press Center or Right to display additional options for that item, and then press Up or Down to highlight a menu item. To return to the main menu without making a selection, press Left .
- 4 Press **Center** → to select the menu item, or press **Left** ◀ or **Menu** ← (right action key) to close the menu and cancel your selection.

DID YOU KNOW? You can use keyboard shortcuts to select most menu items. To quickly access a menu item, press **Menu** (right action key) followed by the underlined letter in the menu item's name.

Selecting options in a shortcut menu

Most applications also provide access to context-sensitive, shortcut menus—similar to the right-click menus on a computer. The shortcut menu options vary based on the highlighted selection.

1 Highlight the item you want to open the shortcut menu for.

- **2** Press and hold **Center** to open the shortcut menu.
- 3 Press Up ▲ or Down ▼ to highlight a menu item.

TIP You can also tap and hold an item with the stylus to open the shortcut menu.

Selecting options in a list

Lists let you select from a range of options. You can identify whether a list is available when you select the field. If a rectangle appears around the field along with a downward-pointing arrow, a list is available. Lists are different from the menus described earlier in this section.

To select from a list, do any of the following:

- Use the 5-way to highlight the field, and then press Center to display the items in the list. Press Up or Down to highlight the item you want, and then press Center to make your selection.
- Use your stylus to tap the arrow, and then tap the item in the list.
- To exit the list and cancel your selection, press Left ◀.

TIP When selecting fields you might not see the downward-pointing arrow until you press **Center** on the 5-way.

DID YOU KNOW? In fields where you see a downward-pointing arrow but no rectangle, you must tap the arrow with the stylus to expand the field.

Using the keyboard

TIP When using the keyboard, most people find it easiest to hold the smartphone with two hands and to use the tips of both thumbs to press the keys.

Understanding the keyboard backlight

Your smartphone includes a keyboard backlight for low light conditions. The keyboard backlight is activated automatically when the screen turns on. The backlight turns off automatically when the screen turns off or when you are on a call or playing music in the background for longer than the time specified in Backlight Settings. You can set different time intervals depending on whether the smartphone is operating on battery power or is connected to an external power source. The backlight also turns off when an application's power-saving features turn it off.

TIP You can change the backlight shut-off interval. Press **Start** and select **Settings**. Select the **System** tab, and then select **Backlight**. Set the time interval on the **Battery Power** tab and on the **External Power** tab.

DID YOU KNOW? The keyboard backlight dims in parallel to the screen backlight.

Entering lowercase and uppercase letters

By default, the first letter of each sentence or field is capitalized and the remaining text you enter is lowercase. To enter other uppercase letters, do one of the following:

- Press Shift , and then enter a letter.
 You don't need to press and hold Shift while entering a letter.
- Press Shift twice to turn on Caps Lock, and then enter a series of letters. When Caps Lock is on, this symbol appears at the bottom of the screen: To turn off Caps Lock, press Shift again.

TIP You can turn off the first letter capitalization setting. For details see <u>Setting input options</u>.

Entering numbers, punctuation, and symbols

Numbers, punctuation, and symbols appear above the letters on the keys. To enter these characters, do one of the following:

- Press Option , and then press the key of the desired character. You don't need to hold Option while pressing the key.
- Press Option twice to turn on Option Lock, and then press the desired keys to enter a series of characters. When Option Lock is on, this symbol appears at the bottom of the screen: To turn off Option Lock, press Option again.

Entering other symbols and accented characters

You can enter symbols and accented characters that don't appear on the keys using the alternate characters list.

- 1 Press **Alt** (a) to display the alternate character list.
- 2 Narrow the list by pressing the key that corresponds to the character you want. For example, to enter an é, press **E**. See Symbols and Accented Characters.
- 3 Press Up ▲ or Down ▼ to highlight the desired character.
- **4** Press **Center** to insert the character.

TIP The alternate characters are grouped according to their similarity to the corresponding key. For example, the alternate characters available for the e key are é, è, ë, and ê. If you press the wrong key, press **Backspace** to return to the full list of alternate characters. You can then press another key.

DID YOU KNOW? If you don't know which key to press to narrow the list when entering a symbol, you can scroll through the full list until you find the character you want.

Opening and closing applications

Opening applications

You can access all the applications on your smartphone through the Start menu:

1 Press **Start** to open the **Start** menu.

- 2 Use the 5-way navigator to highlight the application you want to use. To view additional applications, select Programs.
- **3** Press **Center** to open the highlighted application.

4 (Optional) Press **OK** (a) to return to **Programs** and open another application. The current application continues to run in the background.

TIP With the **Start** menu open, you can press the letter underlined in the application's name to open the app. For example, press **H** to open **Help**. You can also select the shortcut icons at the top of the **Start** menu to open recently used applications.

Option and then pressing Phone/Send, Start, or OK. You can customize the apps assigned to these button combinations; see Reassigning buttons for details.

Closing applications

You can have several applications open at once, so you don't need to exit an application to open another one. In most cases, applications close automatically when available memory is low, but you can also close applications manually.

1 Press and hold **OK** (a) to open **Memory Settings**.

- 2 On the **Running Programs tab**, do one of the following:
 - Select the application you want to close, and then select **Stop** to close it.
 - Select Stop All to close all your open applications.

NOTE If you press **OK** (a) to return to Programs, the current application continues to run in the background.

TIP You can also open Memory Settings from the Start menu. Press **Start**, select **Settings**, select the **System** tab, and then select **Memory**.

Using your Today screen

Your Today screen is your home base. From your Today screen you can quickly look up a contact, dial a phone number or speed dial button, see your latest calendar appointments, see the number of unread email messages, and even search the web.

To access your Today screen, press **Phone/Send C**.

TIP You can select a picture for your Today screen background and select which items appear on the Today screen. See <u>Today screen</u> settings for details.

- **Title bar and status info:** See What are all those icons? to learn about the icons that appear in this area.
- **Dial Lookup field:** Begin typing the name you want to look up. See <u>Dialing</u> by contact name for more info.
- Web Search field: Enter a word you want to find on the Internet, and press
 Center to begin the search (data services connection required).
- Speed dial entries: Select the speed dial you want to dial. This can be a text button or a picture speed dial. See <u>Defining speed dial buttons</u> to create your own.

Synchronizing contacts and other info

Each time you connect your smartphone to your computer, it automatically synchronizes the items that are set to sync. You can synchronize using a cable or you can sync wirelessly. See <u>Synchronizing</u>

over a Bluetooth connection and Synchronizing over an infrared connection for more information about synchronizing wirelessly.

To use ActiveSync, you must first install the software from the *Getting Started CD* that came with your smartphone. See <u>Installing the desktop synchronization software</u> for instructions.

If you want to use Direct Push Technology, make sure you are accessing an Exchange Server 2003 upgraded to Service Pack 2. See Setting up an Exchange Server email account.

You can customize the sync settings (see <u>Setting synchronization options</u>) or use the default settings to synchronize your info in the following applications:

1 Connect your smartphone to your computer. You should hear the ActiveSync® tone.

- 2 Look for the ActiveSync + icon at the top of your smartphone's screen and the ActiveSync icon in the taskbar on your computer.
 - If you don't see the ActiveSync icon, make sure the desktop synchronization software that came with your smartphone is running on your computer.
 - If you have any problems synchronizing, see <u>Synchronization</u> (<u>ActiveSync[®] software</u>) for troubleshooting suggestions.

TIP We recommend that you install a backup and restore application. A backup and restore application preserves your data and settings if your smartphone is ever lost or stolen, and it protects your data during a hard reset. See www.palm.com/treo700wx-support for more information.

Battery life

BEFORE YOU BEGIN The battery comes with a sufficient charge to complete the setup process and activate your phone. After activation, we recommend charging your smartphone for 3.5 hours (or until the indicator light is solid green) to give it a full charge.

Battery life depends on individual usage. When used as a smartphone, your smartphone battery provides up to 4.7 hours of talk time or up to 15 days of standby time.

TIP If the battery is fully drained, it may take a few moments for the indicator light to turn on while charging.

Maximizing battery life

You can increase your smartphone's battery life by following a few easy guidelines. Remember that battery life depends on how you use your smartphone.

- Charge your smartphone whenever you're at your desk, or charge it overnight each day. The battery in your smartphone has a much longer useful life when it is topped off frequently, versus charging it after it is fully drained.
- If you spend a lot of time using the camera, games, media players, eBooks, or other applications, keep an eye on the battery icon and charge when necessary.
- Your smartphone's wireless features (phone, email, messaging, and web) generally consume more power than the organizer features. If you don't plan to use the wireless features on your smartphone for a while, turn off your wireless services (see <u>Turning Wireless</u> <u>Services On/Off</u>). You can forward calls to a different number or let all calls be picked up by voicemail (see <u>Forwarding</u> <u>calls</u>). To see if your wireless services

- are on, tap the **phone-off** $\mathbf{Y}_{\mathbf{X}}$ icon, and then select **Wireless Manager**.
- Turn off your smartphone's Bluetooth® wireless technology feature when you do not need to make a Bluetooth connection.
- As with any wireless phone, if you are in an area with no wireless coverage, your smartphone searches for a signal, which consumes power. If you cannot move to an area of better coverage, temporarily turn off your phone (see <u>Turning your</u> <u>phone on and off</u>).
- Turn down the screen brightness (see Adjusting the brightness).
- Set your screen to turn off automatically after a shorter period of inactivity (see <u>Viewing and optimizing power settings</u>).
- Keep your battery away from direct sunlight and other sources of heat.
 Temperatures over 120 degrees
 Farenheit (50 degrees Celsius) can permanently reduce the capacity and life span of any lithium-ion battery.

 If you are using Direct Push technology (MSFP) for email, set your device to sync every 30 minutes or more. Email synchronization can quickly consume battery power.

DID YOU KNOW? If the battery drains to the point where your smartphone doesn't turn on, your smartphone stores your info safely until you recharge the battery. To avoid draining the battery, we recommend that you charge and synchronize every day, especially if you use your smartphone often.

Where to learn more

For a quick introduction

Quick Tour: The Quick Tour highlights many of your smartphone's features. It is already installed on your smartphone, and you can open it at any time. Press Start , select Programs, and then select Quick Tour .

While using your smartphone

• **Help:** Many of the built-in applications include on-device **Help**, so that you can

- learn about the tasks you can perform in that application. To access **Help**, go to the application or screen you want help with, press **Start** (2), and select **Help**.
- Online support from Palm: For up-to-date downloads, troubleshooting, and support information, check out www.palm.com/support.

If you need more information

- Books: Many books on Windows
 Mobile® devices are available in local or
 online book retailers (look in the
 computers section), or visit
 <u>www.palm.com</u>.
- Online forums: Consult online Treo 700wx smartphone user discussion groups to swap information and learn about topics you may find nowhere else. Visit www.palm.com/support for details.
- Your wireless provider customer service: For questions about your account or features available on the network, contact your wireless provider customer service.

Using Your Phone

The phone, along with the Today screen, is your home base for making and receiving calls.

You can creatively manage multiple calls; for example, you can swap between calls, send text messages to ignored calls, and create conference calls.

And you can do more than manage your phone calls. You can send text messages, open applications, go to your favorite web pages, see your upcoming appointments, and even find out how many unread email messages you have.

Benefits

- Stay in touch—you choose how
- Work in other applications when on an active call
- Create speed-dial buttons with pictures of your friends

Using a phone headset

Phone overview

You can make and receive calls and store speed dial entries right from your Today screen. Be sure you know how to turn on your phone before reading this section (see <u>Turning your phone on and off</u>).

IMPORTANT Depending on where you are on a wireless network with certain coverage conditions, you might experience interruptions with your phone operation while using a Wi-Fi card (you must purchase and install a third-party Wi-Fi card to use this feature). Palm recommends that you turn off the phone radio when using any Wi-Fi card with your smartphone or remove the Wi-Fi card when not in use to ensure that you can always make and receive phone calls. For EMERGENCY calls, always remove the card from your smartphone to ensure optimal connectivity.

Accessing your Today screen

Press **Phone/Send** .

TIP If you press **Phone/Send** while a number is highlighted, your device dials the number. To access the Today screen when a number is highlighted, deselect the number before pressing Phone/Send or select **Today** from the **Start** menu.

What are all those icons?

You can monitor the status of several items using icons at the top of your Today screen:

You missed an incoming call.

You have a voicemail message.

区	You have a new email or text
	message.

Your phone is on. The bars display the signal strength. The stronger the signal, the more bars appear. If you are outside a coverage area, no bars appear.

Your phone is off.

You are outside your wireless provider's coverage area and roaming on another wireless service provider's network.

A voice call is in progress.

You are in an area that supports 1xRTT data services.

You are in an area that supports EVDO data services.

A 1xRTT data call is in progress. You can make calls, but you cannot receive calls; any incoming calls go to voicemail. When you make a call, the data transmission is automatically interrupted.

An EVDO data call is in progress. You can still make or receive calls. When you make or receive a call, the data transmission is automatically interrupted.

Your phone is connected to a 1xRTT data network, but you are not actively transmitting data. You can still make or receive calls.

Your phone is connected to an EVDO data network, but you are not actively transmitting data. You can still make or receive calls.

Your Palm® Treo™ 700wx smartphone is connected to a computer or network that is providing a data connection.

A data connection is not available or your phone is off.

- ActiveSync is currently synchronizing with the Exchange Server.
- Your smartphone's battery is low.
- Your smartphone's battery is charging.
- Your smartphone is connected to a power outlet and the battery is fully charged.
- Network Your phone is on and you are in name your wireless provider's coverage area. If you are outside a coverage area, No service or Roaming appears instead. When you turn off your phone, Phone Off appears instead.
- vp Voice privacy is preventing over-the-air eavesdropping. The icon appears during a call when this option is turned on and when voice privacy is available on your wireless provider's network.

The location privacy setting is set to Location On. Your location is available to your wireless provider's network and other applications. The icon appears with a red slash when the **Location Privacy** option has been selected. See <u>Selecting</u> your privacy settings for more information.

The Bluetooth® wireless technology status indicator appears in gray when this feature is off, in blue when this feature is on, and in reverse blue when your smartphone is communicating with another Bluetooth device.

A call is in progress and your smartphone is connected to a Bluetooth headset or car kit. **KEY TERM EVDO** (Evolution Data Optimized): A wireless broadband technology that is designed for very high-speed data transfer with average download speeds of 400-700Kbps, capable of reaching speeds up to 2Mbps, and upload speeds up to 156Kbps.

KEY TERM 1xRTT (Single-carrier [1x] radio transmission technology): A wireless technology that can provide fast data transfer and Internet access with average download speeds of 60-80Kbps and bursts up to 144Kbps.

DID YOU KNOW? During a voice call you can send text messages, but you cannot use data features such as web browsing and email.

TIP Data services may not be available when you are roaming on partner networks.

TIP To quickly turn the Bluetooth feature on and off, tap the **Bluetooth** icon to access the Bluetooth Settings screen.

TIP To display the remaining battery power, tap the battery icon. To close the battery status window, select Hide.

Making calls

phone is on (see <u>Turning your phone on</u> and off) and that you're inside a coverage area.

Your smartphone offers several ways to make phone calls. Try them all and you'll discover which methods you prefer.

Dialing with the number pad

1 Go to your Today screen (see <u>Accessing</u> <u>your Today screen</u>).

- **2** Using the numbered keys on the keyboard, enter a phone number.
- **3** Press **Phone/Send** to dial.

NOTE You do not need to press Option to access the numbers on the keyboard. However, when dialing short numbers, such as 411, the number may conflict with a contact name. If this occurs, press Option to avoid starting a contact lookup. You can always dial emergency call numbers without pressing Option first.

DID YOU KNOW? After you initiate a call, you do not need to press Option to access the * and # keys when responding to further dialing instructions.

Dialing by contact name

You can look up contacts quickly by entering just a few letters of a contact's name directly from your Today screen.
Before you can dial a call by contact name, you must create some contacts (see Adding a contact) or import them by synchronizing (see Synchronizing contacts and other info).

1 Go to your Today screen (see <u>Accessing your Today screen</u>).

2 Using the keyboard, begin entering one of the following for the contact you want to call:

- First name (JOH for John)
- Last name (SMI for Smith)
- First initial, a space, and then last initial (J S for John Smith)
- First name and last name (JOH SMI for John Smith)

For example, entering SM finds both Smilla Anderson and John Smith. Entering SM A finds only Smilla Anderson.

- **3** Select the number you want to dial.
- 4 Press **Phone/Send** to dial.

DID YOU KNOW? After you look up a contact, you can select how you want to communicate with that person. Press and hold **Center** on the **5-way**, and then select the communication method you want to use.

TIP To see a contact's address, company, and other details, highlight the name and press **Center** on the **5-way**.

TIP To clear the **Dial Lookup** field and start another **Contacts** search, press **OK**. To delete letters when correcting a misspelled name, press **Backspace**.

TIP Until you change the View By setting, your contact list (in the Contacts application) is sorted by contact name.

Dialing with a speed dial button

Before you can use a speed dial button, you must create some speed dial entries. See <u>Defining speed dial buttons</u>.

You can make a call with your speed dial buttons by doing any of the following:

- Highlight a speed dial button with the
 5-way, and then press Center .
- Tap a speed dial button with the stylus.
- From the **Today** screen, press and hold a **Quick Key** that you assigned to the speed dial button.

To see more speed dial buttons, highlight the picture speed dial area and press **Right**▶ or **Left** ◀ repeatedly, or highlight the text speed dial area and press **Up** ▲, **Down** ▼, **Right** ▶, or **Left** ◀.

PID YOU KNOW? You can dial an alternate number for a contact with a speed dial button. Highlight the speed dial button, press and hold **Center** on the **5-way**, and then select a number from the shortcut menu.

TIP You can customize the default speed dial buttons. See <u>Editing a speed dial button</u>.

Dialing by company name

- 1 Press **Start** and select **Contacts**.
- 2 Press **Menu** (right action key) and select **View By** > **Company**.
- **3** Press **Phone/Send** to go to your Today screen.
- **4** Using the keyboard, begin entering the first few letters of the company name.

- **5** Select the number you want to dial.
- 6 Press Phone/Send 📞 to dial.

Dialing from a web page or message

Your smartphone recognizes most phone numbers that appear in web pages or in messages (text or email).

- 1 Use the **5-way** to highlight the phone number you want to dial in the web page or message.
- 2 Press Center to open the Phone dialog box, and then select Yes to dial.

from a web page or a message, then highlight the number, press and hold **Center** on the **5-way**, and select **Copy**. Open the **Dial Pad**, and then press and hold **Center** on the **5-way** to **paste**. Press **Phone/Send** to dial.

Redialing a recently called number

- To dial the last number you called:
 Go to your Today screen, and then press
 and hold **Phone/Send** .
- To select from your most recently dialed numbers: Go to your Today screen, press Phone/Send , highlight the number or contact name you want to call, and then press Phone/Send to dial. If more than one number is associated with a contact, highlight the contact and press Right to access any alternate numbers for that contact.

To select from a chronological list of calls: Go to your Today screen, press Phone/Send , and then select Call Log. Highlight the number you want to call, and then press Call (left action key) to dial.

TIP You can also access the Call Log and Dial Pad from the Today screen by pressing **Menu** (right action key) and selecting **Call Log** or **Dial Pad**.

Dialing using the onscreen Dial Pad

The onscreen Dial Pad provides large numbers that you can tap with your finger or your stylus. The numbers also include the corresponding letters so that you can dial numbers that are expressed as letters.

- 1 Go to your Today screen.
- 2 Press Phone/Send , and then select Dial Pad from the menu.
- **3** Tap the onscreen **Dial Pad** to enter the number.
- 4 Press **Phone/Send** to dial.

DID YOU KNOW? You can paste numbers directly into the Dial Pad. Copy a number from another application, switch to **Dial Pad**, and then press and hold **Center** on the **5-way** to paste the number.

Receiving calls

To receive calls, your phone must be on.

To answer a call, do one of the following:

- Press Phone/Send \(\mathbb{C} \).
- Press Answer (left action key).
- If the headset is attached, press the headset button.

To ignore a call and send it to voicemail, do one of the following:

- Press Power/End 2.
- Press Menu (right action key) and select Ignore.
- Press Menu (right action key) and select **Ignore with text message** to send the caller a text message.

To silence the ringer while your smartphone is ringing:

- Press any key on your smartphone except Phone/Send, Power/End, Start, OK, Alt, or the 5-way. You can also use the Volume button to turn the ringer sound all the way down.
- To immediately silence all system sounds including the ringer, slide the Ringer switch to Sound Mode Off

 All sounds remain off until you slide the Ringer switch back to Sound Mode On

 →

 N.

When you silence the ringer, you can either answer the call or let it ring through to voicemail.

DID YOU KNOW? When you are on a plane, you can turn off your phone and all wireless services using Wireless Manager (see <u>Turning Wireless Services On/Off</u>). But you can still wake up the screen and use any app that doesn't require wireless services, like your smartphone's calendar, music player, and games.

TIP See a picture of the person calling you. Learn how to assign a caller ID picture in Assigning a picture and ringtone ID to a contact.

TIP If music is playing when a call arrives, the smartphone rings softly. You can answer the phone as you normally would. The audio pauses during your call.

Using voicemail

Setting up voicemail

- 1 Go to your Today screen.
- 2 To access your wireless provider's voicemail system, do one of the following:
 - Press and hold the number Quick Key associated with the Voicemail speed dial (such as 1). You can also tap the Voicemail speed dial button with your stylus.
 - If a Voicemail speed dial button is not configured, dial the phone number for your wireless provider's voicemail

- system, using the keyboard. See Making calls for more information.
- You can also create a speed dial button for your wireless provider's voicemail system. See <u>Defining speed</u> dial buttons for more information.
- **3** Follow the voice prompts to set up your voicemail.

Voicemail notification

When you have a new voicemail message, a notification screen appears. To hear your message now, press **Listen** (left action key). To retrieve your message later, press **Dismiss** (right action key). When you have unretrieved voicemail messages, a **Voicemail** icon appears at the top of your screen and the left action key is labeled **Voicemail**.

DID YOU KNOW? When a Voicemail icon appears at the top of the screen, you can tap this icon to retrieve your voicemail.

51

Retrieving voicemail messages

- 1 Go to your Today screen.
- 2 To access your wireless provider's voicemail system, do one of the following:
 - Press and hold the number Quick Key associated with the Voicemail speed dial button (such as 1). You can also tap the Voicemail speed dial button with your stylus.
 - If a Voicemail speed dial button is not configured, dial the phone number for your wireless provider's voicemail system, using the keyboard. See Making calls for more information.
 - You can also create a speed dial button for your wireless provider's voicemail system. See <u>Defining speed</u> <u>dial buttons</u> for more information.
- 4 Select Play ▶ to listen to your messages.

TIP You do not need to press Option to enter numbers, *****, or **#** while on an active call.

TIP If you have trouble accessing a voicemail system, try changing the Dial Pad tone setting. See <u>Selecting your call settings</u>.

Clearing the Voicemail icon

After retrieving your voicemail messages, the Voicemail icon on the top of your screen should disappear. If it doesn't, you can clear the icon manually.

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Phone** .
- 3 Select the **Services** tab.
- 4 Select Clear Voicemail Icon, and then press Center .

Managing active calls

When you make or receive a call, the active call info appears on your Today screen.

During a call, you can do any of the following:

- Put the call on hold: Press Hold (left action key). To take the call off hold, press Off Hold (left action key).
- Use the built-in speakerphone: Select Speakerphone . To turn off the speakerphone, select .
- Mute the microphone so you can't be heard: Select Mute . To turn the microphone back on, select .

• **Switch to another application:** Press **Start** and select the application.

TIP When a call lasts longer than one minute, the screen dims. Press any key, except **Power/End**, to wake up the screen.

DID YOU KNOW? You can send and receive text messages during a call. This is a great way to stay connected with colleagues during a long call.

Ending a call

Do one of the following:

- Press Power/End 2.
- Press the **headset** button (if the headset is attached and has a button on it). Some headsets do not have a button.

Returning to an active call from another application

You can use many other applications on your smartphone while holding a phone conversation, including the organizer and text messaging features. You cannot browse the web or send and receive email while on a voice call.

From any application, press **Phone/Send** to return to your Today screen.

Saving phone numbers

After you complete a call, you are prompted to add the number if it is not already in your Contacts list.

- To create a new contact for this number, select Create New Contact.
- To add this number to an existing contact, select Copy and Add, and then select a contact name.
- To decline adding the number, press
 Dismiss (left action key).
- To disable the Add Contact prompt, select Don't show this again.

If you don't add a number right away, follow these steps to add it later:

- 1 Go to the **Call Log** (see <u>Redialing a recently called number</u>).
- **2** Highlight the number you want to save.

- 3 Press and hold Center to open the shortcut menu, and then select Save to Contacts.
- **4** Enter the information for the entry.
- 5 Press OK .

TIP You can also save contact info from other applications, such as Messaging.

DID YOU KNOW? If an incoming call uses caller ID blocking, you do not see the Add Contact prompt.

TIP You can re-enable the Add Contact prompt even if you chose Don't show this again. See <u>Selecting your call settings</u> for more information.

More ways to manage calls

Your Treo 700wx smartphone offers many advanced telephone features, including call waiting, three-way calling, and call forwarding.

Making a second call

You can make a second call while your first call is still active.

- 1 Press **Hold** (left action key) to put the first call on hold.
- 2 To dial a second number, use any of the methods described in Making calls. If you're dialing by contact name or with the keyboard, you must first use the 5-way to select the Dial Lookup field.

When two calls are active, your Today screen includes two call status sections, each representing one of the calls.

Answering a second call (call waiting)

When you're on a call and you receive a second call, the call-waiting notification appears. You can do any of the following:

- Place the current call on hold and answer the new call:
 Press Answer (left action key) or Phone/Send .
- Hang up the first call: Press
 Power/End ②. The second call becomes an incoming call alert that you can choose to answer or ignore.
- Send the new call to voicemail: Press
 Menu (right action key) and select
 Ignore.

DID YOU KNOW? When the second call is outgoing, you can conference the two calls, but you cannot swap between them.

When the second call is incoming, you can swap between the two calls, but you cannot conference them.

When two calls are active and you press Power/End, you hang up both calls. To return to the first call, wait for the person on the second call to hang up.

Making a conference call

When the second call is outgoing, you can join two calls in a conference session. Additional charges may apply and minutes in your account may be deducted for each active call. Please contact your wireless provider for more information.

1 Put the first call on hold, and then place a second call.

- 2 Press **Conference** (left action key); this joins the two active calls in a conference.
- When you've finished, press **End Conference** (left action key); this ends the second call and returns you to the first call. If you're ready to hang up both calls, press **Power/End** presed.

Using Flash mode during an active call

Flash mode is an alternate way to manually manage your calls while one or more calls are active. The preferred methods are described in Making a second call, Answering a second call (call waiting), and Making a conference call. Flash mode is often used during a conference call when

one of the calls has ended but the other remains connected.

- 1 Press **Phone/Send** from the Active Call screen.
- 2 Select **Send Key** (Flash) to enter **Flash** mode.
- **3** Depending on the state of your active call, pressing the **Flash** (left action key) does one of the following:
 - If you have two active calls, you can swap between them if the second call is an incoming call.
 - If you have one active call, you can dial another number. You can press
 Flash (left action key) again to set up a conference call.
 - If you have two calls in conference, press Flash (left action key) to hang up the second call, and then dial another number.
- 4 Press Power/End (2) to exit Flash mode and end all calls.

Forwarding calls

You can forward calls to another phone number. Please contact your wireless provider for the code used to turn call forwarding on or off. In addition, check with your wireless provider about availability and pricing of forwarded calls; additional charges may apply.

- 1 Go to your Today screen.
- 2 Enter the code to turn on call forwarding (contact your wireless provider for details), followed by the number where you want to forward your calls. For example: *72 415-555-1234.
- 3 Press Phone/Send 🕻 to dial.
- 4 When you're ready to turn off call forwarding, enter the code to turn off call forwarding (contact your wireless provider for details), and then press **Phone/Send** .

TIP Contact your wireless provider to obtain the forwarding codes for your area.

After you turn on call forwarding, call your smartphone to confirm that call forwarding is active.

Viewing minutes usage

- **1** Go to the **Call Log** (see <u>Redialing a</u> recently called number).
- 2 Press Menu (right action key) and select Call Timers to view voice minutes, or Data Log to view data minutes.
- **3** (Optional) To reset the counters to zero, select **Reset**.
- 4 Press OK .

TIP Keep in mind that your billing statement may vary slightly from the information you see onscreen. Usage is charged based on your calling plan, and calling plans vary.

Defining speed dial buttons

Your smartphone lets you create both picture and text speed dial buttons, so that you can select a button on the Today screen to quickly dial a number.

Creating a speed dial button

You can create up to 20 picture buttons and 50 text buttons.

- 1 Go to your Today screen.
- 2 Press Menu (right action key) and select New Speed Dial.

- **3** Do one of the following:
 - Select Link, select the contact you want to link to this button, and then select the number you want to dial with this button
 - Select Label and enter a name for this button, and then select Number and enter the phone number you want to dial with this button.

- (Optional) Enter a Quick Key. When the Today screen is displayed, you can press and hold the Quick Key to instantly dial this number.
- TIP You can add a special ringtone to a contact associated with the speed-dial button. See Adding a contact.
- TIP Quick Keys can be letters or numbers, but you can't use both the letter and number for the same key. For example, the voicemail Quick Key is usually 1. The letter equivalent for that key is E, so you cannot assign E as a Quick Key to another speed dial button.
- 4 If this button is linked to a contact entry with a picture, select either **Text Speed Dial** or **Picture Speed Dial** to indicate which type of button you want to create. If this button is not linked to a contact or the contact doesn't have a picture, the Picture Speed Dial option is not available.

5 (Optional) Select the **Advanced** tab and set any of the following options:

Extra Digits: Defines additional numbers to dial, such as a password or extension. In addition to numbers, you can enter the following symbols: star (*) and pound (#). You can enter a comma (,) to insert a one-second pause.

Dial extra digits automatically: Dials predefined extra digits immediately after dialing the phone number. If you do not check this box, you need to press **Extra Digits** (left action key) to dial these digits.

Show voice mail buttons: Displays the voicemail playback controls after you dial this speed dial number. When this option is checked, you can enter

numbers below each control to tailor the controls to your voicemail system.

- Plays the previous message.
- Saves the current message.
- Plays the current message.
- Deletes the current message.
- Repeats the current message.
- Plays the next message.
- 6 Press OK .

Editing a speed dial button

- 1 Go to your Today screen.
- 2 Highlight the speed dial button you want to edit.
- 3 Press and hold Center to open the shortcut menu, and then select Edit Speed Dial.
- 4 Make the desired changes.
- 5 Press OK .

TIP You can also edit a speed dial button by pressing **Menu** and selecting **Speed Dial Options**, and then selecting the button you want to edit.

Deleting a speed dial button

- 1 Go to your Today screen.
- 2 Highlight the speed dial button you want to delete.
- 3 Press and hold Center to open the shortcut menu, and then select Edit Speed Dial.
- **4** Press **Delete** (right action key).
- **5** Select **Yes** to confirm deletion.

Arranging your speed dial buttons

- **1** Go to your Today screen.
- 2 Press Menu (right action key) and select Speed Dial Options.

- **3** Highlight the button you want to move.
- 4 Press Option + Up , Down , Right , or Left to move the button in that direction.

Using a phone headset

You can connect a phone headset for hands-free operation. If you need to use your smartphone while driving and this is permitted in your area, we recommend using the phone headset included with your device, or a hands-free car kit (sold separately).

TIP You can use the headset that came with your smartphone or a compatible third-party headset.

TIP The headset designed for Treo 180/270/300 smartphones is not compatible with the Palm Treo 700wx smartphone.

The headset button is multi-functional, and it performs different actions based on the situation. You can press the headset button to perform any of the following tasks:

- Answer an incoming call
- Respond to call waiting
- Hang up all calls
- Swap between calls if the second call is an incoming call
- Create a conference call if the second call is an outgoing call

61

Headset specifications

Your smartphone works with headsets that have a 2.5mm, 3-pin connector (look for two black bands on the plug). When in doubt, ask the third-party headset manufacturer if the product is compatible with Palm Treo 700wx smartphones. If you hear a headset buzz or poor microphone performance, your headset may be incompatible with your smartphone.

DID YOU KNOW? To hear stereo through the jack (such as music), you need to use a stereo adapter or other accessory (sold separately). For info on compatible audio accessories, visit www.palm.com/treo700wx-support.

Using a hands-free device with Bluetooth wireless technology

Your Treo 700wx smartphone is also compatible with many headsets and car kits enabled with Bluetooth wireless technology version 1.1 or 1.2. Please note, however, that you cannot use a Bluetooth headset to listen to MP3 files on your smartphone.

For a list of compatible hands-free devices with Bluetooth wireless technology, go to www.palm.com/treo700wx-support.

To learn how to set up and connect to Bluetooth devices, see:

<u>Connecting to devices with Bluetooth®</u>
<u>wireless technology</u>.

Here are tips for working with a Bluetooth hands-free device:

- To transfer a call from the handset to a Bluetooth hands-free device during a call, press **Menu** (right action key) and select **Connect Bluetooth**. To transfer the call back to the headset, press **Menu** (right action key) and select **Cancel Bluetooth**.
- To transfer a call from a wired headset to a Bluetooth headset or car kit that is within range and with which you've previously set up a partnership (Bluetooth headset or car kit required, sold separately), unplug the wired headset and press the button on the Bluetooth headset or car kit.

DID YOU KNOW? If you have both a compatible Bluetooth headset and car kit, the one you connected to your smartphone last becomes the active device.

TIP To find out how to transfer your contacts from your smartphone to your car kit, go to www.palm.com/treo700wx-support.

63

Staying Organized

Say good-bye to paper calendars and throw away those scribbled to-do lists. Your smartphone is all you need to organize your personal information and keep it with you wherever you go.

You never lose your information, even if your battery is completely drained. All your personal information is backed up each time you synchronize, and your information is kept private when you use your smartphone's security features. Also, you can easily share info with others electronically.

Benefits

- Track current, future, and past appointments
- Make to-do lists that get done
- Set reminders for appointments, birthdays, important tasks, and more

In this chapter

Contacts	37
Calendar6	39
Tasks	75
Notes	77
Calculator	30

Contacts

BEFORE YOU BEGIN Install the latest software from your *Getting Started CD*.

Adding a contact

- 1 Press **Start** and select **Contacts**.
- 2 Press **New** (left action key).

- **3** Use the **5-way** navigator to move between fields as you enter information.
- 4 To add a caller ID picture that appears when that person calls, select **Picture**, and then select **Camera** and take a picture, or select an existing picture from the Thumbnails view.

- **5** To assign the entry to one or more categories, select **Categories** and then check the categories under which you want this entry to appear.
- **6** To add a note to an entry, select the **Notes** tab.
- 7 To assign a ringtone to the entry, select **Ring tone** and select a tone.
- 8 After you enter all the information, press **OK** (a).

TIP If you have many contacts to enter, it's best to enter them in Microsoft Office Outlook on your computer and then sync. See Synchronizing contacts and other info for details.

TIP Be sure to enter numbers and email addresses in the correct fields. Otherwise, Messaging can't find this info when you address a message and Calendar can't find your contacts to invite them to meetings.

Viewing or changing contact information

- 1 In the **Contacts** list (name view), begin entering one of the following for the contact you want to view or edit:
 - First name
 - Last name

- First initial and last initial, separated by a space
- Press Option , and then enter the phone number
- 2 Press Up ▲ or Down ▼ on the 5-way to select the entry you want to open.
- **3** Press **Menu** (right action key) and select **Edit**.
- **4** Make changes to the entry as necessary.
- 5 Press OK .

DID YOU KNOW? You can find a contact by company name. Press **Menu** and select **View By** > **Company**. Select a company name to see the contacts who work there.

TIP To view a particular group of contacts, press **Menu**, select **Filter**, and then select the category you want to view.

TIP You can also open Contacts from your Today screen. Press **Menu** and select **Contacts**.

Deleting a contact

1 In the **Contacts** list, highlight the contact you want to delete.

- 2 Press **Menu** (right action key) and select **Delete Contact**.
- 3 Select Yes.

Customizing Contacts

- 1 Go to the **Contacts** list.
- 2 Press **Menu** (right action key) and select **Options**.
- **3** Set any of the following options:

Show alphabetical index: Displays the alphabet at the top of the Contacts list. You can use this index to find a contact.

Show contact names only: Lets you fit more names on the Contacts list by hiding everything but the contact's name.

Area code: Sets the default area code for new contact entries.

4 Press OK 🐵.

Finding a contact in an online address book

BEFORE YOU BEGIN Make sure you are accessing an Exchange Server 2003 upgraded to Service Pack 2. Add access to the online address book to your

smartphone. See <u>Adding an online address</u> <u>book</u>. After adding the online address book, you must synchronize with the Exchange Server in order for the Find Online option to appear.

In addition to having contacts on your device, you can also access contact information from your organization's online address book or Global Address List (GAL). For more information, see <u>Adding an online</u> address book.

- 1 Press **Start** and select **Contacts**.
- 2 Press **Menu** (right action key), and select **Find Online**.

Calendar

Displaying your calendar

- 1 Press Start and select Calendar.
- 2 Press **Menu** (right action key) and select **View**.
- **3** Select one of the following views:

Agenda: Shows your daily schedule in list format. Upcoming appointments are bold; past appointments are dimmed.

Day: Shows your daily schedule in day-planner format.

Week: Shows your schedule for an entire week.

Month: Shows your schedule for a whole month.

- A morning appointment
- An afternoon appointment
- Both morning and evening appointments
- ☐ An all-day event

Year: Shows a calendar for a 6-month period.

4 Use the **5-way** to move to another day, week, month, or year (based on the current view).

Creating an appointment

- 1 Press Start and select Calendar.
- 2 Press **Menu** (right action key) and select **New Appointment**.

- **3** Enter a subject (description) and a location.
- **4** Select **Starts** and select the starting date and time.
- 5 Select Ends and select the ending date and time.
- 6 Press OK .

TIP If you have several appointments to enter, it's most efficient to enter them in Microsoft Office Outlook on your computer and then synchronize your smartphone with your computer. For more information, see Synchronizing contacts and other info.

TIP To pencil in an appointment, open the appointment, select **Status**, and then select **Tentative**.

Creating an untimed event

An untimed event, such as a birthday, anniversary, or vacation, does not occur at a particular time. These events appear as banners at the top of your calendar; they don't occupy blocks of time. For example, "Submit Final Draft" in the screenshot shown here is an untimed event.

- 1 Press Start and select Calendar.
- 2 Press **Menu** (right action key) and select **New Appointment**.
- **3** Enter a subject (description).
- **4** Select the starting and ending dates.
- 5 Select All Day, and then select Yes.

6 Press OK .

DID YOU KNOW? An untimed event can last longer than a day.

TIP To enter a birthday or an anniversary, create an untimed event that repeats every year.

Scheduling a repeating appointment

- 1 Create an appointment or an untimed event, and then select it.
- 2 Press Edit (left action key).
- 3 Select Occurs, and then select a repeat pattern. To create a repeat pattern, select Edit pattern and follow the onscreen instructions.
- 4 Press OK .

Adding an alarm reminder to an event

- 1 Create an event, and then select it.
- 2 Press **Edit** (left action key).
- 3 Select **Reminder**, and then select **Remind Me**.
- **4** Enter the number of minutes, hours, days, or weeks before the event you would like to receive the alarm.
- 5 Press OK .

TIP You can also add an alarm when you create the event.

71

Sending a meeting request

BEFORE YOU BEGIN Create contact entries with email addresses for the people you want to invite to a meeting. You can't access contact entries without email addresses from your calendar.

You can email meeting invitations to contacts who use Microsoft® Office Outlook® or Outlook Mobile.

- 1 Create an event, and then select it.
- 2 Press **Edit** (left action key).
- 3 Select Attendees, and then select the name of the contact you want to invite. To invite other attendees, select Add and select the names.
- 4 Press OK (18).

The next time you synchronize, the meeting request is sent to the attendees. When attendees accept your meeting request, the meeting is automatically added to their schedules. When you receive their response, your calendar is updated as well.

DID YOU KNOW? If you are using an Exchange Server 2003 with SP 2, you can use your corporate GAL to find contact information for an attendee. Select **Attendees**, press **Menu**, and then select **Find Online**. Enter the name of the attendee and select **Find**.

Marking an event as sensitive

If other people have access to your Microsoft Office Outlook calendar on your computer and you don't want them to see an appointment, you can mark that appointment as private to hide it from other Microsoft Office Outlook users.

- 1 Create an event, and then select it.
- 2 Press **Edit** (left action key).
- **3** Select **Sensitivity**, and then select one of the following:

Private: Displays the event on your smartphone and on your computer. Meeting attendees or recipients see "Please treat this as Private" near the top of an open appointment. If you sync with an Exchange Server, other users who can access your folders can't see your private events; they see private events as *unavailable* time slots.

Personal: Displays the event on your smartphone and on your computer. Meeting attendees or recipients see "Please treat this as Personal" near the top of an open appointment.

Confidential: Displays the event on your smartphone and on your computer. Meeting attendees or recipients see "Please treat this as Confidential" near the top of an open appointment.

4 Press OK .

TIP If you don't see an option on the screen, press **Down** on the **5-way** to scroll. For example, when editing an event, you don't see the Sensitivity option until you scroll toward the bottom of the entry.

Organizing your schedule

Use categories to view various types of events.

- **1** Create an event, and then select it.
- 2 Press **Edit** (left action key).
- 3 Select Category, and then check the categories that apply to this event.
 To add a new category, press New

(left action key), enter the category name, and then press **OK** (a).

- 4 Press **OK** (a) two more times.
- **5** After you assign events to categories, press **Menu** (right action key) and select **Filter**.
- **6** Select the type of events you want to view.

Deleting an event

- 1 Highlight the event you want to delete.
- 2 Press **Menu** (right action key) and select **Delete Appointment**.
- **3** Select **Yes**.

Customizing Calendar

1 Press **Menu** (right action key) and select **Options**.

2 On the **General** tab, set any of the following options:

1st day of week: Sets Sunday or Monday as the first day of the week for all Calendar views.

Week view: Sets whether five, six, or seven days appear in Week View.

Show half hour slots: Sets whether time slots appear in one-hour or half-hour increments in Day View and Week View.

Show week numbers: Sets whether week numbers (1–52) appear in Week View.

3 Select the **Appointments** tab and set any of the following options:

TIP Not all icons appear in all Calendar views.

Set reminders for new items: Sets whether a reminder is automatically added to new events and how long before the event the reminder appears. You can override this setting for individual events.

Show icons: Sets which icons appear next to events.

- The event has a reminder.
- The event repeats in a specified pattern.
- The event has a note attached.

- A location has been assigned to the event.
- The event is a meeting.
- The event is marked private.

Send meeting requests via: Sets the Messaging method used to send meeting requests.

4 Press OK .

Tasks

You can use Tasks to remind you of tasks you need to complete and to keep a record of completed tasks.

Adding a task

- 1 Press **Start** and select **Programs**.
- 2 Select Tasks 🚺.
- **3** Press **New** (left action key).
- **4** Enter a description of the task in the **Subject** field.

5 Set any of the following:

Priority: Sets the priority level for this task. Later you can arrange your tasks based on the importance of each task.

Status: Indicates whether the task has been completed.

Starts: Specifies when the task begins.

Due: Sets the due date for the task.

Occurs: Indicates whether the task repeats at regular intervals and how often it repeats.

Reminder: Sets an alarm for this task and indicates when you want to be reminded.

Categories: Assigns the task to one or more categories.

Sensitivity: Marks this task as Normal, Personal, Private, or Confidential.

Notes: Lets you enter additional text for the task.

6 Press OK .

DID YOU KNOW? If you want to use Tasks Over the Air (OTA) synchronization, install the software from your *Getting Started CD*. OTA features also require an Exchange Server 2003 upgrade to Service Pack 2. The option to synchronize tasks wirelessly in the ActiveSync application appears only if you have the appropriate server.

TIP You can also add a task by selecting the **Tasks** entry bar at the top of the screen.

Checking off a task

- 1 Select the task you want to check off.
- 2 Press **Edit** (left action key).
- **3** Select **Status** and select **Completed**.
- 4 Press OK .

TIP You can also mark a task complete by tapping the box next to the task on the **Tasks** list.

DID YOU KNOW? Overdue tasks appear in red.

Organizing your tasks

- 1 In the **Tasks** list, press **Menu** (right action key) and select **Filter**.
- 2 Select which tasks you want to view: All Tasks, Recently Viewed, No Categories, Active Tasks, Completed Tasks, or a specific category such as Business or Personal.
- **3** Press **Menu** (right action key) and select **Sort By**.
- 4 Select the sort method: Status, Priority, Subject, Start Date, or Due Date.

Deleting a task

- 1 Highlight the task you want to delete.
- 2 Press **Menu** (right action key) and select **Delete Task**.
- 3 Select Yes.

Customizing Tasks

- 1 Go to the **Tasks** list.
- 2 Press **Menu** (right action key) and select **Options**.
- **3** Set any of the following options:

Set reminders for new items:

Automatically adds a reminder to new tasks. The default reminder is set to 8:00 on the morning the task is due. You can override this setting for individual tasks.

Show start and due dates: Displays task start and due dates in the Tasks list.

Show Tasks entry bar: Displays the Tasks entry bar at the top of the Tasks list.

4 Press OK .

Notes

Notes are a great way to capture thoughts, questions, and meeting notes on your Palm Treo 700wx smartphone.

Creating a note

BEFORE YOU BEGIN Install the software from your *Getting Started CD* that came with your smartphone.

- 1 Press Start and select Programs.
- **3** Press **New** (left action key).
- 4 Do one of the following:
 - Type the text with the keyboard.

- Write the text with the stylus.
- Draw a sketch with the stylus, crossing at least three ruled lines.
- 5 Press OK .

Recording a voice note

You can create a new voice note or add a recording to an existing note.

1 Press Start and select Programs.

- 2 Select Notes 🧾.
- **3** To add a recording to a note, open the note you want to add the recording to. To create a new voice note, skip this step.
- 4 Press **Menu** (right action key) and select **View Recording Toolbar**.

- **5** Select to begin recording.
- **6** Speak into your smartphone's microphone or hold it close to another sound source.
- 7 When you have finished recording, select to stop recording. A Recording icon appears in the note or Notes list, depending on where you recorded the note.
- 8 Press OK .

DID YOU KNOW? You can add several voice notes within a single note.

TIP To play a recording, select the voice note in the **Notes** list or open the note containing the recording and select the **Recording** icon.

Creating a note from a template

- 1 Go to the **Notes** list.
- 2 Select the **Show** list in the upper-left, and then select **Templates**.
- 3 Open the template you want to use.
- **4** Enter the information.
- 5 Press OK .
- **6** Rename the note and move it to the appropriate folder. See <u>Organizing your notes</u> for details.

TIP To create a new template, highlight the note you want to save as a template. Press Menu and select Rename/Move. Select Name, and then enter a name for the template. Select the Show list, and then select Templates. Press OK.

Organizing your notes

You can rename your notes, move notes to another folder, and move notes between your smartphone and an expansion (storage) card.

- 1 Go to the **Notes** list and highlight a note you want to move.
- 2 Press **Menu** (right action key) and select **Rename/Move**.
- **3** Select **Name**, and then enter a new name for the note.
- **4** Select **Folder**, and then select the folder in which you want to store the note.
- 5 Select Location, and then select Main memory or Storage Card.
- 6 Press OK .
- **7** Select the **Show** list in the upper-left, and then select the folder you want to view.

8 Select the **Sort By** list in the upper-right, and then select whether you want to sort your notes by **Name**, **Date**, **Size**, or **Type**.

TIP To create a new folder, go to the **Notes** list, select the **Show** list in the upper-left, and then select **Add/Delete**. Select **New**, enter a name for the folder, and then press **OK**.

Deleting a note

- **1** Go to the **Notes** list and highlight the note you want to delete.
- 2 Press **Menu** (right action key) and select **Delete**.
- 3 Select Yes.

Customizing Notes

- 1 Go to the **Notes** list.
- 2 Press **Menu** (right action key) and select **Options**.
- **3** Set any of the following options:

Default mode: Sets the default entry mode to Writing or Typing.

Default template: Sets the default template for new notes.

Save to: Sets the default location where new notes are stored.

Record button action: Sets whether the Side button opens the Notes application or stays in the current application.

4 Press OK .

Calculator

You can use Calculator for basic arithmetic calculations, such as addition, subtraction, multiplication, and division.

Performing calculations

- 1 Press Start and select Programs.
- 2 Select Calculator .
- **3** Use the keyboard or tap the screen to enter numbers and perform calculations, including the following:
 - Clears the last digit in a multi-digit entry.
 - © Clears the current calculation or the displayed number.
 - © Calculates the reciprocal of a number
 - % Calculates percentage.
 - Calculates the square root of a number.
 - Switches a number between negative and positive.

Using the Calculator memory

 To store a number, select the box to the left of the entry box. An M appears in the box.

- To add the displayed number to the number stored in memory, select M+.
- To display the number stored in memory, select (MR).
- To clear the memory, select (MC).

DID YOU KNOW? When you store a number in memory, it replaces the number that was previously stored.

TIP To copy a number, press **Edit** and select **Copy**. You can paste the copied number into another application by pressing **Edit** and selecting **Paste**.

TIP For more advanced calculations, use Excel Mobile. See <u>Excel Mobile</u> for details.

Using Email and Other Wireless Services

Now your smartphone brings you a new level of convenience. Use email or text messaging to communicate with friends, family, and colleagues anywhere you can access your network operator's data network. You can send and receive email attachments such as photos or Microsoft Word or Excel files, and send a quick text message from anywhere on the data network.

You use the web for so many things. Now, with the built-in web browser, you can take the web with you almost anywhere you go.

Your device's built-in Bluetooth® wireless technology helps you easily set up wireless connections to a number of devices, so you can enjoy the convenience of cable-free connectivity. You can also use your device to connect your computer to the Internet and to share contacts or your favorite photos with other people.

Benefits

- Receive and send files of almost any type
- Use text messaging to chat with friends
- Carry the web with you

- Store web pages for offline viewing
- Connect to Bluetooth headsets and car kits
- Connect your computer to the Internet through your smartphone

In this chapter

Sending and receiving messages and email	85
Using Pocket MSN	100
Browsing the web	102
Connecting to devices with Bluetooth® wireless technology	108
Beaming information with IR	113
Using your smartphone as a wireless modem	115

Sending and receiving messages and email

BEFORE YOU BEGIN Do the following:

- Make sure your phone is on before you send or receive messages.
- For delivery of Outlook email using Direct Push Technology, install the software from your *Getting Started CD*. This feature also requires an Exchange Server 2003 upgrade to Service Pack 2.

You can use the Messaging application to exchange email or brief text messages (SMS) with other wireless devices and email addresses that support these forms of messaging. You can also exchange instant messages (IM) with Pocket MSN. Before you use your Palm® Treo™ 700wx to send or receive messages, consult your wireless provider for pricing and availability of email, text, and data services.

Creating and sending a text message

Each text message can hold up to 160 characters. To save time, you can select from predefined My Text phrases, such as "Call me" or "On my way." You can add your own My Text phrases, and if you prefer, you can enter the full message text too.

- 1 Go to your Today screen.
- 2 Press Messaging (left action key).
- 3 Press Left

 ¶ until you see Text

 Messages in the title bar.
- 4 Press **New** (left action key).
- **5** Do one of the following to address the message:
 - If the recipient's name and number are in your Contacts list, type the first few letters of the first or last name or simply enter the first initial, followed by a space, and then the last initial to find a name.
 - If the recipient's name is in an online address book, press Center , enter the name, press Menu (right action key), and then select Find Online. Select the name, and then

 If the recipient's name and number are not in your Contacts list, enter the full number or email address.

- 6 Enter your message, or press
 Menu (right action key), select
 My Text, and then select a predefined phrase you want to insert.
- 7 (Optional) Press **Menu** (right action key) and select **Spell Check**.
- 8 (Optional) Press **Menu** (right action key) and select **Message**

- **Options**. Enter a callback number and then press **OK**.
- **9** Press **Send** (left action key).

DID YOU KNOW? You can send and receive text messages even while you are on a phone call. This is easiest when using a hands-free headset or the speakerphone.

TIP Some symbols can't be used in text messages. Invalid characters are automatically replaced by the Messaging application.

TIP To address a message to multiple recipients, separate the addresses with a semicolon (;). If you address a single text message to three people, you are billed for three messages.

Setting up an email account

You can use your smartphone to access several types of email accounts. Before you enter settings for your email accounts on your smartphone, you must determine which types of accounts you want to access, because the steps vary for each of the following account types:

 ActiveSync Exchange Server 2003: Enables you to wirelessly synchronize your email and other information directly with the information stored on a Microsoft Exchange Server 2003.

When the Exchange Server 2003 is upgraded to Service Pack 2, new features are available that allow you to access online address books and use Direct Push Technology. These features include Global Address List (GAL), Tasks Over The Air (OTA), and IP-based push updating of Outlook information.

Direct Push Technology is the two-way wireless delivery method used between Microsoft Exchange Server 2003 with Service Pack 2 (SP2) servers and a smartphone with Windows Mobile® 5.2 with Messaging and Security Feature Pack (MSFP) for Outlook information (Email, Calendar, Contacts, and Tasks).

Direct Push Technology uses an Internet Protocol (IP)-based methodology rather than SMS-based methodology, resulting in lower network overhead, lower costs, and more efficient communications.

 IMAP or POP3: Enables you to send and receive email messages with a corporate email account or an account that you have with an Internet service provider (ISP).

 Hotmail: Enables you to send and receive email messages with an MSN Hotmail account. See <u>Using Pocket</u> <u>MSN</u> for information on setting up an MSN Hotmail account.

DID YOU KNOW? If you are outside a coverage area or if your phone is off, your outgoing messages go into the Outbox. When you return to a coverage area, your pending messages are sent automatically and transferred to the Sent folder.

If your email account requires a VPN connection to establish a secure connection, VPN servers may require that you install specific VPN software (sold separately) on your smartphone before you can access your email. See <u>Connecting to a VPN</u> for more info.

DID YOU KNOW? You can receive email messages in various formats, including HTML, RTF, and plain text.

TIP Your computer must be connected to the Internet when you sync your email.

Setting up an Exchange Server email account

BEFORE YOU BEGIN Do the following:

- Install the software from the *Getting Started CD*.
- For delivery of Outlook email using Direct Push Technology, make sure that your Exchange Server 2003 is upgraded to Service Pack 2.

You can use your smartphone to sync directly with Exchange Server using Exchange ActiveSync. You may have already set up your Exchange Server email settings when you installed the ActiveSync® desktop software. If you did not enter settings for an Exchange Server email account, work with your system administrator to gather the following info, and then follow the steps in this section to enter account settings now.

- Mail server address and domain name
- Your username and password
- 1 Press **Start** and select **Programs**.
- 2 Select ActiveSync 🔂.

- **3** Press **Menu** (right action key) and select **Add Server Source**.
- 4 Enter the **Server address**, and then press **Next** (right action key).

TIP If you have already entered settings for an Exchange Server account, Add Server Source does not appear on the menu; Configure Server appears on the menu instead.

TIP The Exchange Server settings are casesensitive. Be sure to enter uppercase and lowercase letters properly. 5 Enter your username, password, and domain. The password is case-sensitive. Your password can use numbers and text. Check whether your Caps Lock and Option Lock are active, because that can affect the password you are entering. See Entering lowercase and uppercase letters and Entering numbers, punctuation, and symbols.

- 6 If you want to enter your password each time you access this account, do not check the **Save password** box. If you want your password entered automatically, check this box.
- 7 (Optional) Select **Advanced** to set the rules for fixing sync conflicts.

8 Press **Next** (right action key) and check the boxes for the types of information you want to synchronize with Exchange Server.

TIP Ask your system administrator if it is OK to store your corporate email password on your smartphone. For increased security, you may need to enter your password each time you access your email.

- **9** (Optional) Highlight one of the items and select **Settings** to change the synchronization settings for that type of information.
- **10** Press **Finish** (right action key).

11 Synchronize with your Exchange Server and set your sync schedule. <u>Setting a</u> sync schedule with an Exchange Server

NOTE Settings are not available for all items. If you want to automatically download more than the email message header, select **E-mail** in step 9 and increase the **KB** setting. If you don't increase this setting, you can manually download the rest of the message at your convenience.

Setting a sync schedule with an Exchange Server

BEFORE YOU BEGIN Enter settings for an Exchange Server email account. <u>Setting up an Exchange Server email account</u>

Follow these steps to set your sync schedule:

- 1 Press **Start** and select **Programs**.
- 2 Select ActiveSync 🔂.
- **3** Press **Menu** (right action key) and select **Schedule**.

- 4 Set your schedule for peak and off-peak times. To conserve power it is recommended that you change your settings to synchronize every 30 or 60 minutes instead of as items arrive.
- 5 Set your roaming preference. If roaming charges are not a concern, select Use above settings when roaming.
- 6 Press OK .

Setting up an IMAP or POP email account

BEFORE YOU BEGIN Work with your system administrator to gather the following info:

- Account type (POP3 or IMAP)
- Mail server name for receiving mail
- Mail server name for sending mail

- · Your username and password
- Any special security requirements
 If you have problems configuring your account, go to www.palm.com/emailsetup
 for more information.

You can send and receive email messages with an email account that you have with an Internet service provider (ISP), an email account that you access using a VPN server connection (such as a work account), or any other IMAP (Internet Message Access Protocol) or POP email account.

- 1 Go to your Today screen.
- 2 Press **Messaging** (left action key).
- 3 Press **Menu** (right action key) and select **Tools** > **New Account**.

4 Enter the email address that you want to set up, and then press **Next** (right action key).

- **5** Wait until the Status box displays Completed, and then press **Next** (right action key).
- **6** Enter your name, username, and password.

- 7 If you want to enter your password each time you access this account, do not check the **Save password** box. If you want your password entered automatically, check this box.
- **8** Press **Next** (right action key).

- 9 Select the Account type list, and then select POP3 or IMAP.
- 10 Enter a name for this account, and then press **Next** (right action key). For example, if this is your work email account, enter "Work" or your company's name.

- 11 Enter the name of the Incoming mail and Outgoing mail servers. Do not enter anything in Domain. It is not needed for POP3 or IMAP accounts.
- **12** (Optional) Select **Options** to select download settings for this account.
- **13** Press **Finish** (right action key).

TIP To delete an email account, press **Menu** and select **Tools** > **Options**. Highlight the account you want to delete. Press and hold **Center** on the **5-way**, and then select **Delete**.

DID YOU KNOW? You can set up more than one email account. Press **Menu**, select **Tools**, and then select **New Account**. Enter the account information in the **E-Mail Setup** wizard.

Creating and sending an email message

- 1 Go to your Today screen.
- 2 Press **Messaging** (left action key).
- 3 Press **Left** ◀ to cycle through your Messaging accounts until you see the email account you want to use in the title bar.
- 4 Press **New** (left action key).
- **5** Do one of the following to address the message:
 - If the recipient's name and email address are in your Contacts list, enter the first few letters of the recipient's first or last name, and then select the recipient's name.
 - If the recipient's name is in an online address book, you can find the name and add it. For more information, see Adding an online address book and Using an online address book.
 - If the recipient's name and email address are not in your Contacts list, enter the full email address.
- **6** Select **Subject** and enter a title for the message.

7 Enter your message, or press **Menu**(right action key), select **My Text**, and then select a predefined phrase you want to insert.

- 8 (Optional) Do any of the following:
 - Press Menu (right action key) and select Insert. Select the type of item you want to attach, and then select the file or record a voice note.
 - Press Menu (right action key) and select Spell Check.
 - Press Menu (right action key) and select Message Options. Select the Priority list, select a setting for the message, and then press OK .
- **9** Press **Send** (left action key).

TIP Not ready to send that message yet? You can save it without sending it. While creating a message, press **Menu** and select **Save to Drafts**. To access the draft, select the **Show**list in the upper-left, and then select **Drafts**.

DID YOU KNOW? You can also access the Messaging application from the Start menu.

DID YOU KNOW? You can receive email messages in various formats, including HTML, RTF, and plain text.

Adding an online address book

BEFORE YOU BEGIN Do the following:

- Ask your system administrator for the name of the directory service and the server, and whether authentication is required for accessing an online address book.
- If your company is using an Exchange Server 2003 upgraded to Service Pack 2, you must first synchronize with the Exchange Server to enable the Global Address List to find a Contact.

Many email servers, including servers running Exchange Server, can verify names with an online address book, also called a directory service or a Global Address List.

After you enter settings for an email account, Messaging checks your Contacts list and then the directory service to verify names that you enter in the To, Cc, and Bcc fields.

- 1 In the message list, press Menu (right action key) and select Tools > Options.
- 2 Select the Address tab.
- 3 Select the address book you want to check for email addresses, and then select Add.
- **4** Enter the name of the directory service.
- **5** Enter the server name.
- **6** If your server requires authentication, check the box, and then enter your username and password.
- 7 (Optional) Check the **Check name** against this server box to enable this directory service.
- 8 Press OK .

Outlook email account, disable your online address books to avoid errors. Press Menu and select Tools > Options. Select Address and uncheck the Check name against this server box.

TIP To delete a directory service, highlight it, press and hold Center on the 5-way, and then select Delete.

Using an online address book

BEFORE YOU BEGIN Add an online address book to your smartphone. See Adding an online address book.

You can access contact information, such as an email address or phone number, from your organization's online address book or Global Address List (GAL). To access a GAL, make sure you are accessing an Exchange Server 2003 upgraded to Service Pack 2. This feature is useful only if you know the exact name as it appears in the directory.

- 1 In a new message, tap the **To** box.
- 2 Press Menu (right action key), and select Add Recipient.

- **3** Press **Menu** (right action key), and select **Find Online**.
- **4** Enter the contact name as it appears in the directory, and tap **Find**. You must spell the contact name correctly.

Address List to find a contact. In Contacts, press **Menu**, and then select **Find Online**. When sending a meeting request, select **Attendees**, press **Menu**, and then select **Find Online**.

TIP If your organization's GAL uses abbreviated extension numbers, you can set your smartphone to automatically dial the complete number. See <u>Setting your abbreviated dialing preferences</u> for more information.

Synchronizing your default email account

To send and receive messages for your default email account, simply synchronize your smartphone with your computer. See Setting the synchronization schedule for details. During synchronization, new messages are copied to your smartphone's Inbox, and messages in the smartphone's Outbox are sent.

DID YOU KNOW? By default, email messages you send are saved in the Sent folder. If you want to save memory on your smartphone, you can turn this option off. In the Messaging list, press Menu and select Tools > Options. Select Message, and then uncheck the Keep copies of sent items in Sent folder box.

Synchronizing your other email accounts

To send and receive email messages for additional email accounts, such as an Internet service provider (ISP) account or an account that you access using a VPN server connection (typically a work account), follow these steps:

- **1** Go to your Today screen.
- 2 Press **Messaging** (left action key).
- 3 Press Left

 to cycle through your Messaging accounts until you see the account you want to download in the title bar.
- 4 Press **Menu** (right action key) and select **Send/Receive** to synchronize your smartphone with your email server.

Receiving attachments

- 1 Select the attachment (below the subject) to mark it for download.
- **2** Synchronize the email account that contains the message as described in the previous sections.
- 3 Select the attachment to open it.

If you have a Microsoft Office Outlook e-mail account and want to download attachments automatically, do the following:

- 1 Press Start and select Programs.
- 2 Select ActiveSync 🔂.
- **3** Press **Menu** (right action key) and select **Options**.
- 4 Select **E-mail**, and then select **Settings**.
- **5** Check the **Include file attachments** box.
- 6 Press OK .

DID YOU KNOW? You can receive and open attachments in a number of formats, including Word, Excel, PowerPoint, and PDF.

To automatically download attachments from an IMAP4 email account (typically an ISP account) or an account that you access using a VPN server connection (typically a work account), do the following:

- **1** Go to your Today screen.
- 2 Press **Messaging** (left action key).
- **3** Close any open messages.
- 4 Press **Menu** (right action key) and select **Tools** > **Options**.
- **5** On the **Accounts** tab, select the IMAP4 account name.
- 6 Press **Next** (right action key) until you reach Server information, and then select **Options**.
- 7 Press Next (right action key) twice, and then select Get full copy of messages and When getting full copy, get attachments.

TIP To store attachments on an expansion card, press Menu, and select Tools > Options. Select Storage and then check the Store attachments on a storage card box.

DID YOU KNOW? Embedded images and objects cannot be received as attachments, unless you have an IMAP4 email account with TNEF disabled. Note that TNEF must be enabled to receive meeting requests.

DID YOU KNOW? On the Accounts tab in Messaging Options, an asterisk appears next to the accounts you create.

Using links in messages

When you receive a text or email message that contains a telephone number, email address, or URL, you can dial the number, send an email message, or go to the web page immediately. Your smartphone automatically opens the appropriate application from the link.

- 1 Select a message in the list.
- 2 Select the phone number, email address, or URL (appears as underlined blue text).

Forwarding a message

- Open the text or email message you want to forward.
- 2 Press **Menu** (right action key) and select **Forward**.
- **3** Address the message and enter any text you want to add.
- **4** Press **Send** (right action key).

Managing your messages

The status icons that appear next to each message in the Inbox and Outbox indicate the following:

A read text message.

An unread email message.

You can rearrange the messages in any folder or account.

- **1** Go to the Messaging account you want to arrange.
- 2 Select the **Sort By** list in the upper-right, and then select the sort method you want to use.

You can delete several messages at once from any folder.

- **1** Go to the Messaging account that you want to delete the messages from.
- 2 Highlight the message(s) you want to delete. To select multiple messages, tap and drag the stylus across the messages.
- 3 Press **Menu** (right action key) and select **Delete**

TIP Unread messages appear in bold. Messages you've read appear in plain text.

DID YOU KNOW? If you are working offline, messages that you deleted from the server are deleted from your smartphone the next time you connect, or according to the options you selected.

TIP To permanently remove messages from the Deleted Items folder, press **Menu** and select **Tools** > **Empty Deleted Items**.

Adding a signature to your messages

You can use a different signature with each Messaging account.

1 Go to the **Messaging** list.

- 2 Press **Menu** (right action key) and select **Tools** > **Options**.
- 3 On the **Accounts** tab, select **Signatures**.
- **4** Select the account you want to create a signature for.

- **5** Check the box to add this signature to new messages you create with this account.
- **6** (Optional) Check the box to add this signature to messages you reply to or forward with this account.
- 7 Select the default signature text and enter the signature text you want to use.
- 8 Press OK .

Customizing your Messaging settings

- 1 Go to the **Messaging** list.
- 2 Press **Menu** (right action key) and select **Tools** > **Options**.
- **3** Select the **Message** tab and set any of the following options:

When replying to e-mail, include body: Indicates whether the body of a message you received appears in your response to that message.

Keep copies of sent items in Sent folder: Indicates whether messages you send are stored in the Sent folder.

After deleting or moving a message: Specifies what you want to appear after you delete or move a text or email message. **4** Select the **Address** tab and set any of the following options:

In Contacts, get e-mail addresses

from: Indicates whether you want to check Contacts in addition to any directory services for email addresses.

Verify names using these address books: Indicates which directory services you want to check for email addresses.

Add: Lets you add directory services to the list of online address books.

5 Select the **Storage** tab and set any of the following options:

Store attachments on storage card:

Indicates whether you want to automatically store email attachments on an expansion card.

Empty deleted items: Indicates whether you want to automatically empty the Deleted Items folder, and when you want this to occur.

6 Press OK .

Using Pocket MSN

BEFORE YOU BEGIN To use the Hotmail and IM features in Pocket MSN, you must first sign up for a MSN account. You must

also subscribe to data services from your wireless provider.

Pocket MSN provides quick access to the following:

- MSN Hotmail: Lets you read, write, send, and delete email. You can also manage your Hotmail folders.
- MSN Messenger Contacts list: Lets you see who's online and exchange instant messages (IM). Subscribe to status updates for selected contacts so you're notified when they're online.
- Options: Lets you customize your Pocket MSN experience.

DID YOU KNOW? You can add Pocket MSN to your Today screen. See <u>Selecting which items</u> <u>appear on your Today screen</u> for details.

TIP When you set up a Pocket MSN Hotmail account, you can access that account in the Messaging application. To access your instant messages, use the MSN application or the MSN plug-in on the Today screen.

Signing in to Pocket MSN

1 Press **Start** and select **Pocket MSN**.

- 2 Select MSN Mobile Home.
- 3 Select Sign in.
- **4** Enter the email address and password for your Passport account or your Hotmail account.
 - To create a Passport (IM) account, go to www.passport.com.
 - To create a Hotmail account, go to www.hotmail.com.

Browsing the web

Internet Explorer Mobile provides quick and easy access to web pages. You can view most sites you use on your computer, including those with security and advanced features, such as JavaScript and frames. To browse the web, you must subscribe to data services from your wireless provider.

Viewing a web page

By default, Internet Explorer Mobile scales web page content to fit your smartphone screen so that you can view most of the information without scrolling left or right.

1 Make sure your phone is on (see <u>Turning your phone on and off</u>).

- 2 Press **Start** and select **Internet Explorer**.
- **3** Highlight the address line, enter the address of the web page you want to view, and then press **Center** ...
- **4** Press **Menu** (right action key), select **View**, and then select any of the following:

One Column: Arranges web pages into one column that is as wide as the screen, so that you don't have to scroll horizontally.

Default: Maintains a layout similar to what you see on a desktop computer, but it makes items smaller and arranges the content so that you can see most of it without scrolling horizontally.

Desktop: Keeps the same layout and size as on a desktop computer, which requires both horizontal and vertical scrolling.

Full Screen: Hides the status and navigation areas and fills the entire screen with the web page. To exit full screen mode, press _____ (right action key) or _____ (left action key). You can

also tap and hold anywhere on the screen and uncheck **Full Screen**.

Show Pictures: Shows or hides pictures on web pages. Hiding pictures speeds up the time it takes to load pages.

- TIP You can send email from a web page. Email addresses appear as links on web pages. After you configure an email application on your smartphone, you can select an email link to create a message to that address.
- TIP To send a link, press Menu and select
 Tools > Send Link via E-mail. Select the
 Messaging account you want to use to send
 the link.
- **TIP** If Internet Explorer Mobile does not recognize a phone number as dialable, you can copy the phone number (as text) and paste it into the Phone Dial Pad.
- **5** Do any of the following:
 - To view the previous page, press
 Back (left action key) or
 Backspace (+).
 - To refresh the page with the latest content from the Internet, press

- **Menu** (right action key) and select **Refresh**.
- To scroll through the page in One Column View or Default View, press
 Up ▲ or Down ▼. In Desktop View, press Up ▲, Down ▼, Left ◀, or Right ▶ to scroll in all directions.
- To follow a link to another web page, press Up
 or Down
 to highlight the link, and then press Center
 to go to the selected page. You can also tap the link on the screen with your stylus.
- To adjust the size of the text on web pages, press Menu (right action key), select Zoom, and then select the size you want.
- To view a web page's properties, press Menu (right action key) and select Tools > Properties.
- To view each item in a list, tap the list with your stylus.
- In a list, press Left

 or Right

 to cycle between items, and press
 Center

 to accept the change.
- In a form, such as a browser search field, press Center to interact

- with the form, and then press **Center**to stop interacting with the form.
- **6** Press **OK** (a) to close Internet Explorer Mobile.

DID YOU KNOW? You can also start a web search from your Today screen by selecting the **Web search** field, entering the item you want to find, and then pressing **Center** on the **5-way**.

TIP To return to a recently viewed page, select the **address line** list, and then press **Down**. Use the **5-way** to select a Web address from the list (press **Center** to return to the Web address).

TIP If you browse to a secure web page, the Lock icon in the address line appears closed instead of open.

Creating a favorite

Favorites lets you bookmark a web page so that you can instantly access it without entering the web address.

- **1** Go to the page you want to mark as a favorite.
- 2 Press **Menu** (right action key) and select **Add to Favorites**.

- 3 (Optional) Select Name and enter a different description.
- **4** (Optional) Select the folder where you want to create the favorite.
- **5** Select **Add**.

TIP Create the folders where you want to store your favorites first. Once you create a favorite, you can't move it to another folder.

Viewing a favorite

- 1 Press **Start** and select **Internet Explorer**.
- 2 Select **Favorites** (left action key).

Organizing your favorites

You can create folders for organizing your favorites. For example, you can store travel links in one folder, stock links in another, and business links in a third folder.

- 1 Press **Start** and select **Internet Explorer**.
- 2 Select **Favorites** (left action key).
- 3 Select the Add/Delete tab.
- 4 Select New Folder.
- **5** Enter a name for this folder, and then select **Add**.
- 6 Press OK .

TIP To delete a favorite or folder, select **Favorites** (left action key). Select the **Add/ Delete** tab, highlight the item you want to delete, and then select **Delete**. Select **Yes** to confirm the deletion, and then press **OK**.

Downloading files and images from a web page

You can download files that are usable on your smartphone, such as new applications, MIDI ringtones, or pictures that are specifically tagged for download.

- **1** Go to the page that contains the link to the file you want to download.
- 2 Press **Left** ◀ or **Right** ▶ to highlight the link to the file.
- 3 Press and hold Center , and then select Save As to download a file, or tap and hold, and then select Save Image to download an image.
- **4** Select **Name** and enter a new name for the file.
- 5 Select the Location list, and then select where you want to store the file: Main memory or Storage card.
- 6 Select the **Folder** list, and then select the folder where you want to save the file.
- 7 Press OK .

DID YOU KNOW? The security certificates and 128-bit SSL strong encryption let you browse secure sites, such as online shopping, banking, and email. Remember that some secure sites also require specific browsers and may not work with Internet Explorer Mobile. Ask the organization for an alternate access point that is compatible with Internet Explorer Mobile.

CHAPTER

Copying text from a web page

You can copy text from a web page and paste it into other applications.

- 1 Use the stylus to highlight the text you want to copy.
- 2 Press **Menu** (right action key) and select **Edit** > **Copy**.
- **3** Go to the application in which you want to paste, and then position the cursor where you want to paste the text.
- 4 Press **Menu** (right action key) and select **Edit** > **Paste**.

TIP You can copy the text from the entire web page. Tap and hold on the page, and tap

Select All Text. Tap and hold on the page again, and tap Copy.

Using the History list

The History list stores the addresses of the pages you visited recently.

- 1 Press **Menu** (right action key) and select **History**.
- 2 (Optional) Select the **Show** list in the upper-left, and then select how you want to sort the **History** list.

3 Select the web page you want to view.

Customizing your Internet Explorer Mobile settings

- 1 Press **Menu** (right action key) and select **Tools** > **Options**.
- 2 On the **General** tab, set any of the following options:

Home Page: Sets the page that appears when you open Internet Explorer Mobile. To use the page you were on when you opened the menu, select **Use Current**. To select the original home page, select **Use Default**.

Encoding: Sets the character set for the web pages you view.

3 Select the **Memory** tab and set any of the following options:

Save links to pages visited in the past: Sets how many days of activity the History list stores.

Clear History: Empties the History list.

Delete Files: Removes saved pages and Web files that you synchronized with your computer.

4 Select the **Security** tab and set any of the following options:

Allow cookies: Sets whether your smartphone accepts cookies (small files containing info about your identity and preferences). The page sends the file and stores it on your smartphone.

Clear Cookies: Deletes any cookies stored on your smartphone.

Warn when changing to a page that is not secure: Sets whether a message appears when you switch from a secure page to one that is not secure.

Warn when page content is blocked due to security settings: Sets whether a message appears when you attempt to open a page that does not meet your smartphone's security standards.

TIP Internet Explorer Mobile supports
JavaScript, Secure Sockets Layer (SSL), and
cookies, but does not support plug-ins (Flash,
Shockwave, and so on) or Java applets.

5 Press OK .

Connecting to devices with Bluetooth® wireless technology

With your smartphone's built-in Bluetooth® wireless technology, you can connect to a number of Bluetooth devices such as a headset, hands-free car kit, or GPS receiver, as well as to other phones and handhelds. For a list of hands-free devices with Bluetooth wireless technology that are compatible with your smartphone, go to www.palm.com.

If your computer is enabled with Bluetooth wireless technology, you can also synchronize wirelessly.

Setting up a Bluetooth connection

After you set up a connection with a Bluetooth device, you can communicate with that device whenever it is within range (about 30 feet) and your smartphone's Bluetooth feature is turned on.

- 1 If necessary, prepare the device you want to connect with to accept a new connection. Check the device's documentation for details.
- 2 Go to your Today screen, and then tap **Bluetooth 3**.

3 Check the **Turn on Bluetooth** box to turn on your smartphone's Bluetooth feature.

4 Select the **Devices** tab, and then select **New Partnership**.

5 Wait for your smartphone to search for devices and to display the device list.

6 Select the device you want to connect with, and then press **Next** (right action key).

7 Enter an alphanumeric passkey between 1 and 16 characters long, and then press **Next** (right action key).

IMPORTANT Some Bluetooth devices have a built-in passkey; others let you choose the passkey. See the documentation for the Bluetooth device for more info.

- **8** If the passkey is not built-in, enter the same passkey on the smartphone and the other Bluetooth device, and then press **Finish** (right action key).
- 9 If you're connecting to a headset or hands-free car kit, check the Hands Free box, and then press Finish (right action key).
- 10 If you're connecting to a GPS device, press Finish (right action key), select the COM Ports tab, select the GPS device you selected in step 6, and then select New Outgoing Port. Press Finish (right action key). After you set the partnership and COM port, you can configure the GPS settings (see Setting up a GPS device). Be sure to select the same port you have assigned for GPS here.

11 Press OK .

You can now communicate with this device whenever it is within range (about 30 feet) and your smartphone's Bluetooth feature is turned on (see steps 2 and 3 earlier in this section).

DID YOU KNOW? If you're using a hands-free Bluetooth device and it is within range, your smartphone routes all calls to the hands-free device instead of to your smartphone's earpiece. Bluetooth range is up to 30 feet in optimum environmental conditions.

TIP Your smartphone supports only call audio with Bluetooth headsets. It does not support stereo music playback with Bluetooth headsets (enabled with Bluetooth A2DP profile).

TIP To delete the established partnership with a device, go to the Bluetooth Settings screen and select **Devices**. Highlight the connection you want to remove, press and hold **Center** on the **5-way**, and then select **Delete**. The deleted device can no longer automatically connect with your smartphone.

Sending information over a Bluetooth connection

You can send an individual entry or file.

- **1** Make sure the receiving device is ready to receive a Bluetooth connection.
- **2** Highlight the entry or file you want to send.
- 3 Press **Menu** (right action key) and select **Beam**... (the menu item changes names based on the type of item you highlighted).

4 Select the receiving device in the list. A red icon indicates an IR connection, and a blue icon indicates a Bluetooth connection When the transmission is complete, "Done" appears next to the name of the receiving device.

TIP Check your battery level before establishing a Bluetooth connection. If the battery level is low, you can't make a Bluetooth connection.

Receiving information over a Bluetooth connection

- 1 Go to your Today screen, and then tap **Bluetooth** 3.
- **2** Check the **Turn on Bluetooth** box to turn on your smartphone's Bluetooth feature.
- 3 Press OK ^(⊗).
- 4 If you have already set up a partnership with the transmitting device, your smartphone is ready to receive the info. If you haven't set up a connection, check the **Make this device**discoverable to other devices box to let the device find your smartphone and request a connection.

When your smartphone is receiving info, a notification tells you that a transmission is in progress. To stop the transmission, press Cancel (left action key); to close the notification, press Dismiss (right action key).

TIP If you have trouble receiving info over a Bluetooth connection, press **Start** and select **Settings**. Select the **Connections** tab, and then select **Beam**. Make sure the **Receive all incoming beams** box is checked.

DID YOU KNOW? The Bluetooth icon on your Today screen indicates the status of your smartphone's Bluetooth feature:

Gray = Bluetooth off.

Blue = Bluetooth on.

White = Connected to a Bluetooth device. Headset = Call in progress with a Bluetooth headset or car kit.

Synchronizing over a Bluetooth connection

BEFORE YOU BEGIN Make sure your computer is equipped with Bluetooth wireless technology and that you installed the synchronization software on the CD that came with your smartphone.

- CHAPTER
- 1 Set up your computer for Bluetooth wireless communication. See the documentation that came with your computer for details. In most cases your computer must support the Virtual Serial Port profile and this profile must be turned on.
- 2 Set up ActiveSync on your computer for Bluetooth wireless communication. See ActiveSync Help on your computer for details.
- **3** Go to your Today screen, and then tap **Bluetooth 3**.
- 4 Check the Turn on Bluetooth box to turn on your smartphone's Bluetooth feature.
- 5 Press OK .
- **6** Press **Start** and select **Programs**.
- 7 Select ActiveSync .

- 8 Press Menu (right action key) and select Connect via Bluetooth.
- **9** If this is the first time you're making a Bluetooth connection to this computer, follow the onscreen prompts to set up a Bluetooth partnership with this computer.
- 10 Select Sync.
- 11 When synchronization has finished, press **Menu** (right action key) and select **Disconnect Bluetooth**.

TIP Wi-Fi® routers, microwaves, and wireless telephones using the 2.4GHz band may interfere with Bluetooth connections. For best results, move away from this equipment when making a Bluetooth connection. If you cannot move away, move the Bluetooth devices closer to improve the reception.

Beaming information with IR

Your smartphone is equipped with an IR (infrared) port that lets you beam

information to another device with an IR port. The IR port is located on the top of your smartphone, between the antenna and the Ringer switch, behind the small dark shield.

TIP For best results, the path between the two devices must be clear of obstacles, and both devices kept stationary. If you have difficulty beaming, shorten the distance and avoid bright sunlight.

The type of information you can beam depends on the type of device you are beaming to. Windows Mobile devices are always compatible with the Treo 700wx smartphone.

Beaming a record

1 Highlight the entry or file you want to beam.

2 Press **Menu** (right action key) and select **Beam**... (the menu item changes names based on the type of item you highlighted).

- **3** Point the IR port on your smartphone directly at the IR port of the receiving device.
- **4** When the name of the receiving device appears, select it to begin the transfer. A red icon indicates an IR connection.
- **5** Wait for "Done" to appear next to the name of the receiving device before you continue using your smartphone.

Receiving beamed information

- **1** Turn on your screen.
- 2 Point your smartphone's IR port directly at the IR port of the transmitting device.
- **3** When the Receiving Data message appears, select **Yes** to receive the beam.

Start and select Settings. Select the Connections tab, and then select Beam. Make sure the Receive all incoming beams box is checked. If you still can't receive info, try a soft reset (see Resetting your smartphone).

Synchronizing over an infrared connection

- 1 Set up your computer to receive infrared beams. See ActiveSync Help on your computer for details.
- 2 Point your smartphone's IR port directly at the IR port on your computer.
- 3 On your smartphone, press **Start** and select **Programs**.
- 4 Select ActiveSync 🔂.
- **5** Press **Menu** (right action key) and select **Connect via IR**.
- 6 Select Sync.

Using your smartphone as a wireless modem

Your smartphone's data capabilities enable you to use your smartphone as a wireless modem for your laptop computer. Use this feature to send and receive email, browse the Internet, and access your company's network if you do not have another Internet

connection for your laptop. Use this feature to connect to the Internet when working remotely at airports and other locations.

BEFORE YOU BEGIN

- To use this service, you must have access to a wireless data network and a separate data service plan may also be required. Contact your wireless provider for more information.
- In addition, you must have a desktop application that supports this feature. Your wireless provider may provide a dedicated software application, or visit the following web site for additional instructions from Palm: www.palm.com/treo700wx-support.

Preparing your smartphone for a wireless modem connection

In order to use your smartphone as a wireless modem, you'll need to start the Modem Link application on your smartphone, and then complete the instructions at the Palm web site (provided at the end of the following steps).

1 On your smartphone press **Start** and select **Programs**.

- 2 Select Modem Link 📲 .
- **3** Press **OK** (a) to dismiss the message and open **Modem Link**.

- **4** Select the **Connection** list, and then select **USB**.
- **5** Press **Activate** (left action key).

- **6** To complete the configuration and connect your laptop to the Internet using your smartphone, complete the instructions at www.palm.com/treo700wx-support.
 - TIP You cannot sync your smartphone with your PC when **Modem Link** is activated. To deactivate **Modem Link**, complete step 1 through step 3 and press **Deactivate**.
 - TIP While your EVDO data connection is active, you can receive incoming calls and place outgoing calls; however, doing either of these suspends the data connection until you hang up the call.
 - **TIP** To stop incoming calls from interrupting a data session, see <u>Selecting your data settings</u>. This is useful when downloading large files.

Playing Media Files

Do you have a wallet bulging with photos of friends, family, pets, and your most recent vacation?

Are you tired of carrying both your MP3 player and your phone?

Your smartphone solves both problems. You can keep your favorite photos right on your smartphone—videos, too. And there's no need to carry an expensive MP3 player; you can play music on your smartphone. Simply transfer songs onto your smartphone or an expansion card and then listen through your stereo headphones.

Benefits

- Never be far from your favorite people, places, and songs
- Arrange your photos, videos, and songs
- No separate photo viewer, MP3, CD, or mini-disc player required

Pictures & Videos	119
Windows Media Player Mobile	128

Pictures & Videos

Your Palm® Treo™ 700wx smartphone comes with an easy-to-use, built-in, 1.3-megapixel camera with 2x digital zoom. You can use the camera to take and view pictures and videos and send them to your friends and family. To add a personal touch to your smartphone, use your pictures as your Today screen background, and as caller ID images, or use your videos to create video ringtones.

You can also move pictures and videos to a computer by synchronizing your smartphone with your computer.

DID YOU KNOW? Pictures are captured and stored in 16-bit color, JPG format. Resolution settings range from 1280 x 1024 to 160 x 120 pixels (1.3-megapixels to VGA). You can change the default setting. See <u>Customizing your Camera settings</u> for details.

Taking a picture

By default, pictures are stored in the My Pictures folder on your smartphone. If you want to store your pictures on an expansion card, see <u>Customizing your Camera settings</u> to change where pictures are stored. For information on accessing your pictures on your computer, see <u>Viewing pictures</u> and videos on your computer.

- 1 Press Start and select Pictures & Videos.
- 2 Select Camera 🔞.

3 Adjust the position of your smartphone until you see the subject you want to photograph on the screen.

4 (Optional) Adjust any of the following:

Zoom: Press **Up** ▲ to zoom in or **Down** ▼ to zoom out.

Brightness: Press **Right** ▶ to increase the brightness or **Left** ◀ to decrease the brightness.

Resolution: Press **Menu** (right action key) and select **Resolution** to change the image quality.

- (Optional) Set a 5-second timer: PressMenu (right action key), selectMode, and then select Timer.
- **6** Press **Center** to capture the picture or start the timer.
- 7 Hold your smartphone still until the picture renders, and then do one of the following:
 - Press **Camera** (left action key) to take another picture.
 - Press **OK** (a) to return to the Thumbnails View.

TIP If you see a camcorder icon below the preview image, video mode is on. To turn on the still camera, press **Menu** and select **Still Mode**.

TIP You can also adjust the zoom and brightness by pressing **Menu** and selecting **Zoom** or **Brightness**.

DID YOU KNOW? After three minutes of inactivity when previewing an image, the camera goes into standby mode. Press any key or tap the screen to return to the image preview.

Taking pictures in burst mode

Burst mode takes five pictures in quick succession, with one button press.

- 1 Press Start and select Pictures & Videos.
- 2 Press Camera (left action key).
- 3 Press **Menu** (right action key) and select **Mode** > **Burst**.
- 4 Press Center .

Recording a video

BEFORE YOU BEGIN You must have QuickTime Player version 6.5 or later installed on your computer to play videos recorded by your smartphone.

Videos can be any length, provided you have ample storage space available. By default, videos are stored in the My Pictures folder on your smartphone. If you want to store your videos on an expansion card, see <u>Customizing your Camera settings</u> to change where videos are stored. For information on accessing your videos on your computer, see <u>Viewing pictures and videos on your computer</u>.

- 1 Press Start and select Pictures & Videos.
- 2 Select Camera .
- **3** Press **Menu** (right action key) and select **Video Mode**.
- **4** Adjust the position of your smartphone until you see the subject you want to record on the screen.
- **5** (Optional) Adjust the following:

Brightness: Press **Right** ▶ to increase the brightness or **Left** ◀ to decrease the brightness.

Resolution: Press **Menu** and select **Quality** to change the video resolution. Press **Center** to start recording.

- 7 (Optional) To review the video in Windows Media Player Mobile, press Thumbnails (left action key), highlight the video, and then press Center . Press OK (a) to return to the Thumbnails View.

DID YOU KNOW? Videos are captured and stored in 3G2 format. Video resolution settings range from 352 x 288 to 176 x 144 pixels.

DID YOU KNOW? Your smartphone has a self-portrait mirror next to the camera lens on the back of your smartphone. Use the mirror when you're taking a picture or video and you want to be in the picture too.

DID YOU KNOW? If the Camera goes to standby while the recording is paused, the recording is stopped and the video clip is saved.

Viewing a picture or video

- 1 Press Start and select Pictures & Videos.
- **2** Select the picture or video you want to view. For more info on viewing videos, see <u>Playing media files on your smartphone</u>.
- 3 Press **OK** (a) to return to the Thumbnails View.

TIP To view pictures or videos in a different folder, select the **Show** list in the upper-left, and then select the album you want to view.

DID YOU KNOW? You can also download animated GIF files and view them in Internet Explorer Mobile.

Viewing a slide show

- 1 Press Start and select Pictures & Videos
- 2 Press **Menu** (right action key) and select **Play Slide Show**. The slide show plays automatically.
- 3 Press Center to display the slide show toolbar, which you can use to Rotate , Play , Pause , Reverse , Forward , and Stop the slide show.

TIP You can also press **Right** and **Left** on the **5-way** to move forward or backward through the slides.

Sending a picture or video

You can send a picture or video to other picture-enabled wireless smartphones or to an email address.

- 1 Press Start and select Pictures & Videos.
- **2** Highlight the picture or video you want to send.
- **3** Press **Menu** (right action key) and select **Send**.
- **4** Select the email account you want to use to send the picture or video.
- **5** Address and send the message.

DID YOU KNOW? You cannot send copyrighted pictures or videos that appear with a Lock icon in the Thumbnails View.

TIP You can send pictures and videos as email attachments.

Creating a video ringtone

You can save a video that you record as a ringtone.

1 Press **Start** and select Pictures & Videos.

- 2 Highlight the video you want to use as a ringtone.
- 3 Press Menu (right action key) and select Save to Contact Ring Tone.
- **4** Select the contact to whom you want to assign the ringtone.

NOTE Your device also supports the WMV and 3GP file formats for video ringtones.

Organizing pictures and videos

You can move or copy pictures and videos to other folders or between your smartphone and an expansion card.

- 1 Press Start and select Pictures & Videos.
- **2** Highlight the picture or video you want to move or copy.
- **3** Do one of the following:
 - To move the picture or video to another location, press Menu (right action key) and select Edit > Cut.
 - To keep the picture or video in two locations, press Menu (right action key) and select Edit > Copy.

- **4** Select the **Show** list in the upper-left, and select the location where you want to place the picture or video you selected in step 2.
- **5** Press **Menu** (right action key) and select **Edit** > **Paste**.

You can also view a specific folder or expansion card and arrange the pictures and videos by name, date, or size.

- 1 Press Start and select Pictures & Videos.
- 2 Select the **Show** list in the upper-left, and then select the folder you want to view.
- 3 Select the Sort By list in the upper-right, and then select the sort method:
 Name, Date, or Size.

Using a picture as the Today screen background

- 1 Press Start and select Pictures & Videos.
- 2 Highlight the picture you want to use.
- 3 Press Menu (right action key) and select **Set as Today Background**.

- 4 Select the **Transparency Level** list and select the appropriate level. Use a higher percentage for a more transparent picture and a lower percentage for a more opaque picture.
- **5** Press **OK** (a) to return to the Thumbnails View.

Editing a picture

- 1 Press Start and select Pictures & Videos.
- 2 Select the picture you want to edit.
- **3** Press **Menu** (right action key) and select **Edit**.
- 4 Do any of the following:
 - To rotate a picture 90 degrees counterclockwise, press
 Rotate (left action key).
 - To crop a picture, press **Menu** (right action key) and select **Crop**. Tap and drag the stylus to highlight the area to crop. Tap outside the box to stop cropping.

 To adjust the brightness and contrast levels of a picture, press Menu (right action key) and select AutoCorrect.

TIP To undo an edit, press **Menu** and select **Undo**. To cancel all unsaved edits you made to the picture, select **Revert to Saved**.

TIP For more extensive edits, just download your picture or video to your computer and edit it in your favorite graphics program. Then sync the picture or video back on your smartphone.

Deleting a picture or video

- 1 Press Start and select Pictures & Videos.
- 2 Highlight the picture or video you want to delete.
- **3** Press **Menu** (right action key) and select **Delete**.
- 4 Select Yes.

Customizing your Camera settings

1 Press Start and select Pictures & Videos.

2 Press Menu (right action key) and select Options.

3 On the **General** tab, set the following options:

Use this picture size: Sets the size of pictures you send with the Messaging application.

When rotating a picture, rotate 90 degrees: Sets the direction in which the pictures rotate.

4 Select the **Slide Show** tab and set the following options:

During slide shows, optimize for viewing: Sets whether pictures are optimized for portrait or landscape format during slide shows.

Play screensaver when connected to my PC and idle for 2 minutes: Sets whether the pictures in your My Pictures folder are used as a screensaver when your smartphone is connected to your computer and ActiveSync® software is not running.

5 Select the **Camera** tab and set the following options:

Save files to: Determines if pictures and videos are stored on your smartphone or on an expansion card.

Type filename prefix: Assigns a name to a series of pictures to be captured, such as Seattle001, Seattle002, and so on.

Still image compression level:

Sets the default size for newly captured pictures.

6 Select the **Video** tab and set the following options:

Include audio when recording video files: Turns the microphone on and off so that you can record videos with or without sound.

Time limit for videos: Limits the length of videos you record. You can also select the No limit option.

7 Press **OK** (a) to return to the Thumbnails View.

Viewing pictures and videos on your computer

When you synchronize your smartphone, your pictures and videos are copied to your desktop computer. You can view pictures in JPEG, GIF, BMP, and PNG format and videos in 3G2 and WMV format. You can also send them to friends using your desktop email application.

When you use ActiveSync to synchronize pictures and videos, the files are stored in C:\Documents and Settings\<Username>\My Documents\Treo My Documents

Windows Media Player Mobile

Windows Media Player Mobile can play music, audio, and video files that are stored on your smartphone or on an expansion card (sold separately) in any of the following file formats:

- WMA
- WMV
- MP3
- 3G2

You can listen to these music, audio, and video files through the speaker on the back of your smartphone or through a stereo headphone (3.5mm stereo headphone adapter or 2.5mm stereo headphone required, sold separately).

Transferring media files to your smartphone

BEFORE YOU BEGIN Do the following:

You must have Windows Media Player
 10 or later installed on your computer.
 See My media files won't sync.

 To sync media files with your computer, you must set the Media sync option.
 See Selecting which info to sync.

Use the Sync feature in the desktop version of Windows Media Player 10 to transfer digital music, audio, video, and playlist files from your computer to an expansion card or your smartphone. Using Sync ensures that the files transfer correctly.

- **1** On your computer, open Windows Media Player 10.
- 2 (Optional) Insert a 32MB or larger expansion card into your smartphone.
- 3 Connect your smartphone to your computer with the USB sync cable.
- **4** When the Device Setup Wizard opens on your computer, click **Automatic**.
- 5 Check the Customize the playlists that will be synchronized box.
- **6** Select the playlists you want to sync.
- 7 Click **Finish** to begin the transfer. The next time you connect your smartphone to your computer while the desktop version of Windows Media Player 10 is running, synchronization starts automatically.

TIP For tips on using the desktop version of Windows Media Player, go to the **Help** menu in Windows Media Player 10 on your computer.

TIP Be patient; transferring media files to an expansion card can take several minutes.

Playing media files on your smartphone

- 1 Press Start and select Windows Media
- 2 Press **Menu** (right action key) and select **Library**.
- **3** Select the **Library** list in the upper-left, and then select the library you want to use.
- **4** Select the item you want to play (such as a song, album, or artist name).
- **5** Press **Play** (left action key).
- **6** Use any of the following onscreen controls during playback:

Center ○ or ▶ Plays the current file.

Center or II Pauses the current file.

Left ◀ Skips to the beginning of the current file or to the previous file.

Right ▶ Skips to the next file.

Sets the point from which playback begins. Tap and drag the slider to change the current position.

Volume button or ① Increases the volume level.

Volume button or \bigcirc Decreases the volume level.

- Turns the sound on or off.
- Displays a video using the full screen.
- Displays a website where you can find music and videos to play.
- ★ Indicates the rating of the current file. Select the star to change the rating.
- 7 Press **Menu** (right action key) and select any of the following during playback:

Library: Displays the Library screen so you can select a different song to play.

Shuffle/Repeat > Shuffle: Plays the Now Playing playlist in random order. A check appears next to this command when it is on.

Shuffle/Repeat > Repeat: Plays the Now Playing playlist repeatedly. A check appears next to this command when it is on.

Stop: Ends playback.

- TIP If you can't find a media file on your expansion card, update the library (see Working with libraries).
- TIP To play a file that is not in a library, go to the Library screen, press **Menu**, and select **Open File**.
- on the Library screen, and then select **Open URL**. Select **URL** and enter the website address, or select **History** and select a site you've visited before.
- **TIP** To repeat the current song, press **Menu** and select **Repeat Song**.

Working with libraries

A library represents each of the storage locations available to Windows Media Player Mobile, such as your Treo device or

an optional expansion card (not included). Each library contains links to the media files in that location. Windows Media Player Mobile usually creates and updates the library automatically when you add media files for the first time. For example, when you add media files to your Treo device the My Device library is created. When you insert an expansion card containing media files, the Storage Card library is created. When you update a library, it automatically updates video files (WMV and 3G2) and audio files (WMA, MP3, QCP, and WAV).

- 1 Press **Start** and select **Windows Media**.
- 2 Press **Menu** (right action key) and select **Library**.
- **3** Press **Menu** (right action key) and select **Update Library**.
- **4** Wait for the files to be added, and then select **Done**.

DID YOU KNOW? When you update a library, it automatically updates video files (WMV and 3G2) and audio files (WMA, MP3, QCP, and WAV).

TIP To delete an item from a library: Highlight the item and then press and hold **Center** on the **5-way** to open the shortcut menu. Then select **Delete from Library**. Select **Yes** to confirm the deletion.

TIP If you don't see a media file that you added, manually update the library.

Working with playlists

A playlist is a list of media files that play in a specific order. You can use playlists to group audio files together or video files together for convenient playback. For example, in the desktop Player, you can create a playlist of upbeat songs for when you exercise and a playlist of soothing songs for a long flight. When you synchronize, your favorite playlists are automatically copied to your smartphone. Your playlists appear in your libraries (in the My Playlists category).

A temporary playlist, called Now Playing, appears on the Now Playing menu. It lists the currently playing file, as well as any

files that are queued up to play next. You can add to, modify, or clear the files on the Now Playing playlist.

1 Go to the Now Playing screen:

- If the Library screen is displayed, select the **Now Playing** category.
- If the Playback screen is displayed, press **Now Playing** (left action key).
- **2** Do any of the following:
 - To move a file up or down one slot, highlight the file, and then select
 Move Up or Move Down .
 - To add a file, select Add , press
 Menu (right action key), and then select Queue Up.

- CHAPTER
- To delete a file from the playlist, highlight the file, and then select
 Remove X.
- To view more info about a file, highlight the file and select
 Properties .
- To remove all items from the Now Playing playlist, press Menu (right action key) and select Clear Now Playing.

DID YOU KNOW? You can also move a file in the Now Playing playlist by tapping and dragging it to a new position.

TIP If you move files between your smartphone and an expansion card, be sure to update your libraries, or you won't be able to see the files in their new location.

Customizing Windows Media Player Mobile

- 1 If necessary, go to the Playback screen by pressing **OK** (a) to close the current screen.
- 2 Press **Menu** (right action key) and select **Options**.

3 On the **Playback** tab, set the following options:

Show time as: Sets whether the time remaining or time elapsed appears on the Playback screen.

Pause playback while using another program: Sets whether playback continues if you switch to another application.

Resume playback after a phone call: Sets whether playback continues after you finish a phone call. **4** Select the **Video** tab and set the following options:

Play video in full screen: Sets whether videos automatically play in full screen format.

Scale to fit window: Sets whether videos are automatically scaled to fit the Playback screen.

5 Select the **Network** tab and set the following options:

Protocol: Enables and disables the available protocols. You must select at least one protocol. You can also set a UDP Port.

Internet Connection Speed: Sets the speed of your network connection, and sets whether you want the device to detect the connection speed.

- **6** Select the **Library** tab and set whether you want to see the Library screen or the Playback screen when you open Windows Media Player Mobile.
- 7 Select the Skins tab and select Previous or Next to set the player's background.

8 Select the **Buttons** tab to change any of the available button settings:

- To assign a button, highlight the item you want to set, select **Assign**, and then press the button you want to use for that item.
- To restore an item's factory setting, highlight the item and select Reset.
- To unassign an item, highlight the item and select **None**.
- 9 Press OK 🐵.

PID YOU KNOW? You can also assign a button (for instance "s") to turn the screen off during music playback to preserve battery life. See Reassigning buttons for details.

DID YOU KNOW? If you close the Windows Media Player Mobile window, your music continues to play in the background.

Staying Productive

Your smartphone enables you to take your office with you—including your Microsoft Office files. With Microsoft Office, you can carry, create, view, and edit Microsoft Word and Excel files directly on your smartphone. You can also view, carry, and manage PowerPoint files on your smartphone. You can keep updated copies of the files on both your smartphone and your computer so that you can work on them in the most convenient location any time.

Benefits

- Manage Word, Excel, and PowerPoint files on your smartphone
- Improve productivity by taking important docs, spreadsheets, and presentations with you

In this chapter

Word Mobile	137
PowerPoint Mobile	142
Excel Mobile	144

Word Mobile

You can create and edit documents and templates and save them as DOC, RTF, TXT, and DOT files. You can also edit Microsoft® Office Word® documents and templates that you create on your computer. However, keep in mind that some of the information and formatting may be lost when you save the document on your smartphone.

The following features are not supported in Word Mobile:

- Backgrounds
- Bidirectional text
- Document protection
- Metafiles
- Artistic page borders (lined page borders are supported)
- Password-protected files (remove password protection on your computer before opening the file on your smartphone)
- Shapes and text boxes
- Smart tags

The following features are partially supported in Word Mobile:

- Picture bullets (regular bullets are supported)
- Revision marks (documents appear as though all revisions were accepted; if the document is saved, revision marks are lost)
- Table styles (some or all of the formatting is lost if the document is saved)
- Underline styles (unsupported styles are mapped to one of the four supported styles: regular, dotted, wavy, or thick/bold/wide)
- Legacy Pocket Word files (you can open PSW files, but if you edit a file, you need to save it in DOC, RTF, TXT, or DOT format)

The following features are not supported on your smartphone, but they remain in the file so that when you open the file on your computer, they appear as expected:

 Fonts and font sizes (original fonts are listed on your smartphone but are mapped to the closest font available)

- Footnotes, endnotes, headers, footers
- Lists (indented lists are mapped to the closest indentation level supported by Word Mobile)
- Page breaks (although undisplayed, all page breaks, except a break placed at the end of a document, are retained in the document)

TIP To copy a file from your computer to your smartphone, open My Computer or Windows Explorer on your computer, copy the file into the Mobile Device folder, and then sync.

Creating a document

- 1 Press **Start** and select **Programs**.
- 2 Select Word Mobile W.
- **3** Press **New** (left action key).
- 4 Enter the text of the document.
- **5** Press **OK** (a) to save the file.

DID YOU KNOW? When you save a new document, it is automatically named after the first several words in the file.

Opening an existing document

- 1 Press Start (a) and select Programs.
- 2 Select Word Mobile W.
- 3 In the documents list, select the document you want to open.

Creating a document from a template

- 1 Go to the documents list.
- 2 Select the **Folder** list in the upper-left, and then select **Templates**.
- 3 Open the template you want to use, and enter the information.
- 4 Press OK .
- **5** Rename the document and move it to the appropriate folder. See Organizing vour documents for details.

TIP If you don't see Templates in the Folder list, select More Folders to access this folder.

TIP To create a new template, highlight the document you want to save as a template. Press Menu and select Rename/Move. Select **Name**, and then enter a name for the template. Select the **Folder** list, and then select Templates. Press OK.

Finding or replacing text in a document

- 1 Open the document containing the text you want to find.
- 2 Press **Menu** (right action key) and select **Edit** > **Find/Replace**.
- 3 Select Find what and enter the text you want to find.
- **4** (Optional) Check the **Match case** box to find text that matches the capitalization in the text you entered in step 3.
- 5 (Optional) Check the Match whole words only box to find only full words that match the text you entered in step 3.
- 6 Select **Find** to locate the first instance of the text you entered in step 3, or select **Replace** and enter the replacement text.
- 7 Select Next to find the next instance of the text, or select Replace to replace it. To replace all instances of the text, select Replace All.
- 8 When you see a message that the search is done, press **OK** .

Moving or copying text

- 1 Open the document containing the text you want to move or copy.
- **2** Highlight the text you want to move or copy.
- 3 Press **Menu** (right action key) and select **Copy** to copy the text, or select **Cut** to move the text.
- **4** Open the document where you want to insert the text, and position the insertion point where you want the text to appear.
- **5** Press **Menu** (right action key) and select **Paste**.

TIP To zoom in or out, open a document, press **View**, select **Zoom**, and then select the zoom level.

Saving a copy of a document

- 1 Open the document you want to copy.
- 2 Press **Menu** (right action key) and select **File** > **Save As**.
- **3** Select **Name** and enter a new name for the file.

- **4** Select the **Folder** list, and then select the folder where you want to save the file.
- **5** Select the **Type** list, and then select the format in which you want to save the file.
- **6** Select the **Location** list, and then select whether you want to store the file on your smartphone or an expansion card.
- **7** Select **Save**.

TIP To zoom in or out, open a document, press **View**, select **Zoom**, and then select the zoom level

TIP If a document was previously saved on a computer, any unsupported formatting may be lost when you save the file.

Formatting text

- 1 Open the document you want to format.
- **2** Highlight the text you want to format.
- **3** Press **Menu** (right action key) and select **Format** > **Font**.
- **4** Set any of the following options for the highlighted text:

Font: Sets the typeface.

Font color: Sets the color.

Size: Sets the point size.

Bold: Indicates whether the text appears normal or thick.

Italics: Indicates whether the text appears upright or slanted.

Underline: Indicates whether the text appears with an underscore.

Highlight: Indicates whether the text appears with a yellow highlight.

Strikethrough: Indicates whether the text appears with a line through it.

5 Press **OK** (a) to return to the document.

Formatting paragraphs and lists

- 1 Open the document you want to format.
- **2** Position the insertion point in the paragraph you want to format.
- 3 Press **Menu** (right action key) and select **Format** > **Paragraph**.

- **4** Set any of the following options:
 - **Alignment:** Aligns the text with the left, right, or center of the paragraph.

List: Creates a bulleted or numbered list.

Indentation: Changes the paragraph margins.

- **Left:** Sets the left margin for the entire paragraph.
- **Right:** Sets the right margin for the entire paragraph.
- **Special:** Lets you indent the first line or set a hanging indent.
- **By:** Sets the size of the Special indentation.
- **5** Press **OK** (a) to return to the document.

TIP You can also use the Formatting toolbar to create a list and to align text. To indent text in lists, you must use the Formatting toolbar.

Checking spelling in a document

- 1 Open the document you want to check.
- 2 Press **Menu** (right action key) and select **Tools** > **Spelling**.

- **3** If you encounter an unknown or misspelled word, do one of the following:
 - Select the correct word in the list if the word is spelled incorrectly.
 - Select **Ignore** if the word is spelled correctly.
 - Select Add to add a new word to the spelling dictionary.

TIP To check the spelling of specific text, highlight it before you select the Spelling command.

Organizing your documents

You can rename your documents, move your documents to another folder, and move your documents between your smartphone and an expansion (storage) card.

- **1** Go to the documents list.
- 2 Highlight a file.
- **3** Press **Menu** (right action key) and select **Rename/Move**.
- **4** Select **Name**, and then enter a new name for the document.

- **5** Select the **Folder** list, and then select the folder you want to move the document to.
- 6 Select the Location list, and then select Main memory or Storage card.
- 7 Press OK 📵.
- **8** Select the **Folder** list in the upper-left, and then select the folder you want to view.
- **9** Select the **Sort By** list in the upper-right, and then select the sort method.

TIP To create a new folder, go to the documents list, select the **Folder** list in the upper-left, and then select **Add/Delete**. Select **New**, enter a name for the folder, and then press **OK**.

TIP When you go to a folder, you can easily search your documents by sorting by type.

Deleting a document

- **1** Go to the documents list.
- 2 Highlight the document you want to delete.
- 3 Press **Menu** (right action key) and select **Delete**.
- 4 Select Yes.

Customizing Word Mobile

- 1 Go to the documents list.
- 2 Press **Menu** (right action key) and select **Options**.
- **3** Set any of the following options:

Default template: Sets the default template for new documents.

Save to: Sets the default location where new documents are stored.

Display in list view: Sets the types of files that appear in the documents list.

4 Press OK .

PowerPoint Mobile

With PowerPoint Mobile, you can open and view slide show presentations created on your computer. Many presentation elements such as slide transitions, animations, and URL links are also supported. Microsoft® Office PowerPoint® features that are not supported on your smartphone include the following:

Notes written for slides

- Rearrangement or editing of slides
- Files created in PPT format earlier than Microsoft PowerPoint '97
- HTML files in HTM and MHT formats

Playing a presentation

- 1 Press **Start** and select **Programs**.
- 2 Select PowerPoint Mobile .
- **3** In the presentation list, highlight the presentation you want to play.
- 4 Press Center .
- **5** Do any of the following:
 - Press Right ► to advance to the next slide or Left
 to view the previous slide.
 - Press Menu (right action key), select Go to Slide, and select the slide you want to view.
 - Select **Next** or **Previous** to play animations.
 - Press Menu (right action key), select Zoom In, and then select ₱ to zoom in or ₱ to zoom out. To scroll within the current slide, tap and drag the slide. To return to the slide show, select ■.

 Press Menu (right action key) and select End Show.

TIP If a presentation is set up as a timed slide show, the slides advance automatically. Presentations pause during zooming.

Setting presentation playback options

- **1** Open the presentation for which you want to change the settings.
- 2 Press **Menu** (right action key) and select **Show Options**.
- **3** On the **Orientation** tab, select the orientation you want. To select the orientation that best fits your smartphone's screen, select **Default**.
- 4 Select the **Playback** tab, and check the **Override playback options for all files** box.
- **5** Set any of the following options:

Show without animation: Turns off builds and other animations.

Show without slide transition: Turns off transition effects between slides.

Use slide timings, if present: Enables the timings recorded with each slide in a presentation.

Loop continuously: Advances to the first slide after playing the last slide in a presentation.

6 Press OK .

TIP To turn the presentation into a continuously looping slide show, check both the **Use timings**, **if present**, and the **Loop continuously** boxes.

DID YOU KNOW? You can purchase SDIO presentation modules that let you project your PowerPoint Mobile presentations through an LCD projector.

Excel Mobile

With Excel Mobile you can create and edit workbooks and templates on your smartphone. You can also edit workbooks and templates that you create on your computer. However, keep in mind that you may lose some of the information and formatting when you save the workbook on your smartphone.

Note the following formatting considerations:

- Alignment: Vertical text appears horizontal.
- Borders: Appear as a single line.
- Cell patterns: Patterns applied to cells are removed.
- Fonts and font sizes: The original font is listed on your smartphone and mapped to the closest font available. Original fonts reappear on your computer.
- Number formats: Microsoft® Excel® 97 conditional formatting is displayed in Number format.
- Formulas and functions: Unsupported functions are removed, and only the returned value of the function appears.
 Formulas containing the following are also converted to values:
 - An array or array argument, for example, =SUM({1;2;3;4})
 - External link references or an intersection range reference
 - References past row 16384 are replaced with #REF!

- Protection settings: Most protection features are disabled but not removed. However, password protection is removed. You must remove the password protection in Microsoft® Office Excel® on your computer before opening the file on your smartphone.
- Zoom settings: Worksheet-specific zoom settings are not retained. The zoom setting applies to the entire workbook.
- Worksheet names: Names that refer to other workbooks, arrays, array formulas, or intersection ranges are removed from the name list, causing those formulas to be resolved as "#NAME?" All hidden names are not hidden.
- AutoFilter Settings: AutoFilters that cause rows to be hidden are supported. Use the Unhide command to display hidden rows. Other AutoFilters are removed, but you can use the AutoFilter command in Excel Mobile to perform similar functions.

 Chart Formatting: All charts are saved as they appear in Excel Mobile.
 Unsupported chart types are changed to one of these supported types: Column, Bar, Line, Pie, Scatter, and Area.
 Background colors, gridlines, data labels, trend lines, shadows, 3D effects, secondary axes, and logarithmic scales are turned off.

The following features aren't supported in Excel Mobile and are removed or modified when you open a workbook on your smartphone:

- · Hidden, dialog, and macro sheets
- VBA modules
- Text boxes
- Drawing objects and pictures
- Lists
- Conditional formats and controls
- Pivot table data (is converted to values)

TIP For simple calculations, use the Calculator (see <u>Calculator</u>).

TIP To copy a file from your computer to your smartphone, open My Computer or Windows Explorer on your computer, copy the file into the **Mobile Device** folder, and then sync.

Creating a workbook

- 1 Press Start and select Programs.
- 2 Select Excel Mobile .
- **3** Press **New** (left action key).
- **4** Highlight a cell where you want to enter text or other info.
- **5** Enter the info into the cell, and then press **Enter** (4).
- **6** Repeat steps 4 and 5 to enter the remaining info.
- 7 Press **OK** (a) to save the file.

TIP When you save a new workbook, it is automatically named and placed in the workbook list.

TIP To insert a symbol, place the insertion point where you want the symbol. Press

Menu and select Insert > Symbol. Highlight the symbol you want to insert, and then select Insert.

Creating a workbook from a template

- 1 Go to the workbook list.
- 2 Select the **Folder** list in the upper-left, and then select **Templates**.

- **3** Open the template you want to use, and enter the information you want to include in the template.
- 4 Press **Menu** (right action key) and select **File** > **Save As**.
- 5 Press OK .
- **6** Rename the workbook and move it to the appropriate folder. See <u>Organizing</u> <u>your documents</u> for details.

TIP To create a new template, highlight the workbook you want to save as a template. Press Menu, and select Rename/Move. Select Name, and then enter a name for the template. Select the Folder list, and then select Templates. Press OK.

Viewing a workbook

- 1 Press **Start** and select **Programs**.
- 2 Select Excel Mobile .
- 3 In the workbook list, select the workbook you want to view.
- **4** Press **View** (left action key), and then select any of the following:

Full Screen: Shows as much data as possible on the screen. To return to the

normal view, select **Restore** in the upper-right.

Zoom: Sets the magnification level so that you can easily read the worksheet.

Sheet: Lets you switch to a different worksheet.

Split: Divides the window into two scrollable areas. To move the split bar, tap and drag it. To remove the split bar, select **View** > **Remove Split**.

Freeze Panes: Locks rows or columns so they remain visible while you scroll. Highlight the cell at the juncture you want to lock before you select this command. To unlock the rows or columns, select View > Unfreeze Panes

Toolbar: Sets whether the toolbar appears onscreen.

Status Bar: Sets whether the status bar appears onscreen.

Show: Sets whether headings and scroll bars appear onscreen.

TIP To jump to a cell or a region, press Menu and select Edit > Go To. Select Cell reference or name and enter the target cell info or select Current region. Press OK.

DID YOU KNOW? You can also switch worksheets by selecting the sheet list at the bottom of the screen.

Calculating a sum

- 1 Press **View** (left action key) and select **Toolbar**.
- 2 Highlight the cell where you want to insert the sum.
- 3 Select Σ.
- **4** Tap and drag the stylus across the cells you want to add.
- 5 Press Enter .

Entering a formula

- **1** Highlight the cell where you want to enter the formula.
- 2 Enter an = sign followed by any values, cell references, name references, operators, and functions.

 Example: =(B4/

Example: =(B4/ 25)+100=Revenue-Expenses

3 Press Enter .

DID YOU KNOW? To enter symbols that are not on the keyboard, such as the = sign, press **Alt** and select the symbol from the list.

Inserting a function

- **1** Open the workbook where you want to insert the function.
- 2 Press **Menu** (right action key) and select **Insert** > **Function**.

- **3** Select the **Category** list, and then select the type of function you want to insert.
- **4** Select the **Function** list, and then select the specific function you want to insert.
- 5 Press OK .

Entering a sequence automatically

- 1 Highlight both the cells containing the info you want to automate and the adjacent destination cells.
- 2 Press **Menu** (right action key) and select **Edit** > **Fill**.

- **3** Select the **Direction** list, and then select the direction you want to populate.
- 4 Select the **Fill type** list, and then select **Series**.
- 5 Select the Series type list, and then select the type of series you want. If you select Date or Number, enter a Step value increment.
- 6 Press OK .

TIP Select **Autofill** as the series type to quickly fill cells with repetitive data such as numbers or repeated text. Autofill takes the content of the first cell in the highlighted row or column and copies it down or across the rest of the selection.

Adding cells, rows, and columns

- 1 Open the workbook you want to add to.
- **2** Highlight the area where you want to insert elements.
- 3 Press **Menu** (right action key) and select **Insert** > **Cells**.
- **4** Select how you want to insert the elements:

Shift cells right: Inserts a new cell. The highlighted cell and all cells on the right move one column to the right.

Shift cells down: Inserts a new cell. The highlighted cell and all cells below it move down.

Entire row: Inserts a new row. The entire row in which the highlighted cell is located and all rows below it move down.

Entire column: Inserts a new column. The entire column in which the highlighted cells are located and all columns to the right move one column to the right.

5 Press OK .

TIP To add a new worksheet, press Menu and select Format > Modify Sheets. Select Insert, enter a name for the worksheet, and then press OK. To change the order of the worksheets, highlight a worksheet you want to move, and then select Move Up or Move Down. Press OK to finish.

Formatting cells

- 1 Open the workbook you want to format.
- 2 Highlight the cells you want to format.
- **3** Press **Menu** (right action key) and select **Format** > **Cells**.
- **4** Select any of the following:

Size: Sets the row height and column width.

Number: Sets the format for the numbers in the cells.

Align: Sets whether text wraps within the highlighted cells, and sets the

horizontal and vertical alignment position.

Font: Sets the typeface, color, size, and style attributes.

Borders: Turns borders on and off for various cell edges, and sets the border and background colors.

5 Press OK .

TIP To name the highlighted cell or range of cells, press **Menu** and select **Insert** > **Define Name**. Enter the name and select **Add**. Press **OK**.

Formatting rows and columns

- **1** Open the workbook you want to format.
- 2 Highlight the rows or columns you want to format.
- 3 Press Menu (right action key), and then select Format > Row or Format > Column.
- 4 Select any of the following:

AutoFit: Adjusts the size of the highlighted rows or columns to their contents.

Hide: Hides the highlighted rows or columns.

Unhide: Displays hidden rows or columns in the highlighted area.

DID YOU KNOW? You can adjust the column or row size by tapping and dragging the right edge of the column header or the bottom edge of the row header.

Renaming a worksheet

- 1 Open the workbook containing the worksheet you want to rename.
- 2 Press **Menu** (right action key) and select **Format** > **Modify Sheets**.
- 3 In the **Sheets** list, highlight the worksheet you want to rename.
- 4 Select **Rename**, enter a new name for the worksheet, and then press **OK** (a) twice.

Sorting info in a worksheet

- **1** Highlight the cells you want to sort.
- 2 Press **Menu** (right action key) and select **Tools** > **Sort**.
- **3** Select the **Sort by** list, and then select the primary sort column.

- 4 Check or uncheck the **Ascending** box to indicate whether you want to sort in ascending or descending order.
- **5** (Optional) Select the **Then by** lists, and then select second and third level sorting options.
- 6 Check or uncheck the Exclude header row from sort box to indicate whether you want to sort the header row.
- 7 Press OK .

Filtering info in a worksheet

- 1 Highlight the cells that contain the info you want to filter.
- 2 Press **Menu** (right action key) and select **Tools** > **AutoFilter**. A list appears at the top of each related column.
- **3** Select one of the new lists, and then select a filter. This hides all rows that do not include the selected filter.
- **4** (Optional) Select the other lists, and then select other filters.

DID YOU KNOW? You can also create custom filters where you specify comparisons. Select the **filter** list, and then select **Custom**.

TIP To display all rows again, select the **filter** lists, and then select **All**. To turn off filtering, press **Menu** and select **Tools** > **AutoFilter** again.

Creating a chart

- **1** Open the workbook you want to create a chart from.
- 2 Highlight the cells you want to include in the chart.
- 3 Press **Menu** (right action key) and select **Insert** > **Chart**.
- 4 Select the type of chart, and then press **Next** (right action key).
- **5** Confirm the area you want the chart to include, and then press **Next** (right action key).
- 6 Select the data layout, and then press **Next** (right action key).
- 7 Check the boxes to indicate whether the first row and column represent labels.

- 8 Select whether you want the chart to appear as a separate worksheet within the current workbook, or as part of the current worksheet.
- **9** Press **Finish** (right action key).

Formatting or changing a chart

- 1 Open the workbook that contains the chart you want to format.
- 2 Open the chart.
- 3 Press **Menu** (right action key) and select **Format** > **Chart**.
- **4** Select any of the following:

Titles: Sets the title of the chart and headings, whether a legend appears, and the where the legend is placement.

Scale: Sets the minimum and maximum scales for charts with an *x* or *y* axis.

Type: Sets the chart style. You can use this setting to convert your chart to a different format

Series: Lets you add, modify, format, or delete related data points without affecting the info in your worksheet.

5 Press OK .

Finding or replacing info in a workbook

- 1 Open the workbook containing the info you want to find.
- 2 Press **Menu** (right action key) and select **Edit** > **Find/Replace**.
- 3 Select Find what and enter the info you want to find.
- 4 (Optional) Check the **Match case** box to find text that matches the capitalization in any text you entered in step 3.
- 5 (Optional) Check the Match whole words only box to find only whole words that match any text you entered in step 3.
- 6 Select **Find** to locate the first instance of the info you entered in step 3, or select **Replace** and enter the replacement info.
- 7 Select Next to find the next instance of the info, or select Replace to replace it. To replace all instances of the info, select Replace All.
- **8** When you see a message that Excel Mobile has finished searching, press **OK** (a).

Organizing your workbooks

You can rename your workbooks, and move them to another folder and between your smartphone and an expansion (storage) card.

- **1** Go to the workbook list.
- **2** Select a file.
- **3** Press **Menu** (right action key) and select **Rename/Move**.
- **4** Select **Name**, and then enter a new name for the workbook.
- **5** Select the **Folder** list, and then select the folder you want to move the workbook to.
- 6 Select the Location list, and then select Main memory or Storage card.
- 7 Press OK 🐵.
- 8 Select the **Folder** list in the upper-left, and then select the folder you want to view.
- **9** Select the **Sort By** list in the upper-right, and then select the sort method.

TIP When you go to a folder, you can easily search your documents by sorting by type.

Deleting cells, rows, and columns

- 1 Open the workbook containing the elements you want to delete.
- 2 Highlight the area you want to delete.
- 3 Press **Menu** (right action key) and select **Edit** > **Delete Cells**.
- **4** Select how you want to remove the elements:

Shift cells left: Deletes the highlighted cells and moves all cells on the right one column to the left.

Shift cells up: Deletes the highlighted cells and moves all cells below them up.

Entire row: Deletes the entire row in which the highlighted cells are located, and moves all rows below it up.

Entire column: Deletes the entire column in which the highlighted cells are located, and moves all columns on the right one column to the left.

5 Press OK .

TIP To delete a workbook, go to the workbook list and highlight the workbook you want to delete. Press **Menu** and select **Delete**. Select **Yes** to confirm.

TIP To delete a worksheet, press **Menu** and select **Format** > **Modify Sheets**. Highlight the worksheet you want to delete, and then select **Delete**. Select **Yes**, and then press **OK** to finish.

DID YOU KNOW? Excel Mobile adjusts formulas to reflect the new cell locations. However, a formula that refers to a deleted cell displays the #REF! error value.

Customizing Excel Mobile

- 1 Go to the workbook list.
- 2 Press **Menu** (right action key) and select Options.
- **3** Set the following options:

Template for new workbook: Sets the default template for new workbooks.

Save new workbooks to: Specifies where new workbooks are stored.

Files to display in list view: Specifies which types of files appear in the workbook list.

4 Press OK .

Managing Files and Applications

Your smartphone comes equipped with a variety of tools for managing and organizing your information. To get the most out of your smartphone, install some of the thousands of business, education, or leisure-time applications available. After you use your smartphone to create or capture important business and personal information, use one of several options to share it with others. Insert expansion cards (sold separately) for a compact and limitless answer to the storage dilemma. And because there's a calculator on your smartphone, you never need to carry a separate one.

Benefits

- Locate info in any application
- Install applications, games, and other software
- Keep others up-to-date with meaningful business and personal information
- Store, carry, and exchange info
- Always have a calculator with you

In this chapter

Using Find	157
Installing applications	158
Removing applications	161
Setting synchronization options	161
Sharing info	165
Using expansion cards	166

Using Find

With the built-in search features on your smartphone, you can find information quickly:

- Lookup: Helps you find and dial your contacts by name or phone number.
 See <u>Dialing by contact name</u> for details.
- **Search:** Looks through the text in all the applications on your smartphone.
- **File Explorer:** Lets you browse through the files and folders on your smartphone or an expansion card.
- Global Address Lookup: Enables you to look up names in your online corporate address list.

Using Search

Search for files and other items stored in the My Documents folder on your smartphone or on an expansion card. You can search by file name or by words located in the item. For example, you can search for words within notes, appointments, contacts, and tasks.

- 1 Press **Start** and select **Programs**.
- 2 Select **Search** \bigcirc .

- 3 Select **Search for**, and then enter the file name, word, or other info you want to find.
- **4** Select the **Type** list, and then select the kind of information you want to find.
- **5** Press **Search** (left action key).
- **6** Use the **5-way** to select and view an item from the results of the search.

TIP You can also open the Search screen by pressing **Option** + **left Shift**.

TIP If you've looked for an item before, select the **Search for** list, and then select the item in the list.

Exploring files and folders

File Explorer lets you browse the contents of folders on your smartphone. The root folder on your smartphone is named My Device. My Device is similar to My Computer on your computer.

- 1 Press **Start** and select **Programs**.
- 2 Select File Explorer 🦫.
- **3** Select the **Show** list in the upper-left, and then select the folder you want to explore.
- 4 Do any of the following:
 - To open an item, select it.
 - To quickly delete, rename, beam, or email an item, highlight the item, press and hold **Center** to open the shortcut menu, and then select the appropriate command.
 - To move a file to another folder, highlight the item, press and hold
 Center to open the shortcut menu, and then select Cut or Copy.
 Open the destination folder, and press and hold Center to open the shortcut menu, and then select
 Paste.

• To highlight multiple items, tap and drag the stylus.

IMPORTANT Do not delete any files that you cannot identify. These files may be required for your smartphone to function properly.

DID YOU KNOW? You can sort the contents of a folder by name, date, size, or type. Select the **Sort by** list in the upper-right, and then select the sort method.

TIP The storage card symbol appears next to the names of files that are stored on an expansion card.

Installing applications

Your Palm® Treo™ 700wx smartphone comes with several built-in and ready-to-use applications. You can also install any of the additional software included on the *Getting Started CD* as well as other third-party applications that are compatible with Windows Mobile® 5.2 devices, such as business software,

games, and more. To learn more, go to www.palm.com.

Applications you download to your computer are likely to be in a compressed format such as ZIP. If the file is compressed, you need to use a decompression utility on your computer, such as Winzip, before you install the application on your smartphone.

These instructions tell you how to install basic files onto your smartphone. Some software uses an installer or wizard to guide you through the process. Consult the documentation that came with the software for details.

TIP If an application does not have a Microsoft Mobile to Market certificate, you will see a message indicating that the application is untrusted. If this occurs, you can indicate whether you want to continue the installation.

Be sure to select and install Microsoft Windows Mobile 5.2 software for Pocket PC Phone Edition. Microsoft Windows Mobile 5.2 software for Smartphone is not compatible with your Treo 700wx smartphone.

Installing applications from the Internet

You can use Internet Explorer Mobile to install Windows Mobile apps in the CAB file format directly from the Internet. You must use your computer to install apps in other file formats.

- 1 Make sure your phone is on (see Turning your phone on and off).
- 2 Press **Start** and select **Internet Explorer**.
- **3** Go to the page that contains the link to the application you want to download.
- 4 Press Left

 or Right

 to highlight the link to the file, and then press Center

 to start the download process.
- **5** Press **Start** and select **Programs**.
- 6 Select **File Explorer** .
- 7 Go to the My Documents folder.
- **8** Tap the file you downloaded to start the installation program.

DID YOU KNOW? You can purchase a third-party application that lets you run Palm OS® applications on your Treo 700wx smartphone.

TIP Before purchasing a third-party program, try the free version.

Installing applications from your computer

application from your computer to your smartphone, you must first install the ActiveSync software on your computer (see Installing the desktop synchronization software).

- **1** Open My Computer or Windows Explorer on your computer.
- 2 Copy the application file(s) into the **Mobile Device** folder.
- **3** Connect your smartphone to your computer to synchronize and install the application(s) on your smartphone.

Installing applications onto an expansion card

- 1 Insert the expansion card into the expansion card slot (see <u>Removing and inserting expansion cards</u>).
- 2 Open the **ActiveSync®** window on your computer.
- 3 Click **Tools** and select **Explore Device**.

- 4 Double-click My Windows
 Mobile-Based Device to open the
 Mobile Device folder.
- 5 Copy the application file(s) into the Storage Card folder inside the Mobile Device folder.

Getting help with third-party applications

If you encounter a problem with a third-party application (such as an error message), contact the application's author or vendor. For general troubleshooting of third-party applications, see Third-party-applications.

Make sure that the third-party application supports 240x240 screen resolution. Some older applications have screen-size limitations. Third-party applications should also be written for Windows Mobile version 5.2 or later. Programs written for earlier versions do not support 5-way navigation or action keys and can have performance problems. If you can try a free version of the software before purchasing it, you can test it first to make sure it works properly.

Removing applications

To free up memory on your smartphone, you can remove applications that you no longer use. You can remove only applications, patches, and extensions that you install; you cannot remove the built-in applications that reside in the ROM portion of your smartphone.

- 1 Press **Start** and select **Settings**.
- 2 Select the **System** tab, and then select **Remove Programs** .

- **3** Highlight the application that you want to remove.
- 4 Select Remove.
- **5** Select **Yes** to confirm deletion.

TIP Some applications are factory-installed on your smartphone and cannot be deleted.

These are not listed in the Remove Programs list.

Setting synchronization options

Selecting which info to sync

- 1 Press **Start** and select **Programs**.
- 2 Select ActiveSync 🔂.
- **3** Press **Menu** (right action key) and select **Options**.

- 4 Do any of the following:
 - Check the box next to any items you
 want to synchronize. If you cannot
 check a box, you might have to
 uncheck a box for the same
 information type elsewhere in the list.
 - Uncheck the box next to any items you want to stop synchronizing.
 - Select an item and then select
 Settings to customize the settings for that item. Settings are not available for all items.

Synchronizing with an Exchange Server

You can sync directly with an Exchange Server, using a connection to either a wireless network or a computer.

- 1 Press **Start** and select **Programs**.
- 2 Select ActiveSync 🔂.
- 3 Press Menu (right action key) and select Configure Server. If you have not yet set up a sync with an Exchange Server, this says Add Server Source.
- 4 Select **Server address**, enter the name of the server running the Exchange Server, and then press **Next** (right action key).
- **5** Enter your name, password, and domain, and then press **Next** (right action key). To change the rules for resolving synchronization conflicts, select **Advanced**.
- **6** Check the boxes next to the type of info that you want to synchronize with the Exchange Server.
- 7 Press **Finish** (right action key)

DID YOU KNOW? You can also use the Sync Setup Wizard to set up your smartphone to synchronize remotely with Exchange Server. This wizard starts when you connect your smartphone to your computer after installing ActiveSync on your computer.

Synchronizing with two computers

You can set up your smartphone to synchronize with up to two computers as well as with an Exchange Server. When synchronizing with two computers, the items that you synchronize appear on both computers.

For example, if you set up your smartphone to sync different items with two computers named C1 and C2, when you sync Contacts and Calendar on your smartphone with both computers, you see the following result:

- The contacts and calendar appointments that were on C1 are now also on C2.
- The contacts and calendar appointments that were on C2 are now also on C1.
- The contacts and calendar appointments from both computers are on your device.

NOTE Microsoft® Office Outlook® email can synchronize with only one computer.

TIP To stop synchronizing with one computer completely, select the computer name and then select **Delete**.

Synchronizing using Bluetooth wireless technology

The computer with which you connect must have Bluetooth® wireless technology, either built-in or through a Bluetooth card. Make sure that the computer's Bluetooth setting is discoverable.

- On your computer, right-click the ActiveSync icon in the system tray, and select Connection Settings.
- 2 Check the Allow connections for one of the following box, and then select Bluetooth.
- 3 On your smartphone, press **Start** and select **Settings**.
- 4 Select the **Connections** tab, and then select **Bluetooth** §.
- 5 Check the Turn on Bluetooth box.
- 6 Press OK 🐵.
- 7 Press Start and select Programs.
- 8 Select ActiveSync 🔂.

- 9 Press **Menu** (right action key) and select **Connect via Bluetooth**. If this is the first time you're making a Bluetooth connection to this computer, follow the onscreen prompts to set up a Bluetooth partnership with the computer.
- 10 In ActiveSync, select Sync.
- 11 When synchronization has finished, press **Menu** (right action key) and select **Disconnect Bluetooth**.
- 12 (Optional) Go to your Today screen, select **Bluetooth** , and then uncheck the **Turn on Bluetooth** box to conserve power by turning off your smartphone's Bluetooth feature.

DID YOU KNOW? You can also connect your smartphone to your computer with an infrared (IR) or a Bluetooth® wireless connection.

Starting and stopping synchronization

If ActiveSync is running on your computer and you connect your smartphone to your computer, synchronization begins automatically. If you ever need to manually start or stop synchronization, follow these steps:

- 1 Connect your smartphone to your computer (see <u>Connecting your smartphone to your computer</u>). If you are synchronizing wirelessly only with an Exchange Server, you do not have to connect the device.
- 2 Press **Start** and select **Programs**.
- 3 Select ActiveSync .

TIP If synchronization doesn't start automatically, press **Start** and select **Programs**. Select **ActiveSync** and then select **Sync** to start synchronization.

TIP To end synchronization before it completes, select **Stop**.

Setting the synchronization schedule

You can schedule wireless synchronization to occur automatically at regular intervals. If you prefer to synchronize manually, do not turn on these settings.

1 Connect your smartphone to your computer (see <u>Connecting your smartphone to your computer</u>). If you are synchronizing wirelessly only with an Exchange Server, you do not have to connect the device.

- 2 Press **Start** and select **Programs**.
- 3 Select ActiveSync 🔂.
- **4** Press **Menu** (right action key) and select **Schedule**.
- **5** Set any of the following options:

Peak times: Sets the frequency for high-traffic time periods such as when you are at work or when email volume is high.

Off-peak times: Sets the frequency for low-traffic time periods such as late at night.

Use above settings while roaming:

Sets the frequency while you are roaming outside your wireless provider network. To minimize roaming charges, uncheck this box and synchronize manually while roaming.

Send outgoing items immediately:

Sets whether items are sent as soon as you select Send in the Messaging application, or whether they are held until the next synchronization.

6 Press OK .

TIP The auto shut-off timer resets itself each time you synchronize. If your sync interval is shorter than the auto shut-off interval, your smartphone doesn't turn off.

DID YOU KNOW? Decreasing the sync frequency settings conserves battery power.

Sharing info

Your smartphone comes equipped with a variety of options for sharing information, so that you can choose the quickest, most convenient way to send your info or to receive info from another device.

- When you have a file open in a program such as Notes or PowerPoint Mobile, you can easily share a file by pressing Menu, and then selecting Send via E-Mail or Beam File.
- In Outlook, you can insert a picture or attach a note or other file to an email.
 You can also receive pictures and attachments.
- ActiveSync® enables you to share files with your computer. You can add or

remove files directly from the Treo My Documents folder, located in your My Documents directory on your computer. These files are updated the next time you sync.

- If you are near someone, you can beam files and applications between your smartphone and your neighbor's device using the IR port or Bluetooth® wireless technology.
- You can also store files on an expansion card and share the expansion card.

Using expansion cards

The expansion card slot on your smartphone enables you to add SD cards and MultiMediaCard cards to extend the storage capacity of your smartphone. For example, SD or MultiMediaCard expansion cards can store the following:

- Pictures
- Videos
- MP3 audio files

- Email attachments
- Games
- eBooks
- Applications
- Databases

When purchasing an SDIO card, make sure the card is compatible with the Treo 700wx smartphone.

Expansion cards are sold separately. Your smartphone comes with a dummy card inside the expansion card slot, to protect the slot. When you do not have a functioning card inside the slot, reinsert the dummy card to protect the slot opening.

- **TIP** Check with the card manufacturer to confirm compatibility before purchasing an SDIO card.
- TIP We recommend that you purchase preformatted expansion cards. To format a card on your own, you need to connect a card reader (sold separately) to your computer.
- **TIP** SD cards are faster than MultiMediaCard cards for reading and writing information.

Removing and inserting expansion cards

- **1** Press down and release the dummy card.
- **2** After you feel the expansion card slot eject the dummy card, remove the card from the slot.

- 3 To insert an expansion card, hold your smartphone with the screen facing you and the card with the label facing you. The notch on the card should be in the lower-left corner next to the antenna.
- 4 Insert the card into the expansion card slot until you feel it lock into place and hear the confirmation tone.

Opening applications on an expansion card

After you insert an expansion card into the expansion card slot, you can open any of the applications stored on the expansion card.

- 1 Insert the expansion card into the expansion card slot.
- 2 Press **Start** and select **Programs**.
- 3 Select File Explorer.
- **4** Select the **Show** list in the upper-left, and then select **Storage Card**.
- **5** Select the application you want to open.

TIP To run an application on an expansion card, your smartphone must have enough free space in the internal memory.

Saving files to an expansion card

You may find it helpful to automatically save the info on an expansion card. For example, when you create new Word Mobile documents, notes, Excel Mobile workbooks, pictures, videos, and audio files, you can save them directly to an expansion card. (Some applications may not support this feature.)

- 1 Insert an expansion card into the expansion card slot.
- **2** Open the application you want to save the info from.
- 3 Press **Menu** (right action key) and select **Options**.
- 4 Select the **Save to** list, and then select **Storage Card**.
- 5 Press OK .

TIP If you don't see the Save to list on the Options screen, look on the other tabs (if present). If you still can't find a Save to list, the application may not support this feature.

Moving info between your smartphone and an expansion card

- 1 Insert an expansion card into the expansion card slot.
- **2** Open the application from which you want to move the info.
- **3** Go to the list view and highlight the item(s) you want to move.
- **4** Press **Menu** (right action key) and select **Rename/Move**.
- Select the Location list, and then select where you want to move the info:Storage Card or Main Memory.
- 6 Press OK .

Copying or moving applications and files between your smartphone and an expansion card

- 1 Insert the expansion card into the expansion card slot.
- 2 Press Start and select Programs.
- **3** Select **File Explorer**.
- **4** Select the file or application you want to copy or move (see <u>Exploring files and folders.</u>).

- 5 Press Menu (right action key) and select Edit > Copy or Edit > Cut.
- **6** Go to the folder where you want to place the selected item.
- 7 Press **Menu** (right action key) and select **Edit** > **Paste**.
- 8 Press OK .
 - **TIP** Your applications are usually located in the My Device / Program Files folder.
 - TIP Before copying information to or renaming the files or folders on an expansion card, or renaming the card itself, make sure the card is not write-protected. See the instructions that came with your card for details.

Viewing available expansion card memory

You can view how much space is available on the expansion card that is currently in the expansion card slot.

- 1 Insert the expansion card into the expansion card slot.
- 2 Press **Start** and select **Settings**.
- 3 Select the **System** tab, and then select **Memory**.

- 4 Select the Storage Card tab.
- 5 Press OK .

Exploring files on an expansion card

- 1 Insert the expansion card into the expansion card slot.
- 2 Press Start and select Programs.
- 3 Select File Explorer.
- **4** Select the **Show** list in the upper-left, and then select **Storage Card**.
- **5** Select the folder or files you want to view.
- 6 Press OK .

Renaming an expansion card

If you change the contents of an expansion card, you may at some point want to rename the card to better match its contents.

- 1 Insert the expansion card into the expansion card slot.
- 2 Press **Start** and select **Programs**.
- 3 Select File Explorer.
- 4 Select the **Show** list in the upper-left, and then select **My Device**.

- IAPTER
- **5** Highlight the current expansion card name (**Storage Card** by default).
- **6** Press **Menu** (right action key) and select **Rename**.
- **7** Enter a new name for the card.
- 8 Press OK .

Customizing Your Smartphone

Customizing is optional. But why not personalize your smartphone to make it match your lifestyle and work even harder for you?

You can easily customize your smartphone's sounds, fonts, screen colors, and more. Take advantage of various levels of security. Prevent making an accidental (and expensive) phone call by locking the keyboard. Some preference settings can help extend the life of your smartphone's battery. There are lots of ways to make your smartphone work better for you.

Benefits

- Conserve power
- Secure your data
- Make your screen easy to read

In this chapter

Connection settings

Today screen settings

Selecting your Today screen background

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Today** .

- 3 On the Appearance tab, check the Use this picture as the background box.
- 4 Select Browse.
- **5** Select the picture you want to use.
- 6 Press OK .

DID YOU KNOW? There are lots of third-party plug-ins available for your Today screen. For clocks, calculators, MP3 players, weather guides, and much more, visit www.palm.com.

Selecting which items appear on your Today screen

- 1 Press Start and select Settings.
- 2 On the **Personal** tab, select **Today**

- 3 Select the **Items** tab.
- 4 Check the boxes next to the items you want to appear on your Today screen, and uncheck any items that you want to hide.
- 5 (Optional) Select Options (if available) to configure the settings for the current item. Press OK (a) to return to Today Settings.
- 6 Press OK .

TIP To change the color theme for your smartphone, select a new theme from the **Appearance** tab in **Today Settings**.

Phone settings

BEFORE YOU BEGIN Turn on your phone to access your Phone Settings. See <u>Turning</u> your phone on and off.

Selecting ringtones and vibrate settings

You can set various tones for various types of incoming phone calls and notifications.

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Sounds & Notifications O**.
- **3** Select the **Notifications** tab.

4 Select the **Event** list, and then select which type of call or notification you want to set the ringtone for:

Phone: Known Caller: An incoming call from someone in your **Contacts** list or **Speed Dial** list.

Phone: Missed call: A call you did not answer.

Phone: Roaming: A call that comes in when you're outside your home wireless network.

Phone: Unknown Caller: An incoming call from someone identified by caller ID who is not in your Contacts list or Speed Dial list.

Phone: Voice mail: A new voicemail.

- **5** Select the **Ring type** list, and then select the ring style for the selected type of call.
- **6** Select the **Ring tone** list, and then select the sound for the selected type of call.

NOTE For the **Missed call** and **Voice mail** options, select sound and display options instead of ring type and ring tone options.

- 7 (Optional) Select **Play** (Optional) Select **Play** (Optional) to preview the sound.
- **8** Check the **Vibrate when**... boxes to turn the vibrate feature on/off based on the Ringer switch setting.
- **9** Repeat steps 4–6 to select ringtones for other types of calls.
- 10 Press OK (18).

TIP To record, preview, delete, and send sounds on your smartphone, select the Manage tab. To record a sound, press Menu and select New Sound. To play a sound, select it. To delete a sound, highlight it and press Backspace. To send a sound, highlight it, press Menu, and select Send Sound.

DID YOU KNOW? You can also set sounds for messaging notifications and calendar reminders. See .

DID YOU KNOW? You can download MP3, MIDI, QCELP, WAV, and WMA ringtones directly to your smartphone (see <u>Downloading files and images from a web page</u>). You can also download ringtones to your computer and then email them to your phone. Your device also supports the video ringtone formats WMV, 3GP, and 3G2 (video files recorded from your smartphone camera).

Adjusting volume settings

- Call volume: While a call is in progress, press the Volume button (on the side of your smartphone) to adjust the call volume.
- Music/Video volume: While playing music or a video, press the Volume button to adjust the music/video volume.

Ringer volume: When a call is not in progress and you are not playing music or a video, press the **Volume** button to adjust ringer volume.

Assigning a picture and ringtone ID to a contact

- 1 Press **Start** and select **Contacts**.
- 2 Highlight the contact to whom you want to give a picture caller ID, and then press **Center** .
- 3 Highlight the contact's name, and press **Edit** (left action key).
- 4 Select Picture.
- **5** Select **Camera** to take a picture and add it to this contact entry, or select an existing picture for this contact entry.
- **6** Select **Ring tone** and then select a tone for this contact entry.

Selecting your call settings

BEFORE YOU BEGIN Turn on your phone to access your Phone Settings. See Turning vour phone on and off.

1 Press **Start** and select **Settings**.

- 2 On the **Personal** tab, select **Phone** \(\bigc\).
- 3 On the **Phone** tab, set any of the following options:

Dialpad: Sets the style for the dial pad tones (DTMF) in the Phone application.

- **Short tones:** Tones sound briefly as you dial.
- Long tones: Tones continue to sound until you release the key.

TTY/TDD: Lets you configure your smartphone for use with a TTY/TDD device for people who are deaf or hard of hearing.

After calls from numbers that are not in Contacts, ask if I want to add them: Indicates whether you are prompted to add contact entries for numbers that are not already in your Contacts list.

4 Press OK (®) to finish.

TIP If you have trouble accessing a voicemail system, try changing the Dialpad tone setting.

Setting your dialing preferences

Dialing preferences let you assign a prefix to your phone numbers. For example, you can automatically dial a 1 before all 10-digit phone numbers. You can add a different prefix based on the length of the phone number.

1 Press **Start** and select **Settings**.

- 2 On the Personal tab, select Phone &.
- **3** On the **Dialing** tab, set any of the following options:

Dialing from North America: Formats phone numbers using North American conventions (XXX-XXX-XXXX).

Always dial 1 in front of the area code: Adds a 1 in front of 10-digit phone numbers. This option is available only when North American Dialing is enabled.

International Dialing Prefix: Adds the specified number in front of international phone numbers. (When an international number beginning with "+" is dialed, the "+" is replaced with the number in this field.)

4 Press **OK** (®) to finish.

Setting your abbreviated dialing preferences

Abbreviated dialing is used to automatically dial a complete phone number when you enter a shortened version of that number. Shortened phone numbers are typically used in corporate phone systems that allow internal users to dial an extension number rather than the complete number.

For example, if your co-worker's phone number is 1-555-222-1234, you may need to dial only the last five digits of that number from an internal phone. In that case, you would dial 21234. If that shortened five-digit internal number is entered in your contact list or in a corporate Global Address List (GAL), your Treo 700wx smartphone will attempt to dial an incomplete number because it is not on the internal phone network.

If that is the case, use the abbreviated dialing settings to automatically complete shortened numbers. For example, if all the phone numbers in your office begin with 1-555-22, followed by a five-digit extension, set your smartphone to automatically enter 1-555-22 as the prefix before any five-digit number. When you enter your colleague's five-digit extension, your device automatically dials 1-555-22 plus the five-digit extension. The complete number is 1-555-222-1234.

- Press **Start** and select **Settings**.
- On the **Personal** tab, select **Phone** \(\bigcup_{\cdot}\).
- 3 On the **Dialing** tab, select **Abbreviated Dialing**, and then check the box that corresponds to the number of digits you want your smartphone to dial (3, 4, 5, 6, or 7). Selecting the option adds a prefix to numbers with the specified number of digits.

4 Press **OK** (a) to finish.

Selecting your data settings

- 1 Press Start and select Settings.
- 2 On the **Personal** tab, select **Phone** \(\bigl\).
- 3 Select the Services tab and select Data Settings.

- 4 Indicate whether you want to allow a voice call to interrupt a data session. text (SMS) messages will not be received on the device during any data session.
- 5 Press **OK** (a) to return to **Phone Settings**.
- 6 Press **OK** (a) to finish.

Selecting your privacy settings

- 1 Press Start and select Settings.
- 2 On the **Personal** tab, select **Phone (**.

Voice Privacy: Prevents over-the-air eavesdropping when this option is turned on and this feature is available on your wireless provider network.

Location Privacy: Indicates whether your smartphone broadcasts your location at all times or only during an emergency call.

- 4 Press **OK** lead to return to **Phone Settings**.
- **5** Press **OK** 📵 to finish.

TIP For quick access to the Location Privacy setting, tap the **Location Privacy** icon on your Today Screen.

Controlling your roaming experience

You can roam on other digital networks where your wireless provider has implemented roaming agreements with other carriers.

When you roam outside your wireless provider's network, the Roaming **R** icon appears at the top of the screen. Additional charges may apply if you use your Treo 700wx smartphone while roaming.

To learn more about roaming, contact your wireless provider.

Feature availability

- You can make and receive calls while roaming.
- Other features, such as call waiting and voicemail, may be available depending upon your roaming network.
- Data services may not be available when you are roaming on partner networks.

Setting roaming preferences

Use Roaming Preferences to set specific options for using your phone while roaming. For example, you can set an option to be notified that you are roaming before placing a call or making a data connection, so that you are aware that you might incur extra charges.

- 1 Press Start and select Settings.
- 2 On the **Personal** tab, select **Phone (**.
- 3 Select the **Services** tab, and then select **Roaming**.

4 Select the **Network Selection** pick list and select the networks with which you want to allow your phone to make a connection: **Allow roaming** enables your phone to determine the best network—either home or roaming—with which to connect.

Home network only allows your phone to connect only to your home networks.

Roaming networks only allows your phone to connect to roaming networks only.

5 Check the boxes to enable either or both of the following roaming warning options:

Before outgoing calls: Causes an alert to appear, warning you that you are on a roaming network when you attempt to dial an outgoing call.

Before data connections: Prevents a data connection while roaming. An alert appears, warning you that you are on a roaming network when you attempt to make a data connection.

6 Press OK .

TIP You can dismiss the warning and make the data connection by selecting the **Don't show this again. Always connect when roaming** box. You must then attempt to make a data connection again.

System sound settings

In certain situations, such as in meetings and theaters, you need to turn off all sounds on your smartphone. You can immediately silence all sounds on your smartphone, including phone ringtones, Calendar notifications, and system sounds. This does not mute the speaker during phone calls.

Setting the ringer switch

- 1 Slide the Ringer switch to Sound Mode Off

 ✓.
- 2 To hear all sounds again, slide the Ringer switch to Sound Mode On ■).

When you slide the Ringer switch back to the Sound Mode On position, it restores the previous sound settings. For example, if the smartphone ring volume is set to the loudest setting and you slide the Ringer switch to Sound Mode Off, you do not hear the smartphone ring. When you move the Ringer switch back to Sound Mode On, the smartphone ring volume is still set to the loudest setting.

TIP If the Ringer switch is set to Sound Mode Off, the ringer setting overrides the sound settings and all sounds are turned off, including any music you may be playing.

DID YOU KNOW? Your smartphone includes a silent alarm that can vibrate even when the ringer switch is set to Sound Mode Off.

Selecting Sounds & Notifications

- 1 Press Start (a) and select Settings.
- 2 On the **Personal** tab, select **Sounds & Notifications** .
- **3** On the **Sounds** tab, set any of the following options:

Events: Turns sounds on/off for system warnings and error messages.

Programs: Turns sounds on/off in the applications on your smartphone.

Notifications: Turns alarms and reminders on/off in the applications on your smartphone.

Screen taps: Turns sounds associated with tapping the screen on/off, and sets the volume level when this sound is turned on.

Hardware buttons: Turns sounds associated with pressing buttons on/off, and sets the volume level when this sound is turned on.

4 Select the **Notifications** tab and set any of the following options:

Event: Specifies which action you want to change the settings for. The remaining options vary based on the action you select.

Play sound: Lets you turn the sound on/off for the selected event. To select a different sound, select the list to the right of this setting and then select a different sound. To preview the sound, select **Play** .

Repeat: Indicates whether the sound plays more than once, if turned on.

Display message on screen: Indicates whether a notification message appears onscreen for the selected event.

Vibrate: Indicates whether your smartphone vibrates to notify you about the selected event.

5 Press OK .

TIP To record, preview, delete, and send sounds on your smartphone, select the Manage tab. To record a sound, press Menu and select New Sound. To play a sound, select it and press Play. To delete a sound, highlight it and press Backspace. To send a sound, highlight it, press Menu, and select Send Sound.

Display and appearance settings

Adjusting the brightness

- 1 Press **Option** , and then press .
- 2 Press **Left** ◀ and **Right** ▶ to adjust the brightness.
- 3 Press OK .

Changing the text size

- 1 Press **Start** and select **Settings**.
- 2 Select the **System** tab, and then select **Screen**.
- **3** Select the **Text Size** tab.
- 4 Press **Left** ◀ and **Right** ▶ to adjust the text size.

5 Press OK .

TIP If text looks rough around the edges, open the Screen Settings screen and select the Clear Type tab. Check the Enable Clear Type box, and then press OK.

Setting display formats

1 Press Start and select Settings.

- 2 Select the **System** tab, and then select **Regional Settings** .
- **3** On the **Region** tab, select a region from the list. The region selection sets the default format settings.
- **4** (Optional) Select any of the following tabs to customize the format settings:

Number: Sets the decimal symbol and number of decimal places, the digit

grouping symbol and group size, list separators, negative number sign symbol and format, leading zero display, and measurement system (metric versus U.S.).

Currency: Sets the currency symbol and position, the decimal symbol and position, the digit grouping symbol and group size, and the negative number format.

Time: Sets the time style, separators, and AM and PM symbols.

Date: Sets the short date style, separators, and long date style.

5 Press OK .

Aligning the screen

Occasionally, your screen can move out of alignment, causing the wrong feature to be activated when you tap the screen. If this occurs, you need to align your smartphone screen.

- 1 Press **Start** and select **Settings**.
- 2 Select the **System** tab, and then select **Screen** .

- 3 On the **General** tab, select **Align Screen**.
- **4** Tap the screen where indicated.
- 5 Press OK .

Changing the system color scheme

- 1 Press Start and select Settings.
- 2 Select the Personal tab, and then select Today .
- **3** Select the **Appearance** tab, and then select a theme in the list.
- 4 Press OK .

TIP You can also set the background for your Today screen (see <u>Selecting your Today</u> screen background).

Application settings

Arranging the Start menu

You can select which applications appear in the top level of the Start menu. You can still access the remaining applications by selecting Programs from the Start menu and then selecting the application's icon.

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Menus**
- 3 Check the boxes next to the applications you want to see in the Start menu.
- 4 Press OK .

Reassigning buttons

Buttons Settings lets you select which applications are associated with many of the buttons and key combinations on your smartphone.

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Buttons**
- 3 On the **Program Buttons** tab, highlight the button or key combination you want to change in the **Buttons** list. The hardware buttons are mapped to the following button numbers:

Start = Start Menu

OK 📵 = OK/Close

Option + Phone/Send = Internet Explorer

Option + Start = Calendar

Option • + OK • = Task Manager

Side button = Windows Media

- 4 Select the **Assign a program** list, and then select the application you want to assign to the button or key combination you selected in step 3.
- 5 Press OK .

Setting up voice commands

Voice commands enable you to use speech to execute some commands on the Start menu and the Programs menu.

- 1 Assign the **Side** button to **Voice Command**. See <u>Reassigning buttons</u> for details.
- 2 Press Start (*) and select Settings.
- 3 On the Personal tab, select Voice Command.
- 4 Select Enable.
- 5 Select the items you want to enable. If an item is highlighted and the **Options** box is active, select the **Options** box to choose the features you want enabled for the highlighted item.

Using voice commands

BEFORE YOU BEGIN Set the Ringer switch at the top of your smartphone to Sound Mode On.

- 1 Hold your device about nine inches away from your mouth, and then press and release the **Voice Command** button. A tone plays and a microphone icon appears at the top of your screen.
- 2 In a clear voice say the command. For example:
 - To access Help, say, "Help." After Voice Command finishes speaking, a microphone icon appears at the top of your screen. Say your answer. For example, say, "General" to access general Help topics.
 - To access your Calendar, say, "Start Calendar."
 - To access your music, say, "Start Windows Media." After Voice Command finishes speaking, a microphone icon appears at the top of your screen. Say your answer.

TIP You can interrupt during a question by pressing the Voice Command button. Once the microphone icon is visible you may say your answer.

Setting input options

- 1 Press Start and select Settings.
- 2 On the **Personal** tab, select **Input**
- **3** Select the **Word Completion** tab and set any of the following options:

Suggest words when entering text: Indicates whether word suggestions appear as you enter text. You can also specify how many letters you want to enter before a suggestion appears, how many suggestions you want to see, and whether a space appears after you insert a suggested word.

Replace text as you type: Indicates whether the text you type adds to existing text or replaces it. This is similar

- to the Insert function on a computer keyboard.
- **4** Select the **Options** tab and set any of the following options:

Voice recording format: Sets the format in which you save voice notes.

Default zoom level for writing: Sets the initial size of text entered using onscreen writing methods.

Default zoom level for typing: Sets the initial size of text entered using the keyboard.

Capitalize first letter of sentence:

Sets whether the first letter of a sentence automatically appears in

uppercase, without requiring you to press one of the Shift keys.

Scroll upon reaching the last line:

Sets whether the display automatically scrolls when you select the last line of visible info.

5 Press OK .

TIP To enter a suggested word, simply tap it.

Locking your smartphone and info

Your smartphone includes several features that help you protect your smartphone from inadvertent use and keep your information private. The built-in security software lets you use your smartphone for dialing emergency calls, even if it is locked.

 Keyguard: Manually disables all buttons and the screen's touch-sensitive feature to prevent accidental presses in your briefcase or pocket.

- Auto-Keyguard and touchscreen lockout: Automatically enables Keyguard after a period of inactivity and lets you disable the screen's touch-sensitive feature during an active call.
- Phone Lock: Requires you to enter a lock code when making calls.
- System password lock: Requires a password for displaying any information on your smartphone.

TIP To avoid accidentally pressing onscreen buttons while you're holding your smartphone up to your ear to speak, you can disable the screen's touch-sensitive feature during active calls. When the screen's touch-sensitive feature is disabled, you must use the 5-way navigator to access items on the screen.

Using Keyguard

By default, your keyboard locks so that you don't accidentally press buttons or activate screen items while your smartphone is in a pocket or bag.

• To disable **Keyguard**, press **Center** .

To manually turn on **Keyguard** when your smartphone screen is on, press Option and Power/End 2.

Using Auto-Keyguard and touchscreen lockout

Auto-Keyguard lets you automatically lock the keyboard after a period of inactivity.

- 1 Press **Start** and select **Settings**.
- 2 On the Personal tab, select Keyquard
- **3** Set any of the following options:

Auto-Keyguard: Sets the period of inactivity that passes before the keyboard automatically locks or before the auto-keyguard feature is disabled.

Disable touchscreen: Indicates whether the screen's touch-sensitive feature is enabled during a call.

4 Press OK (19).

TIP If you're using a headset or hands-free device and your smartphone is in a pocket or bag, you can manually turn on Keyguard during a call to prevent accidental key presses. Press Option and Power/End to manually turn on **Keyguard**.

Using Phone Lock

You can lock your smartphone to prevent unauthorized use of your account. When your smartphone is locked, you must enter a lock code to place calls, except for emergency numbers.

- 1 Press **Start** and select **Settings**.
- 2 On the **Personal** tab, select **Phone** \(\bigc\).

3 Select the **Security** tab and set the following options:

Auto-lock: Sets whether your smartphone locks automatically and when this occurs.

Change Lock Code: Lets you assign or change the lock code used to unlock your smartphone. Your default lock code is the last four digits of your phone number. If you change the lock code, select **OK** to accept your new code.

4 Press OK ® to finish.

TIP When Phone Lock is on, you can unlock your smartphone by going to the Today screen, entering your lock code, and then selecting Enter. You do not need to enter your password to answer a call.

Using the system password lock

To protect your personal information, you can lock the system so that you need to enter your password to access any of your information or use other features of your smartphone.

IMPORTANT If you lock your system, you must enter the exact password to unlock it. If you enter an incorrect password, you are given another chance. Each time an incorrect password is entered, you are given progressively longer time periods between your chances to enter the password. If you forget the password, you need to perform a hard reset to resume using your smartphone. Performing a hard reset deletes all the entries in your smartphone. However, you can restore all previously synchronized info the next time you sync (see Synchronizing contacts and other info).

- 1 Press **Start** and select **Settings**.
- 2 On the Personal tab, select Lock 🧖.

3 On the Password tab, check the Prompt if device unused for box to turn on the password feature.

- 4 Select the first list, and then select how long a period of inactivity must pass before you are prompted to enter a password to unlock the system.
- **5** Select the **Password type** list, and then select a format for your password.
- 6 Select **Password**, tap the onscreen keyboard icon, and enter your password. Then tap the onscreen keyboard icon.
- 7 Select **Confirm**, tap the onscreen keyboard icon, and enter the password again. Then tap the onscreen keyboard icon.

- **8** (Optional) Select the **Hint** tab and enter a hint to help you recall your password.
- 9 Press OK .

Entering owner information

You can enter personal information that you want to associate with your smartphone, such as your name, company name, and phone number. You can also indicate whether you want this information to appear when you turn on your smartphone. If you lose your smartphone, this feature can help the person who finds it return it to you.

- 1 Press Start (a) and select Settings.
- 2 On the **Personal** tab, select **Owner Information 3**.

- **3** On the **Identification** tab, enter any of the contact information you want to include.
- **4** Select the **Notes** tab and then enter any additional text you want to include.
- 5 Select the **Options** tab and check the boxes to indicate which info (if any) you want to appear on the screen when you turn on your smartphone.
- 6 Press OK .

TIP You can also display your Owner Information on your Today screen. See Selecting which items appear on your Today screen for details.

System settings

Setting the date and time

Clock & Alarms Settings lets you set the time zone, time, and date for your home location and a location that you visit.

- 1 Press Start (a) and select Settings.
- 2 Select the **System** tab, and then select **Clock & Alarms** .

- 3 On the **Time** tab, select **Home**.
- **4** Select the first list, and then select the time zone for your home location.

- 5 Select the hour, and then press Up ▲ or Down ▼ to increase or decrease the hour setting. Repeat this process for the minutes, seconds, and AM/PM settings.
- **6** (Optional) Select **Visiting** and set the info for a location that you visit often.
- 7 Press OK .
- 8 If prompted, select **Yes** to accept your changes.

TIP By default your smartphone synchronizes the date, time, and time zone with your wireless provider network whenever your phone is on and you are inside a coverage area. You can disable this option in Clock & Alarms Settings by selecting the **More** tab and then unchecking the **Enable local network time** box. If you want to keep your smartphone date and time set for your selected location, uncheck the **Use network time zone** box.

TIP To set the display format for the date and time, see <u>Setting display formats</u>.

Setting system alarms

System alarms let you set alarms that are not associated with a task or appointment. For example, you can use your smartphone as an alarm clock when you travel, or set alarms to remind you when it's time to take medication or pick up the kids.

- 1 Press Start and select Settings.
- 2 Select the **System** tab, and then select **Clock & Alarms** <a>O.
- 3 Select the Alarms tab.

- 4 Check a box to turn on that alarm.
- **5** Select the description next to the box you checked, and enter a description for the alarm.
- **6** Select the days of the week you want the alarm to go off. You can select multiple days for each alarm.
- 7 Select the time you want the alarm to go off, and then press **OK** .
- 8 Select ¾, check the boxes to select how you want the alarm to go off, and then press **OK** [®].

TIP To change the alarm sound, select the **alarm sound** icon, select the **Play Sound** list, and then select the alarm sound you want to use.

- 9 Press OK ® to finish.
- **10** If prompted, select **Yes** to accept your changes.

Managing identity certificates

Your smartphone may include preinstalled certificates. Certificates are digital documents that are used to authenticate and exchange information on networks. Certificates can be issued for a user, a device, or a service.

- 1 Press Start and select Settings.
- 2 Select the **System** tab, and then select **Certificates** ...
- **3** Select any of the following:

Personal: Displays certificates that establish your identity when you log in to a secured network, such as a corporate network.

Root: Displays certificates that identify the computers, such as servers, that you connect to. These certificates help prevent unauthorized users from accessing your smartphone and information.

4 Press **OK** (a) to finish.

TIP To delete a certificate, tap and hold the certificate in the list, and then select **Delete** from the shortcut menu.

Enabling error reporting

Error Reporting sends info that helps diagnose application errors for devices running Windows Mobile® software. When an error is detected, a text file is created. You can review the file and choose whether you want it delivered to technical support. The information is used by programming groups at Microsoft for quality control and is not used for tracking individual users or installations for any marketing purpose. The info that is collected is technical info about the state of your system when the error occurred. No documents (or any info contained in them) are intentionally sent with the report. To ensure further security, the report is transmitted by means of a secure connection and is kept confidential and anonymous in a limited-access database.

If your smartphone is connected to your computer when you send the error report, you are not billed for sending error

reports—provided your computer is connected to the Internet. If you use your wireless provider network to send an error report, data transfer charges apply.

- 1 Press **Start** and select **Settings**.
- 2 Select the **System** tab, and then select **Error Reporting** .
- **3** Select whether you want to enable or disable error reporting.
- 4 Press OK

 to finish.

TIP This error-reporting method meets the privacy regulations of the European Union (EU) as well as the Fair Information Practice Principles of the Federal Trade Commission. To view the Fair Information Practice Principles, visit the Federal Trade Commission website at www.ftc.gov/reports/privacy3/ fairinfo.htm.

Setting up a GPS device

If you purchased an optional Global Positioning System (GPS) receiver, your smartphone can show your exact location on a map.

1 Press **Start** and select **Settings**.

- 2 Select the **System** tab, and then select **GPS** .
- **3** On the **Programs** tab, select the **GPS program port** list, and then select the port for applications to use to access GPS info. This port must also be selected in your GPS application's configuration settings.
- 4 Select the **Hardware** tab.
- 5 Select the **GPS hardware port** list, and then select the port to which your GPS receiver is connected. This must be a different port from the one you set in step 3 as your program port. To connect to the GPS device using Bluetooth wireless technology, you must first set up a partnership between the two devices (see <u>Setting up a Bluetooth</u> connection.)
- 6 Select the **Access** tab and check the **Manage GPS automatically** box. This setting lets more than one application simultaneously access your GPS info.
- 7 Press OK (to finish.

Viewing memory usage

- 1 Press Start and select Settings.
- 2 Select the **System** tab, and then select **Memory**.
- **3** Select any of the following tabs:

Main: Displays the amount of memory assigned to your applications and info, as well as the amount of memory in use versus the available memory.

Storage Card: Displays the amount of memory available on an expansion card

that is inserted in the expansion slot on your smartphone.

Running Programs: Lists the applications that are in use on your smartphone. To switch to an application, highlight it and select **Activate**. To close an application, highlight it and select **Stop**. To close all open applications, select **Stop All**.

4 Press OK (a) to finish.

Viewing and optimizing power settings

- 1 Press Start and select Settings.
- 2 Select the **System** tab, and then select **Power** .
- **3** On the Battery tab, view the power remaining in your battery.

4 Select the **Advanced** tab and set whether your smartphone turns off automatically after a specified period of inactivity. You can assign various intervals for battery power and external power.

5 Press **OK** (a) to finish.

TIP To conserve additional battery power, adjust the display backlight setting. Press Start and select Settings. Select the System tab, and then select Backlight. On the Battery Power tab, set whether the display backlight turns off automatically after a period of inactivity.

Turning Wireless Services On/Off

- 1 Press **Start** and select **Settings**.
- 2 Select the **Connections** tab, and then select **Wireless Manager**.

- **3** Select **All** to turn all wireless features on/off.
- 4 Press OK ® to finish.

You can also turn wireless services on and off by tapping the signal-strength icon at the top of the screen and then selecting Wireless Manager.

NOTE The Wi-Fi selection appears only if a Wi-Fi card is installed in your smartphone. You must purchase and install a third-party Wi-Fi card to use this feature.

TIP To change the settings for one of the displayed wireless features, press **Menu** and select the wireless feature you want to change.

Connection settings

Setting up a Wi-Fi® connection

Many corporate organizations and public environments, such as coffee shops, airports, and libraries, offer access to a Wi-Fi network. A Wi-Fi network is a wireless local area network (WLAN) based on the 802.11 standard. When you purchase an optional Wi-Fi SDIO card, you can use your smartphone's built-in software to set up a Wi-Fi connection and quickly connect your smartphone to a Wi-Fi network when you're within range of an accessible Wi-Fi network.

Some Wi-Fi networks are known as *open networks* because they broadcast their name (SSID) and do not require a password. Other Wi-Fi networks broadcast their name but do require a password.

Networks that do not broadcast their name are known as *closed networks*. Follow the instructions for the type of network you want to connect to.

NOTE See <u>Regulatory Information</u> for additional guidance on using a Wi-Fi card with your Treo 700wx smartphone.

IMPORTANT Depending on where you are on a network and certain coverage conditions, you might experience interruptions with your phone operation while using a Wi-Fi card. Palm recommends that you turn off the phone radio when using any Wi-Fi card or remove the Wi-Fi card when not in use to ensure that you can always make and receive phone calls. For EMERGENCY calls, always remove the card from your smartphone to ensure optimal connectivity.

TIP Turning off the Bluetooth® feature may improve your Wi-Fi card performance. To turn the Bluetooth feature off, go to your Today screen, tap the **Bluetooth** icon, and then uncheck the **Turn on Bluetooth** box.

KEY TERM Wi-Fi access point (also called a *hotspot*) A network device with an antenna that provides wireless connections to a larger network.

KEY TERM SSID The name that identifies a Wi-Fi network. If a network does not broadcast its SSID, you must get the SSID from the system administrator in order to connect to the network.

Connecting to a network that broadcasts its name

Wi-Fi networks in public places often broadcast their network name. Your smartphone automatically attempts to detect some network settings, so you can connect to this type of network with minimal configuration.

- 1 Wake up your smartphone's screen (see Waking up the screen and turning it off).
- 2 Insert the Wi-Fi card into the expansion slot (see <u>Removing and inserting</u> expansion cards).

- **3** If the Multiple Networks Detected dialog box appears, select the network you want to connect to.
- **4** When the New Network Detected dialog box appears, select the type of network you want to connect to.
- **5** Press **Connect** (left action key) to connect to the network.
- **6** If prompted, enter the password provided by the system administrator.

DID YOU KNOW? You can conserve battery power by removing the Wi-Fi card or turning off a Wi-Fi connection when you are not planning to use it for an extended period.

TIP The wired equivalent privacy (WEP) encryption method is enabled by default and may interfere with your ability to connect to a network that broadcasts its name. See Connecting to a closed network to learn how to enable or disable WEP encryption.

Connecting to a closed network

Since closed networks have additional security features, your smartphone cannot detect the network's settings; you must obtain the settings from the system administrator and enter the settings

manually. You can also use these steps to manually create a connection with an open network.

- 1 Wake up your smartphone's screen (see Waking up the screen and turning it off), and then insert the Wi-Fi card into the expansion slot (see Removing and inserting expansion cards).
- 2 Tap Wi-Fi in the title bar.

- 3 Select the **Settings** link.
- 4 Select **Network Cards** ?:
- 5 Select Add New.
- **6** On the **General** tab, set the following:

Network name: Specifies the SSID provided by the system administrator.

Connects to: Specifies whether this connection connects to the Internet or to Work. You may need to select Work to access a corporate intranet.

This is a device-to-device (adhoc) connection: Indicates whether you're connecting to another device or to an access point (network).

7 Select the **Network Key** tab, and then set the following:

Authentication: Sets the method used to identify devices that connect to the network.

• **Open:** Indicates that the network uses open authentication.

- **Shared:** Indicates that the network uses shared authentication.
- WPA: Indicates that the network is a WPA network that uses 802.1x protocols.
- WPA-PSK: Indicates that the network is a WPA network that requires a pre-shared key (password).

Data Encryption: Sets the encryption method. The options in this list vary based on your Authentication setting.

- **Disabled:** Turns data encryption off.
- **WEP:** Turns on the wired equivalent privacy encryption method.
- TKIP: Turns on the temporal key integrity protocol encryption method. This method is often used to encrypt WPA and WPA-PSK connections.

The key is automatically provided:

Indicates whether you need to specify the Network key and Key index provided by your system administrator, or whether the network provides this information. The availability of these options varies based on your Authentication and Data Encryption settings.

8 Select the 802.1x tab, and then set the following if available (the settings vary based on your settings on the other tabs and on the supported features of your Wi-Fi SDIO card):

Use IEEE 802.1x network access control: Lets you set these parameters if required by the network.

EAP type: Specifies the extensible authentication protocol type.

9 Press OK .

Selecting a Wi-Fi network

After you set up a Wi-Fi connection, it's easy to connect to that network. If you have access to multiple Wi-Fi networks,

you can select which network you want to connect to.

- 1 Wake up your smartphone's screen (see Waking up the screen and turning it off), and then insert the Wi-Fi card into the expansion slot (see Removing and inserting expansion cards).
- 2 Tap Wi-Fi 1 in the title bar.
- 3 Select the **Settings** link.
- 4 Select Network Cards []?
- **5** Highlight the network you want to connect to.
- 6 Press and hold Center to open the shortcut menu, and then select Connect.

TIP Insert the Wi-Fi card into your smartphone to automatically connect to the Wi-Fi network you connected to most recently if it is available.

DID YOU KNOW? When you are browsing the Internet or performing another Wi-Fi activity, you can answer a call without interrupting that activity.

Managing ISP settings

Your smartphone is already set up to connect to the Internet using a high-speed data connection on your wireless provider network. To connect to the Internet, simply start Internet Explorer Mobile.

For special situations, such as connecting to your Internet service provider (ISP) or a remote access server (RAS), you can set up another connection. Before you begin, obtain the following information from your ISP or system administrator:

- ISP server phone number or access point
- Username
- Password
- 1 Press **Start** and select **Settings**.
- 2 Select the **Connections** tab, and then select **Connections**
- 3 On the Tasks tab, select Manage existing connections.
- 4 Select the Modem tab.

- 5 Highlight the connection you want to view or change, and then select Edit, or to create a new connection, select New.
- **6** Follow the onscreen instructions to edit or create the connection.

Connecting to a VPN

If you want to use your smartphone to access your corporate email account or other files on your corporate server, you may need to set up a virtual private network (VPN). A VPN enables you to log in to your corporate server through the company's firewall (security layer).

You need to set up a VPN to access a corporate server in either of the following situations:

- Your company's wireless local area network (LAN) is outside the firewall.
- Your company's wireless LAN is inside the firewall, but you are accessing the network from outside the firewall (for example, from a public location or at home).

Check with your company's system administrator to see if a VPN is required for accessing the corporate network. If you need a VPN, you must purchase and install a third-party VPN client to use this feature.

Before you begin setting up a VPN, ask your system administrator for the following information:

- Your username and password
- Your server's domain name
- Your server's TCP/IP settings
- Your server's host name or IP address
- **1** Install your third-party VPN client (see Installing applications).
- 2 Press Start (a) and select Settings.
- 3 Select the **Connections** tab, and then select **Connections**
- 4 On the Tasks tab, select Add a new VPN server connection.
- **5** Follow the onscreen instructions for entering the settings provided by your corporate system administrator.

TIP To manually start a data connection on your wireless provider network or another network, go to **Connections Settings**. On the **Tasks** tab, select **Manage existing connections**. Tap and hold the connection you want to start, and then select **Connect** from the shortcut menu.

VPN servers may require that you install specific VPN software (sold separately) on your smartphone. Go to www.palm.com for more information.

Setting up a proxy server

- 1 Press Start and select Settings.
- 2 Select the **Connections** tab, and then select **Connections** §.
- 3 On the Tasks tab, select Set up my proxy server.
- **4** Check both boxes near the top of the screen.
- **5** Select **Proxy server** and enter the proxy server name.
- 6 Press OK .

TIP To change settings such as the port number, proxy server type, or credentials, select **Advanced**.

Ending a data connection

If your service plan includes minutes-of-use fees for data connections, you can reduce costs by ending the data connection when you've finished browsing the web.

- 1 Use the stylus to tap the data arrows or on the title bar.
- 2 Select **Disconnect** from the **shortcut** menu.

Troubleshooting

Sometimes you need a helping hand. The topics in this chapter provide additional information for resolving common problems, transferring your info from another device, or improving the performance of your smartphone. You can also visit www.palm.com/treo700wx-support for even more up-to-date information.

Benefits

- Resolve common problems
- Transfer info from another device
- Improve the battery and memory performance of your smartphone

In this chapter

Transferring info from another device

Making room on your smartphone
Voice quality

Transferring info from Trouble installing the another device

For information on transferring your info from a previous Windows Mobile® device or from a Palm OS® device to your new Palm[®] Treo[™] 700wx smartphone, visit www.palm.com/treo700wx-support.

IMPORTANT To prevent your smartphone from malfunctioning, do not use a backup utility to transfer your info from another device to your new smartphone. In addition, do not use a backup utility to back up and restore your info if you update your device's operating system.

DID YOU KNOW? You can purchase a third-party application that lets you run Palm OS® applications on your Treo 700wx smartphone.

DID YOU KNOW? If you have questions about Windows Mobile, you can go to the Microsoft Windows Mobile website. Search for Palm devices or Pocket PCs for information.

desktop software?

The Getting Started CD installs the software and drivers that let you synchronize with Microsoft® Office Outlook® for Windows. You can also use the CD to install the Outlook software if it is not already on your device. You should install and open Outlook before you install or use the ActiveSync Software.

If you want to synchronize with a different personal information manager (PIM), you must install a third-party solution. Contact the PIM's author or vendor to learn whether software is available for your Treo 700wx smartphone.

- **1** Shut down your computer, and then turn it on again.
- 2 On your computer, click **Start > Control** Panel > Add or Remove Programs.
- **3** Remove Microsoft ActiveSync if it is on your computer.

- 4 Quit any active applications, including virus scanners and Internet security applications.
- **5** Make sure you're installing the version of the software that came with your smartphone on the Getting Started CD. Other versions may not work with this smartphone.
- 6 Make sure your computer profile includes administrator rights to install software. In large organizations, these are usually granted by the system administrator.

Resetting your smartphone

Performing a soft reset

Performing a soft reset is similar to restarting a computer. If your smartphone is not responding or you have trouble synchronizing with your computer, a soft reset may help.

- 1 Use one hand to press the **battery** door release, and use the other hand to slide the battery door downward to remove it from your smartphone.
- **2** Use the stylus tip to gently press the reset button on the back of your smartphone.
- **3** Wait for the progress bar on the Treo logo screen to fill before continuing to use your smartphone.

TIP You can also do a soft reset by unplugging your smartphone from a power source (if connected) and then removing the battery and reinserting it.

DID YOU KNOW? If the phone or Bluetooth signals were on before a reset, these signals automatically turn on after the reset.

Performing a hard reset

A hard reset erases all personal information, such as appointments, contacts, and tasks, as well as programs you have added, such as third-party software on your smartphone. Never do a hard reset without first trying a soft reset. You can restore previously synchronized information the next time you sync.

IMPORTANT Synchronize to restore your Outlook data, such as Outlook email, Calendar, Contacts, Notes, and Tasks. You can use a backup and restore solution

(make sure it's an application that's approved by Palm) to restore configurations and preferences such as speed-dial buttons, SMS entries, call log information, and personal settings.

A hard reset can tell you whether a problem stems from your smartphone or from an application installed on it. If you do not experience the problem after you perform a hard reset, the problem may be related to software you installed. See Third-party applications for suggestions

about diagnosing third-party software issues.

- 1 Use one hand to press the **battery** door release, and use the other hand to slide the battery door downward to remove it from your smartphone.
- 2 If the screen is off, press Power/End to wake up the screen.
- 3 While pressing and holding Power/End (2), use the tip of the stylus to gently press and hold the reset button on the back of your smartphone.
- **4** Continue pressing and holding both buttons until the "Frase all data?" prompt appears.
- **5** Press **Up** ▲ to confirm the hard reset.
- **6** Wait for the progress bar on the Treo logo screen to fill before continuing to use your smartphone.
- 7 (Optional) Sync your smartphone with your computer to restore your previously synchronized info. Connect your smartphone to your computer, press **Menu** (right action key), and then select **Programs** > **ActiveSync** > **Sync**. If you use a backup utility, you may also need to restore a

backup to recover additional info and settings.

TIP Some third-party applications do not create a backup on your computer when you synchronize. If you do a hard reset, you may lose info in these applications and you need to reinstall the application on your smartphone after the hard reset. Please contact the developer to find out if your info is backed up during synchronization.

DID YOU KNOW? When you synchronize after a hard reset, the source folder in My Documents changes from Treo My Documents to WM_your name.

Replacing the battery

Your smartphone comes with a replaceable battery. Be sure to use a replacement battery from Palm that is compatible with Palm Treo 700wx smartphones.

- 1 Press **Power/End** 2 to turn off the screen.
- 2 Use one hand to press the **battery** door release and use the other hand to slide the battery door downward to remove it from your smartphone.

- **3** Place a finger in the notch between the stylus and the battery and lift the battery up at a 45 degree angle.
- **4** Align the battery contacts with the phone contacts inside the battery compartment.
- **5** Insert the battery into the compartment at a 45 degree angle, pressing it into place. Slide the battery door onto the back of the smartphone until it clicks into place.
- **6** Wait for the screen to turn on, and then enable the network time or set the date and time when prompted.

TIP Be sure to dispose of your old battery in an evironmentally responsible and legal way. In some areas, disposal in household or business trash is prohibited.

DID YOU KNOW? Your smartphone stores all your info even when you remove the battery.

Performance

The applications are running slower than usual

- 1 Press **Start** and select **Settings**.
- 2 Select **System**, and then select Memory .
- 3 Select Running Programs.
- 4 Select **Stop All** to close all your open applications.
- 5 Press OK .

If the previous steps don't fix the problem, try doing a soft reset (see Performing a soft reset). If the problem persists, follow these steps to turn off the Voice Command setting, if it is enabled:

- 1 Press **Start** and select **Settings**.
- 2 Select the **Personal** tab, and then select Voice Command 2.
- 3 Uncheck the **Enabled** box.
- 4 Press OK .

TIP Be sure that third-party applications are compatible with Windows Mobile version 5.2 or later. Applications written for earlier versions can have performance problems. If you can try a free version of the software before purchasing it, you can test it first to make sure it works properly.

Battery performance

To extend the battery performance of your smartphone, turn off the applications and features that run in the background if they are not being used.

Turn off Bluetooth wireless technology

- **1** Go to your Today screen, and then tap Bluetooth 🚯.
- 2 Uncheck the **Turn on Bluetooth** box to turn off your smartphone's Bluetooth feature.
- 3 Press OK (18).

Turn off the Voice Command setting

- 1 Press Start and select Settings.
- 2 Select the **Personal** tab and then select **Voice Command**.
- 3 Uncheck the **Enabled** box.
- 4 Press OK .

Reduce the amount of time the backlight stays on when not in use

- 1 Press Start and select Settings.
- 2 Select the **System** tab, and then select **Backlight**.
- 3 Set the time interval on the Battery Power tab and on the External Power tab.
- 4 Press OK .

Adjust the screen brightness

- 1 Press Option , and then press .
- 2 Press **Left** ◀ and **Right** ▶ to adjust the brightness.
- 3 Press OK .

Adjust the automatic power off setting

1 Press **Start** and select **Settings**.

- 2 Select the **System** tab, and then select **Power** .
- **3** Select the **Advanced** tab and set whether your smartphone turns off automatically after a specified period of inactivity while on battery power.
- 4 Press OK (®) to finish.

Screen

The screen appears blank

- 1 When the time period specified in Backlight Settings expires, the screen dims; one minute later, the screen automatically turns off. Press any key except **Power/End** to wake up the screen. Pressing **Power/End** hangs up the call.
- **2** Look closely at the screen. If you can see a dim image, try adjusting the screen brightness (see <u>Adjusting the brightness</u>).
- **3** If that doesn't work, perform a soft reset (see <u>Performing a soft reset</u>).

- 4 If that doesn't work, connect your smartphone to the AC charger (see Charging the battery) and perform a soft reset again.
- **5** If that doesn't work, perform a hard reset (see <u>Performing a hard reset</u>).

The screen doesn't respond accurately to taps or it activates wrong features

- **1** Make sure there is no debris trapped under the edges of the screen.
- 2 Press **Start** and select **Settings**.
- 3 Select the **System** tab, and then select **Screen**.
- 4 On the **General** tab, select **Align Screen**.
- **5** Follow the onscreen instructions for aligning the screen.
- 6 Press OK .

TIP To find carrying cases that protect the screen, and other useful accessories, visit www.palm.com

TIP Make sure that the third-party applications support 240x240 screen resolution. Some older applications have screen-size limits.

Network connection

Signal strength is weak

- 1 If you're standing, move about 10 feet in any direction.
- 2 If you're in a building, move near a window. Open any metal blinds.
- **3** If you're in a building, move outdoors or to a more open area.
- 4 If you're outdoors, move away from large buildings, trees, or electrical wires.
- 5 If you're in a vehicle, move your smartphone so that it's level with a window

TIP Become familiar with low coverage areas where you live, commute, work, and play, so you know when to expect signal strength issues.

My smartphone won't connect to the wireless network

1 Try the preceding suggestions for weak signals.

- **2** Turn off your smartphone and turn it on again (see <u>Turning your phone on and off</u>).
- **3** Perform a soft reset (see <u>Performing a soft reset</u>).
- 4 Depending on where you are on a network and certain coverage conditions, you might experience interruptions with your phone operation while using a Wi-Fi card. Palm recommends that you turn off the phone radio when using any Wi-Fi card or remove the Wi-Fi card when not in use to ensure that you can always make and receive phone calls. For EMERGENCY calls, always remove the card from your smartphone to ensure optimal connectivity.

My smartphone seems to turn off by itself

If a system error and reset occur, the phone automatically turns on if it was on before the reset. However, if your smartphone can't determine if your phone was on before the reset, it does not automatically turn on the phone (see Turning your phone on and off).

I can't tell if data services are available

The following icons appear in the title bar to indicate whether data services are available:

KEY TERM 1xRTT (Single carrier [1x] radio transmission technology): A wireless technology that can provide fast data transfer and Internet access with average speeds of 60-80Kbps and bursts up to 144Kbps.

KEY TERM EVDO (Evolution Data Optimized): A wireless broadband technology that is designed for very high-speed data transfer with average download speeds of 400-700Kbps, capable of reaching speeds up to 2Mbps, and upload speeds up to 156Kbps.

The EVDO or 1xRTT wireless network is within range. You can make or receive calls or open a data connection.

or 🐡

Your phone is connected to an EVDO or 1xRTT wireless network, but you are not actively transmitting data. You can still make or receive calls.

Your phone is on and an EVDO or 1xRTT data connection is active. If an EVDO data connection is active, you can still make or receive calls. When you make or receive a call, the data transmission is automatically interrupted. If a 1xRTT data connection is active, you can still make calls, but you cannot receive calls (incoming calls go to voicemail). When you make a call the data transmission is automatically interrupted.

Your smartphone is connected to a computer or network that is providing a data connection.

A data connection is not available or the phone is turned off (the wireless connection is off).

My smartphone won't connect to the Internet

Your smartphone supports 1xRTT or EVDO wireless data networks. To connect to the Internet, you must subscribe to data services with your wireless provider.

- Contact your wireless provider to verify that your subscription plan includes data services and that these services have been correctly activated. Your wireless provider should also be able to tell you if there are any outages in your location.
- Press and hold Power/End (2) to turn off your phone. Then press and hold the same button to turn it back on again.
- Perform a soft reset (see Performing a soft reset).
- Confirm that data services are correctly configured on your smartphone:
- 1 Press **Start** and select **Settings**.
- 2 Select the **Connections** tab, and then select Connections base.
- 3 On the Tasks tab, select Manage existing connections.

4 If Broadband Access appears in the list, press **OK** . If not, contact your wireless provider for assistance.

I can't send or receive text messages

- Make sure your phone is on (see <u>Turning your phone on and off</u>).
- Contact your wireless provider to verify that your plan includes messaging services, that these services have been correctly activated, and that they are available at your location (your wireless provider should be able to tell you if messaging services have been experiencing transmission delays).
- If possible, contact the recipient of the message, and make sure the receiving device can handle the type of message you're sending.
- If a text message arrives but does not display a notification, perform a soft reset (see Performing a soft reset).

I can't make or receive calls using a hands-free device with Bluetooth® wireless technology

Verify all of the following:

- The Turn on Bluetooth box is checked in Bluetooth Settings.
- Your Bluetooth device is charged and turned on.
- Your smartphone is within range of the hands-free device. Bluetooth range is up to 30 feet in optimum environmental conditions, which include the absence of the following: obstacles, radio interference from nearby electronic equipment, and other factors.
- The Bluetooth Settings screen is closed.
- You are away from other devices using the 2.4 GHz radio frequency, such as cordless phones, microwaves, and Wi-Fi® equipment. If this is impossible, move the phone closer to the hands-free device.
- The device specifications are compatible with your smartphone.

I lost the connection between my smartphone and my Bluetooth headset

1 Press **Start** , and then select **Settings**.

- 2 Select the **Connections** tab, and then select **Bluetooth**.
- 3 Select the **Devices** tab.
- **4** Select your headset name from the list.
- 5 In Partnership Settings, make sure the Hands Free option box is checked.
- 6 Select Save.
- **7** Highlight the headset name.
- 8 Press and hold **Center** to open the shortcut menu, and then select **Set as Hands-Free**.

9 Test your headset by making or receiving a call.

If the headset still doesn't work, delete the existing partnership and create a new one. To delete the partnership:

- 1 Press **Start**, and then select **Settings**.
- 2 Select the **Connections** tab, and then select **Bluetooth**.
- **3** Select the **Devices** tab.
- **4** Highlight the headset device name.
- **5** Press and hold **Center** to open the shortcut menu, and then select **Delete**.
- **6** Create a new partnership (see <u>Setting</u> up a <u>Bluetooth connection</u>.)

Synchronization (ActiveSync® software)

Synchronization lets you back up the information on your smartphone onto your computer. If you ever need to perform a hard reset or otherwise erase all your

information on your smartphone, you can synchronize your smartphone with your computer to restore the info. To make sure you always have an up-to-date backup of your info, synchronize frequently.

Before you attempt to synchronize, make sure you've installed the desktop synchronization software from the *Getting Started CD*.

DID YOU KNOW? You can go to the Windows website for more information at www.windowsmobile.com.

DID YOU KNOW? A common cause of sync problems is the presence of protective software, such as VPNs or firewalls, on your computer or network.

TIP If you are synchronizing to an Exchange Server and you're unable to change your lock settings, check with your system administrator to find out if a system wide locking policy is in place.

ActiveSync Desktop does not respond to sync attempt

As you complete the following steps, synchronize after each step. If the

synchronization is successful, you do not need to complete the remaining steps.

- 1 Verify that the USB sync cable is securely connected at all points (see Synchronizing contacts and other info).
- 2 Look for the **ActiveSync** + icon at the top of your smartphone's screen and the **ActiveSync** icon in the taskbar on your computer to make sure the ActiveSync software is running on your computer.
- 3 Double-click the ActiveSync icon in your taskbar. From the File menu, select Connection Settings. Make sure the Allow USB connections box is checked, and then click Connect.
- **4** Perform a soft reset (see <u>Performing a soft reset</u>).
- **5** Restart your computer and make sure ActiveSync is running.
- 6 If problems persist and you're synchronizing through a USB hub, try connecting the sync cable to a different USB port or directly to your computer's built-in USB port.
- 7 If you're already synchronizing through a built-in USB port on the front of your

- HAPTER
- computer, move the sync cable to a USB port on the back of your computer (if your computer has USB ports in both places).
- **8** Uninstall the desktop software that came with your smartphone, and then insert the *Getting Started CD* that came with your smartphone and repeat the installation process.
- 9 Switch to the USB serial synchronization method. Some firewall software does not allow the default USB synchronization model (RNDIS) to operate properly. If this is the case, switching to a USB serial synchronization method will allow ActiveSync to work properly.
 - Press Start and select Programs.
 - Select **UsbSwitch**
 - Press **OK** (a) to dismiss the confirmation message.
- **10** Verify with your computer hardware vendor that your operating system supports your internal USB controller.

Synchronization finishes but info doesn't appear where it should

- With the included software, your smartphone can synchronize with the root folders of Contacts, Calendar, Tasks, and Notes. If you want to synchronize with a global Exchange Address Book, you must copy the addresses to your local Contacts list in Microsoft Office Outlook (right-click the addresses and select Add to Personal Address Book).
- Microsoft Office Outlook subfolders and public folders are not accessible with the included software. You may want to use a third-party solution instead.
- If you're trying to sync offline, be sure to set your Microsoft Office Outlook Calendar, Contacts, Notes, and Tasks to be available offline.
- If you're still having problems, try the following:
 - Make sure you're synchronizing with the intended desktop personal information manager (PIM). The Getting Started CD lets you synchronize with Microsoft Office Outlook for Windows. If you use a

CHAPTER

- different PIM, you need to install third-party software to synchronize. For more information consult the company that makes the PIM.
- Open ActiveSync on your computer, and make sure the necessary synchronization settings are set to synchronize the files.
- Uninstall the ActiveSync software, reboot your computer, and then insert the *Getting Started CD* that came with your smartphone and repeat the installation process.

Synchronization starts but doesn't finish

- Make sure that you installed the desktop software that came with your smartphone. If you're not sure whether this software is installed, reinstall it.
- If you're trying to sync offline, be sure to set your Microsoft Office Outlook Calendar, Contacts, Notes, and Tasks to be available offline.

My media files won't sync

1 Make sure you have Windows Media Player 10 installed on your computer.

2 Reinstall your synchronization software from the *Getting Started CD* that came with your smartphone. Media file synchronization fails if you installed the synchronization software before you installed Windows Media Player 10.

My appointments show up in the wrong time slot after I sync

- 1 Make sure that you installed the desktop software that came with your smartphone. If you're not sure whether this software is installed, reinstall it
- **2** Open Microsoft Office Outlook and correct the wrong entries.
- **3** Manually enter any information you've added to your smartphone since the last time you synchronized.
- **4** Synchronize your phone and your computer.
- 5 Disable local network time. By default your smartphone synchronizes the date, time, and time zone with your wireless provider network whenever your phone is on and you are inside a coverage area. You can disable this option in Clock & Alarms Settings by selecting **More** and

You should now be able to assign time zones to your events without encountering this problem.

My scheduled sync doesn't work

By default, a scheduled sync does not work while you are roaming. This is to prevent roaming charges on your account. If roaming charges are not a concern, follow these steps to continue your sync schedule while roaming:

- 1 Press Start (a) and select Programs.
- 2 Select ActiveSync .
- **3** Press **Menu** (right action key) and select **Schedule**.
- 4 Check the Use above setting when roaming box.
- 5 Press OK .

An alert tells me that ActiveSync encountered a problem on the server

There is a temporary problem with the server or the server may be temporarily overloaded. Try again later, and if the

problem persists, contact your system administrator.

An alert tells me that there is not enough free memory to sync my info

ActiveSync ran out of storage space. Try the following:

- 1 Go to **Memory Settings** and close all running programs. See <u>Closing</u> applications for details.
- 2 If the problem persists, see <u>Making</u> room on your smartphone for suggestions of other ways to free up space on your smartphone.

An alert tells me that the server could not be reached

Your smartphone had to wait too long to connect to the Exchange Server. The connection may have been lost, the server may be temporarily overloaded, or the server may have encountered an internal error. Check your Exchange Server name and proxy server settings (see Synchronizing with an Exchange Server), and try again later.

An alert tells me that ActiveSync encountered a problem with [item type] [item name]

There is an error in synchronizing a single item. You can correct this error only by removing the item that caused the error. If you sync again to see if the error persists, be aware that items causing this type of error are skipped and do not show up again.

An alert tells me that my account information could not be detected

When you set up the Exchange Server sync options, the credentials page was left blank. Correct the credentials (see Synchronizing with an Exchange Server), or set up your smartphone to sync only with a computer, and try to sync again.

An alert tells me the device timed out while waiting for credentials

The Exchange Server credentials screen was left open too long. Re-enter the Exchange Server credentials, and try to sync again.

My Today screen settings are not restored after a hard reset

Settings such as the background image and plug-in choices are not backed up during synchronization, so they can't be restored after a hard reset. If you use a backup utility, you may be able to restore a backup to recover your Today screen settings and other additional info.

I can't synchronize using a Bluetooth connection

Before you begin, make sure your computer is equipped with Bluetooth® wireless technology, either built-in or through a Bluetooth card. Make sure that the computer's Bluetooth setting is discoverable.

- On your computer, right-click the gray ActiveSync icon in the Windows system tray, and select Connection Settings.
- 2 Check the Allow connections to one of the following box, and then select Bluetooth.
- 3 On your smartphone, go to your Today screen, and then tap **Bluetooth** §.

- CHAPTER
- 4 Check the Turn on Bluetooth box to turn on your smartphone's Bluetooth feature.
- 5 Press OK (a).
- 6 Press **Start** and select **Programs**.
- 7 Select ActiveSync 🔂.
- 8 Press Menu (right action key) and select Connect via Bluetooth.
- **9** If this is the first time you're making a Bluetooth connection to this computer, follow the onscreen prompts for setting up a Bluetooth partnership with this computer.
- 10 Select Sync.
- 11 When synchronization has finished, press Menu (right action key) and select Disconnect Bluetooth.

Email

I have problems using my account

Occasionally you may experience problems in using an email account after you set it up. If you followed the account setup procedure and are experiencing problems

in using the account, verify that the account complies with your email provider's requirements by following these steps:

- Verify both your password and your username for your email account.
- Some wireless service providers require you to be on their network to use your email account. If this is the case, be sure to use your provider's network as the connection type for the account.
- Some email service providers have other requirements specific to their service. For example, Yahoo! requires you to set up POP mail forwarding for your Yahoo! account to download email messages to your smartphone. Check with your service provider to see if any provider-specific requirements exist.
- Service provider settings frequently change. If your email account was working but you are currently experiencing problems, check with your service provider to see if any of the account settings have changed.

I have problems sending and receiving email

Short periods of time when email is unavailable are common due to server problems or poor wireless coverage. If you have problems sending or receiving mail for an extended period of time, check with your ISP or email service provider to verify that the service is working properly.

Auto Sync is not working

If Auto Sync is occurring and you turn your smartphone off or the connection to your email service provider is disconnected, the Auto Sync fails.

- Check the synchronization schedule to make sure that Auto Sync is set to occur at the expected day and time. See Setting the synchronization schedule for details.
- Press **Start** , select **Programs**, and then select **ActiveSync** • Press **Menu** (right action key) and select Configure Server. Make sure that the verify password setting is on. This is required for over-the-air synchronization.

I have problems sending email

If you are able to receive email messages but cannot send them, try these steps, in turn:

- Make sure your ISP or email provider allows you to access email on a smartphone. Some providers do not offer this option at all; other providers require an upgrade to access email on a smartphone.
- Turn on ESMTP. Many services require authenticated access, or ESMTP to use their SMTP servers.
- Press **Start** , select **Programs**, and then select **ActiveSync** • Press **Menu** (right action key) and select Configure Server. Make sure the SSL box is checked
- Enter the name of a different outgoing mail server for sending mail. Many ISPs, such as cable companies, require that vou have an Internet connection to their network to send email through their servers. In this case, you can almost always receive email from these accounts, but if you want to send email, you must send it through another server.

227

I have problems synchronizing messages on my smartphone with messages on my computer

Make sure you have chosen the same settings for the account on both your smartphone and your computer. For example, if the account is set up on your smartphone to use the POP protocol, check the ActiveSync settings on your computer to make sure that POP is selected as the protocol for that account.

My vCard or vCal email attachment isn't forwarding correctly

Microsoft Office Outlook provides several features that work with email client software on a Windows computer. For these features to work correctly, the email client software must be properly set up. Follow these steps to check the settings:

- 1 Click **Start** on your computer, and then select **Settings**.
- 2 Select Control Panel.
- **3** Select **Internet Options**, and then click the **Programs** tab.
- **4** Make sure that the email field is set to the correct email client software.

- 5 Click OK.
- 6 Start the email client software and make sure it is configured as the default MAPI client. Consult the documentation for your desktop email application for more information.

When I sync with my Exchange Server my info is not downloading to my smartphone

Check with your system administrator to obtain the name of the mail server that offers you wireless access to the corporate mail system. If you cannot obtain the name of this server (some companies do not give it out, because they do not want wireless access to their servers), you cannot use ActiveSync to synchronize with the Exchange Server. You can also check the following setting:

- 1 Press Start and select Programs.
- 2 Select ActiveSync .
- **3** Press **Menu** (right action key) and select **Configure Server**.
- 4 Make sure the **SSL** box is checked.

Web

I can't access a page

First, make sure you have Internet access: Open Internet Explorer Mobile and try to view a web page you've loaded before. To ensure that you're viewing the page directly from the Internet, press **Menu** (right action key) and select **Refresh**. After confirming your Internet connection, try to view the page in question again. If it comes up blank, press **Menu** (right action key) and select **Refresh**.

If you're still having trouble, the page may contain elements that are not supported by Internet Explorer Mobile, such as Flash, Shockwave, VBScript, WML script, and other plug-ins.

Some websites use a redirector to their true home page (for example, if you enter the address http://www.palm.com/support it may resolve to http://www.palm.com/us/support). If Internet Explorer Mobile can't follow the redirect, try using a desktop browser to see the landing page of the redirector, and enter that address in Internet Explorer Mobile.

TIP Your smartphone can open your email application when you select an email address on a web page. If nothing happens when you select the link, try setting up your email application first.

An image or map is too small on my smartphone screen

Internet Explorer Mobile has several viewing modes: One Column, Default, Desktop, and Full Screen. Switch to Desktop to see the full-size image (see <u>Viewing a web page</u>).

A secure site refuses to permit a transaction

Some websites don't support certain browsers for transactions. Please contact the site's webmaster to make sure the site allows transactions using Internet Explorer Mobile.

Camera

Here are some tips for taking good pictures with the built-in camera:

- IAPTER
- Clean the camera's lens with a soft, lint-free cloth.
- Take pictures in bright lighting conditions. Low-light images may be grainy, due to the sensitivity of the camera.
- Hold the camera as still as possible. Try supporting your picture-taking arm against your body or a stationary object (such as a wall).
- Keep the subject of the pictures still.
 Exposure time is longer with lower light levels, so you may see a blur.
- For best results, verify that you have the brightest light source coming from behind you, lighting the subject's face. Avoid taking indoor pictures with the subject in front of a window or light.
- Make sure the subject is at least 18 inches away from the camera to ensure good focus.

Remember that when you synchronize, your Camera images are stored in the C:\Documents and Settings\<Username>\My Documents\Treo My Documents folder on your hard drive

(see <u>Viewing pictures and videos on your computer</u>).

Resolution settings range from 1280 x 1024 to 160 x 120 pixels (1.3 megapixels to VGA). Video resolution settings range from 352 x 288 to 176 x 144 pixels. You can change the resolution setting by pressing **Menu** (right action key) and selecting **Resolution** (still images) or **Quality** (video).

The Camera preview image looks strange

Some third-party applications overwrite your smartphone's color settings with their own 8-bit color settings. This can affect the Camera Preview Mode. Delete third-party applications one by one until the preview image improves.

Third-party applications

Sometimes, third-party applications can cause conflicts on your smartphone. Third-party applications that modify

wireless features may affect your smartphone's performance and may require extra troubleshooting. Use caution when installing the following types of applications:

- Ringtone managers
- Caller ID applications
- Instant messaging
- Applications that modify when your phone or data connections turn on or off and how your phone behaves

If you recently installed an application and your smartphone seems to be stuck, try the following:

- **1** Perform a soft reset (see <u>Performing a</u> soft reset).
- 2 Make sure the third-party application is compatible with the Windows Mobile version 5.2 operating system on your smartphone.
- 3 Delete the most recently installed application from your smartphone (see Removing applications).
- **4** If the problem persists, perform another soft reset.

- **5** If possible, synchronize or use a backup utility to back up your most recent info.
- **6** Perform a hard reset (see <u>Performing a hard reset</u>).
- **7** Synchronize or restore your backup to restore the info in your built-in applications.
- 8 If the problem is resolved, begin reinstalling your third-party applications one at a time.
- **9** If the problem recurs, delete the last application you installed and report the problem to its developer.

TIP Remember that not all third-party applications were written with the Treo 700wx smartphone keyboard and 5-way navigator in mind. You may encounter strange behavior or errors in these applications if you use the keyboard and the 5-way navigator.

Getting more help

Contact the author or vendor of any third-party software if you require further assistance.

Making room on your smartphone

If you store a large number of records, or install many third-party applications, the internal memory on your smartphone may fill up. Here are some common ways to clear space on your smartphone:

- Camera: Large images take up a lot of memory. Move images to an expansion card or delete images from your smartphone (see <u>Viewing pictures and</u> videos on vour computer).
- **Messaging:** Email attachments can consume excessive memory. Move attachments to an expansion card, or delete large files from your smartphone (see Managing your messages). You may also want to empty the deleted items folder.
- **Internet:** If you save links to pages you've visited in Internet Explorer Mobile, you may want to clear all recent pages (see <u>Customizing your Internet</u> Explorer Mobile settings).

Third-party applications: You can delete infrequently used applications or move them to an expansion card (see Copying or moving applications and files between your smartphone and an expansion card).

Also, remember that your smartphone includes an expansion card slot, and that you can store applications and information on expansion cards. However, you still need free memory on the smartphone itself to run applications from an expansion card.

Voice quality

Is the other person hearing an echo?

- Try decreasing the volume on your smartphone to avoid coupling or feedback on the other person's end. This applies to both the speakerphone and to the handset ear piece.
- Position the smartphone closer to your ear to prevent sound leaking back to the microphone. Keep your hand away from

- the microphone hole, which is on the lower-right side of your smartphone.
- If you're using Speakerphone mode with your smartphone lying on a flat surface, try turning the smartphone face-down (so that the screen faces the surface).

Are you hearing your own voice echo?

Ask the other person to turn down their volume or to hold the smartphone closer to their ear.

Is your voice too quiet on the other end?

Be sure to hold the bottom of the smartphone, or the hands-free microphone, close to your mouth.

Check the signal strength indicator. If the signal is weak, try to find an area with better coverage.

TROUBLESHOOTING

Terms

1xRTT (Single-carrier [1x] radio transmission technology)

A wireless technology that can provide fast data transfer and Internet access with average speeds of 60–80Kbps and bursts up to 144Kbps.

ActiveSync®

The technology that exchanges and updates the information on your smartphone with the information on your computer.

Alt (alternative) Alt

A keyboard key. Press Alt (a) and then press a letter on the keyboard to access variations such as international characters and symbols.

Auto-off interval

The time of inactivity that passes before the screen on your smartphone turns off. The wireless features on your smartphone are unaffected by this setting.

Beam

The process of sending or receiving an entry or application using the infrared port on your smartphone.

Desktop software

A PIM application for computers, such as Microsoft Outlook, that helps you manage your personal information and keep your personal information synchronized with your smartphone.

EVDO (Evolution Data Optimized)

A wireless broadband-like technology that is designed for very high-speed data transfer with average download speeds of 400 to 700 Kbps.

Infrared (IR)

A way of transmitting information using light waves. The IR port on your smartphone lets you transfer information between other IR devices within a short radius.

Lithium Ion (Li-Ion)

The rechargeable battery technology used in Treo 700wx smartphones.

My Mobile Devices

The component on your Windows computer that enables you to install applications and other information on your smartphone.

Option 🕥

The keyboard button that lets you access the alternative feature that appears above the letter on each key.

Phone Off

When your Phone is off, your smartphone is not connected to any wireless network and "Phone Off" appears instead of your wireless provider's name. You can still use the organizer and other features.

Phone/Send 📞

The button on your smartphone that provides quick access to your Today screen.

PIM (personal information manager)

A genre of software that includes applications such as Microsoft Outlook, Palm® Desktop software, Lotus Notes, and ACT!. PIMs generally store contacts, schedules, tasks, and memos.

SMS

The service that exchanges short text messages almost instantly between wireless devices. These messages can usually include up to 160 characters. Your Treo 700wx smartphone can send and receive text messages while you are on a voice call.

SSID

The name that identifies a Wi-Fi network. If a network does not broadcast its SSID, you must get the SSID from the system administrator in order to connect to the network.

Start 💌

The menu on your smartphone from which you can open all applications.

Username

The name associated with your smartphone that distinguishes it from other Windows Mobile® devices. When you first synchronize your smartphone, you are asked to give it a username.

Wi-Fi access point

A network device with an antenna that provides wireless connections to a larger network. Also called a *hotspot*.

Windows Mobile

The operating system of your Treo 700wx smartphone.

Regulatory Information

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B computer peripheral, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Safety Exposure

To Radio Frequency Energy (RFE) Radio transmitting devices radiate Radio Frequency (RF) energy during its operation. RF energy can be absorbed into the human body and potentially can cause adverse health effects if excessive levels are absorbed. The unit of measurement for human exposure to RF energy is "Specific Absorption Rate" (SAR).

The Federal Communications Commission (FCC), Industrie Canada (IC), and other agencies around the world have established limits that incorporate a substantial safety margin designed to assure the safety of all persons using this equipment.

In order to certify this unit for sale in the US, Canada and Europe this unit has been tested for RF exposure compliance at a qualified test laboratory and found to comply with the regulations regarding exposure to RF Energy.

SAR was measured with the unit transmitting at its maximum certified RF power. Often, however, during normal operation the unit will transmit much less than maximum power. Transmit power is controlled automatically and, in general is reduced as you get closer to a cellular base station. This reduction in transmit power will result in a lower RF energy exposure and resulting SAR value.

FCC RF Safety Statement

In order to comply with FCC RF exposure safety guidelines, users MUST use one of the following types of bodyworn accessories.

- A Palm® brand body-worn accessory that has been tested for SAR compliance and is intended for use with this product.
- An accessory that contains NO metal (snaps, clips, etc) and provides AT LEAST 1.5 cm of separation between the users body and the unit.

Do NOT use the device in a manner such that it is in direct contact with the body (i.e. on the lap or in a breast pocket). Such use will likely exceed FCC RF safety exposure limits. See www.fcc.gov/oet/rfsafety/ for more information on RF exposure safety.

The Palm® Treo™ 700wx smartphone may be used with a Wi-Fi® SDIO card; however, the user must ensure that the SDIO Wi-Fi card has been approved by the FCC for use with the Treo 700wx smartphone. For a list of SDIO Wi-Fi cards approved by the FCC for use with the Treo 700wx smartphone, please go to www.palm.com/support.

If using a SDIO Wi-Fi card not approved for use with the Treo 700wx smartphone by the FCC, the user must turn off the phone (CDMA radio) on the Treo 700wx smartphone.

Use of an SDIO wireless transmitter that is not approved in conjunction with the phone (CDMA radio) is not authorized by the FCC and may exceed FCC RF exposure guidelines.

Responsible party

(North America)
Palm, Inc.
950 W. Maude Ave.
Sunnyvale, CA 94085
USA
www.palm.com

Antenna Care/Unauthorized Modifications

Use only the supplied integral antenna. Unauthorized antenna modifications or attachments could damage the unit and may violate FCC regulations. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Potentially Unsafe Areas

Potentially explosive atmospheres: Turn off your smartphone when you are in any areas with a potentially explosive atmosphere, such as fueling areas (gas or petrol stations) or storage facilities for fuel or chemicals.

Declaration of Conformity

Treo 700wx Model

Palm declares that the above model of Treo 700wx smartphone is compliant with the regulations below. The declaration applies to the smartphone and its associated accessories (power supply, headset, and USB cable) where applicable.

Maximum Scaled SAR Values (W/kg)		
Band	CDMA Cellular	CDMA PCS
Head SAR	(VV/Kg)	(W/Kg)
(Held to Ear)	1.26	1.26
Body SAR	(VV/Kg)	(W/Kg)
(Worn)	1.01	.55

For SAR values when used with a SDIO Wi-Fi card go to: www.palm.com/support.

FCC OET Bulletin 65 Supplement C Safety: EN 60950: 2000 (Jan-2000) Radiated Emissions: EN 55022

FCC ID: O8FJIMI
IC ID: 3905A-JIMI

Using TTY

A TTY (also known as TDD or text telephone) is a telecommunications device that allows people who are deaf or hard of hearing, or who have speech or language disabilities, to communicate by telephone.

Your Palm Treo 700wx smartphone is compatible with select TTY devices. You can connect a TTY/TDD machine to your smartphone through the headset jack, but you cannot use your headset jack with a headset or hands-free kit while this mode is enabled. Please check with the manufacturer of your TTY device for connectivity information and to ensure that the TTY device supports digital wireless transmission.

To use TTY, you may need to make additional arrangements with your network operator. Please contact your network operator's customer service department for more information.

- 1 Press the Start button and select Settings.
- 2 Select Personal, and then select Phone.
- 3 Select Phone.
- 4 Select the TTY/TDD list, and then select either Default mode, VCO mode, or HCO mode. Select Off to disable TTY.
- **5** Press OK. A keyboard icon appears at the top of your Today screen whenever TTY is enabled.

FCC Hearing Aid Compatibility

Your Treo is compliant with the FCC Hearing Aid Compatibility (HAC) requirements. For additional HAC information, including the HAC rating of this product, please go to www.palm.com/treoHAC.

Operational Warnings

IMPORTANT INFORMATION ON SAFE AND EFFICIENT OPERATION. Read this information before using your integrated multi-service portable radio.

For the safe and efficient operation of your radio, observe these guidelines:

Potentially Unsafe Areas / Potentially explosive

atmospheres Obey all signs and instructions regarding turning off your smartphone. In particular, turn off your smartphone when you are in any areas with a potentially explosive atmosphere, such as fueling areas (gas or petrol stations, below deck on boats), storage facilities for fuel or chemicals, blasting areas and areas near electrical blasting caps, and areas where there are chemicals or particles (such as metal powders, grains, and dust) in the air.

Interference to Medical and Personal Electronic Devices Most but not all electronic equipment is shielded from RF signals and certain electronic equipment may not be shielded against the RF signals from your smartphone.

Pacemakers The Health Industry Manufacturers Association recommends that a minimum separation of six inches (6") be maintained between a smartphone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by the recommendations of Wireless Technology Research.

Persons with pacemakers should:

- ALWAYS keep the smartphone more than six inches from their pacemaker when the smartphone is turned ON.
- Not carry the smartphone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference
- Turn the smartphone OFF immediately if you have any reason to suspect that interference is taking place.

Audio Safety Some hearing aids may be affected by some digital smartphones. You may want to consult your doctor in the event of you experience interference with your hearing aid while using your smartphone. When using the speakerphone feature, it is recommended that you place your smartphone at a safe distance from your ear.

Other Medical Devices If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your smartphone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Interference to Other Electronic Devices RF energy may affect improperly installed or inadequately shielded electronic operating and entertainment systems in motor vehicles. Check with the manufacturer or representative to determine if these systems are adequately shielded from external RF energy. Also check with the manufacturer of any equipment that has been added to the vehicle.

Repetitive Motion Injuries When using the keyboard or playing games on your smartphone, you may experience discomfort in your neck, shoulders, hands, arms, of other parts of the body. To avoid any injury, such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorder, make sure to take necessary breaks from use, take longer rests (such as several hours) if discomfort or tiring begins, and see a doctor if discomfort persists.

Blackouts and Seizures Blinking lights, such as those experienced with television or playing video games, may cause some people to experience blackout or seizure, even if never experienced before. In the event a smartphone user should experience any disorientation, loss of awareness, convulsion, eye or muscle twitching or other involuntary movements, stop use immediately and consult a doctor. Individuals with personal or family history of such events should consult a doctor before using the device. To limit the possibility of such symptoms, wherever possible every hour take a minimum of 15 minutes, use in a well lighted area, view the screen from the farthest distance and avoid exposure to blinking lights if you are tired.

Aircraft While in aircraft, follow all instructions regarding the operation of your smartphone. Use of your smartphone while on board on aircraft must be done in accordance in compliance with airline instructions and regulations.

Vehicles with Air Bags Your smartphone should not be placed in a position that would affect the operation of air bag deployment or in a position that, should the air bag inflate, could propel the smartphone. Air bags will inflate with great force and care should be taken to protect within a vehicle that has air bags.

Battery Your smartphone includes an internal lithium ion battery. Please note that use of certain data applications can result in heavy

battery use and may require frequent battery charging. Any disposal of the smartphone must comply with laws and regulations pertaining to lithium ion batteries.

Driving Safety Tips Overview

Always obey all laws and regulations on the use of smartphones in your driving area.

Safety — Your most important call. The Wireless Industry reminds you to use your smartphone safely when driving.

- Get to know your smartphone and its features, such as speed dial and redial.
- 2 When available, use a hands-free device.
- 3 Position your smartphone within easy reach.
- 4 Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.
- **5** Do not take notes or look up phone numbers while driving.
- **6** Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic.
- 7 Do not engage in stressful or emotional conversations that may divert your attention from the road.
- 8 Dial 9-1-1 to report serious emergencies -it's free from your smartphone!
- **9** Use your smartphone to help others in emergencies.
- **10** Call roadside assistance or a special non-emergency wireless number when necessary.

Driving Safety Tips Details

1 Get to know your smartphone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most smartphones offer including, automatic redial and memory dial-most smartphones can store up to 99 numbers in memory dial. Also, work to memorize the smartphone keypad so you can use the speed dial function without taking your attention off the road.

- When available, use a hands-free device. A number of hands-free smartphone accessories are readily available today. Whether you choose an installed mounted device for your smartphone or a speaker phone accessory, take advantage of these devices if available to you.
- 3 Position your smartphone within easy reach. Make sure you place your smartphone within easy reach and where you can grab it without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voice mail answer it for you.
- 4 Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.
- 5 Do not take notes or look up phone numbers while driving. If you are reading an address book or business card while driving a car, or writing a "to do" list, then you are not watching where you are going. It's common sense. Don't get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.
- 6 Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip, or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip-dial only a few numbers, check the road and your mirrors, then continue.
- 7 Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix-they are distracting and even dangerous when you are behind the wheel. Make people you are talking with aware you are driving and if necessary, suspend phone conversations which have the potential to divert your attention from the road.
- 8 Use your smartphone to call for help. Your smartphone is one of the greatest tools you can own to protect yourself and your family in dangerous situations-with your smartphone at your side, help is only three numbers away. Dial 9-1-1 in the case of fire,

- traffic accident, road hazard, or medical emergencies. Remember, 9-1-1 is a free call on your smartphone!
- 9 Use your smartphone to help others in emergencies. Your smartphone provides you a perfect opportunity to be a "good Samaritan" in your community. If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 9-1-1, as you would want others to do for you.
- 10 Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call to 9-1-1. But you can still use your smartphone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.

NOTICE FOR CONSUMERS WITH HEARING DISABILITIES

Digital Wireless Phones to be Compatible with Hearing Aids On July 10, 2003, the Federal Communications Commission (FCC) modified the exemption for wireless phones under the Hearing Aid Compatibility Act of 1988. This means that wireless phone manufacturers and service providers must make digital wireless phones accessible to individuals who use hearing aids.

For more information, please go to the FCC's Consumer Alert on accessibility of digital wireless phones at http://www.fcc.gov/cgb/consumerfacts/accessiblewireless.html.

Wireless telephones are hand-held phones with built-in antennas, often called cell, mobile, or PCS phones. These phones are popular with callers because they can be carried easily from place to place.

Wireless telephones are two-way radios. When you talk into a wireless telephone, it picks up your voice and converts the sound to radio frequency energy (or radio waves). The radio waves travel through the air until they reach a receiver at a nearby base station. The base station then sends your call through the telephone network until it reaches the person you are calling.

When you receive a call on your wireless telephone, the message travels through the telephone network until it reaches a base station close to your wireless phone. Then the base station sends out radio waves that are detected by a receiver in your telephone, where the signals are changed back into the sound of a voice.

The Federal Communications Commission (FCC) and the Food and Drug Administration (FDA) each regulate wireless telephones. FCC ensures that all wireless phones sold in the United States follow safety guidelines that limit radio frequency (RF) energy. FDA monitors the health effects of wireless telephones. Each agency has the authority to take action if a wireless phone produces hazardous levels of RF energy.

FDA derives its authority to regulate wireless telephones from the Radiation Control provisions of the Federal Food, Drug, and Cosmetic Act (originally enacted as the Radiation Control for Health and Safety Act of 1968).

[http://www.fda.gov/cdrh/comp/eprc.html].

FCC derives its authority to regulate wireless telephones from the National Environmental Policy Act of 1969 (NEPA) and the Telecommunications Act of 1996 http://www.fcc.gov/telecom.html]. Updated 7/16/2003

Hands-Free Capability All CTIA Certified portable products provide the consumer with a toll-free number for the purchase of a compatible hands-free device. 1-800-881-7256

STATIC ELECTRICITY, ESD, AND YOUR PALM DEVICE

Electrostatic discharge (ESD) can cause damage to electronic devices if discharged into the device, so you should take steps to avoid such an occurrence.

Description of ESD Static electricity is an electrical charge caused by the buildup of excess electrons on the surface of a material. To most people, static electricity and ESD are nothing more than annoyances. For example, after walking over a carpet while scuffing your feet, building up electrons on your body, you may get a shock—the discharge event—when you touch a metal doorknob. This little shock discharges the built-up static electricity.

ESD-susceptible equipment Even a small amount of ESD can harm circuitry, so when working with electronic devices, take measures to help protect your electronic devices, including your Palm® device, from ESD harm. While Palm has built protections against ESD into its products, ESD unfortunately exists and, unless neutralized, could build up to levels that could harm your equipment. Any electronic device that contains an external entry point for plugging in anything from cables to docking stations is susceptible to entry of ESD. Devices that you carry with you, such as your Palm device, build up ESD in a unique way because the static electricity that may have built up on your body is automatically passed to the device. Then, when the device is connected to another device such as a docking station, a discharge event can occur.

Precautions against ESD Make sure to discharge any built-up static electricity from yourself and your electronic devices *before* touching an electronic device or connecting one device to another. The recommendation from Palm is that you take this precaution before connecting your Palm device to your computer, placing the device in a cradle, or connecting it to any other device. You can do this in many ways, including the following:

- Ground yourself when you're holding your device by simultaneously touching a metal surface that is at earth ground.
 For example, if your computer has a metal case and is plugged into a standard three-prong grounded outlet, touching the case should discharge the ESD on your body.
- Increase the relative humidity of your environment.
- Install ESD-specific prevention items, such as grounding mats.

Conditions that enhance ESD occurrences Conditions that can contribute to the buildup of static electricity in the environment include the following:

- Low relative humidity.
- Material type (The type of material gathering the charge. For example, synthetics are more prone to static buildup than natural fibers like cotton.)
- The rapidity with which you touch, connect, or disconnect electronic devices.

While you should always take appropriate precautions to discharge static electricity, if you are in an environment where you notice ESD events, you may want to take extra precautions to protect your electronic equipment against ESD.

Specifications

Radio	• CDMA 800 (digital cellular), 1900 (PCS), and 1400 (GPS)
	EVDO and 1XRTT
Phone features	Personal speakerphone
	Hands-free headset jack (2.5 mm, 3-barrel connector)
	Microphone mute option
	TTY compatible
	3-way calling
Processor technology	Intel XScale [™] processor, 312MHz
Expansion	SD/MultiMediaCard/SDIO card slot
Battery	Rechargeable Lithium Ion
	Removable for replacement
	3.5 hours full charge time
Operating system	Windows Mobile® 5.2.2 Pocket PC Phone Edition
Camera	• Still image capture resolution: 1280 x 1024, 1.3 megapixel
	Automatic light balance
Size	• 5.08 in. x 2.28 in. x 0.89 in. (129mm x 58mm x 22.5mm)
	with antenna
Weight	• 6.4 ounces (180 grams)
Connectivity	Infrared (1.2 compliant)
	Bluetooth® wireless technology (1.2 compliant)

Display	Touch-sensitive LCD screen (includes stylus)65,536 colors (16-bit color)	
	• User-adjustable brightness	
Keyboard	Built-in QWERTY keyboard	plus 5-way navigator
	Backlight for low lighting conditions	
Included software	 Today/Phone (includes Speed Dial and Dial Pad) Messaging (text and email) Internet Explorer Mobile (web browser) Camera Pictures & Videos Windows Media Player Mobile File Explorer Contacts Calendar Tasks Notes Calculator ActiveSync® Direct Push Technology 	 Excel Mobile Word Mobile PowerPoint Mobile Pocket MSN Solitaire Bubble Breaker Voice Command Downloads application Quick Tour Search Terminal Services Picsel PDF Viewer Cubis (available on the Getting Started CD) Sprite Backup (available on the Getting Started CD)

System requirements	Windows 2000 or XP with USB port. Later versions may also be supported.
	Some wireless features require Microsoft Exchange Server 2003 with Service Pack 2.
Operating and storage	• 32°F to 104°F (0°C to 40°C)
temperature range	• 5% to 90% RH
